

Measure Before You Order.

Are Your Walls Plumb?

It is essential your shower enclosure is tiled before ordering as your measurements **WILL** change once tiling and grout are in place.

Take 3 tile to tile measurements:

1. **TOP** of glass height (78")
2. **MIDDLE** from threshold (39")
3. **BOTTOM** at threshold

- For Door Only models, subtract $\frac{3}{8}$ " from your absolute minimum width measurement to determine which model will fit your opening. If your total after subtracting $\frac{3}{8}$ " falls outside of a $\frac{1}{4}$ " increment, you will order the closest $\frac{1}{4}$ " model below your total.
- Our Door Only models are available in $\frac{1}{4}$ " width increments from 24" to 30".
- **DO NOT** order a model that is larger/wider than your absolute minimum width minus $\frac{3}{8}$ ". Shower model will not fit.
