Guía de Inicio Rápido

8. Apk main functions

1. Video monitoring: Real-time viewing of the camera image.
2. Intercom function: Supports two-way voice calls.
3. Motion detection: Automatically records and pushes alarms when motion is detected.
4. Cloud storage: Supports cloud storage for video playback.
5. Multi-user management: Supports adding family members to share the device.
6. Notification settings: Customizable alarm sound, vibration, and notification bar display.
7. Device settings: Adjust resolution, night vision, motion sensitivity, etc.
8. Firmware upgrade: Supports remote firmware upgrades.

Version support:

1. Android app: Supports Android 4.1 and above.
2. iOS app: Supports iOS9.0 and above running systems.

9. Apk Guide

1. Download the app: Download the app in mobile phone, scan apk, you can find the matching app page.

10. User Register

New user registers according to point mess already.

1. Open the app and click "Register".
2. Enter your email address and set a password.
3. Verify the email address: Check your email and enter the verification code to complete the registration.
4. Log in: Use the registered email address and password to log in to the app.

11. Add Device

Bind device to user's family.

1. Log in to the app: Ensure your mobile phone is connected to the network.
2. Add device: Click the "Add Device" button and scan the device's QR code or manually enter the device ID.
3. Bind device: Follow the prompts to complete the device binding.
4. Set permissions: Set the device's permissions (such as shared users).

11.1 Add Device Bluetooth

Activate Bluetooth on the phone, ensure the device is in Bluetooth pairing mode, and the app will automatically search for nearby devices. Select the device to complete the pairing.

11.2 Add Device Wifi

Ensure the phone is connected to a 2.4G Wi-Fi network, enter the Wi-Fi password, and the app will automatically configure the device's network.

11.3 General Connection

Use Ethernet cable to connect the device to the router, suitable for scenarios requiring a stable network.

11.4 Cloud Storage

Cloud storage supports 24-hour continuous recording, with videos automatically uploaded to the cloud for easy viewing and management.

11.5 Device Management

Manage all added devices, including renaming, deleting, and viewing device status.

11.6 Sharing Permissions

Share device permissions with other users, supporting multi-user collaborative management.

11.7 Notification Settings

Customize alarm notifications, including sound and vibration.

11.8 Storage Management

Manage cloud storage space, view used and remaining space, and clean up expired videos.

11.9 Network Diagnosis

Provide network diagnostic tools to detect network connection issues.

11.10 Firmware Update

Check for firmware updates and upgrade to the latest version to improve device performance.

11.11 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.12 Multi-language Support

Supports multiple languages, including English, Chinese, Spanish, French, German, etc.

11.13 Offline Mode

Supports local storage when the network is disconnected, ensuring basic functionality.

11.14 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.15 Device Sharing

Generate a temporary sharing link or QR code, allowing others to view the device.

11.16 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.17 Data Backup

Supports backup of device settings and user data to prevent data loss.

11.18 Remote Control

Supports remote control of the device's pan-tilt, zoom, and other functions.

11.19 Smart Home Integration

Supports integration with mainstream smart home platforms (such as Alexa, Google Assistant).

11.20 Storage Expansion

Supports expansion via SD card or NAS storage to increase storage capacity.

11.21 Permission Management

Administrators can set different permission levels for different users to ensure data security.

11.22 Log Query

Record all operation logs for easy tracking and troubleshooting.

11.23 Time Synchronization

Automatically synchronize device time with the network to ensure accurate timestamps.

11.24 Backup and Restore

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.25 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.26 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.27 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.28 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.29 Two-way Talk

Supports two-way voice calls between the device and the app.

11.30 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.31 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.32 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.33 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.34 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.35 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.36 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.37 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.38 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.39 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.40 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.41 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.42 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.43 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.44 Two-way Talk

Supports two-way voice calls between the device and the app.

11.45 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.46 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.47 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.48 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.49 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.50 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.51 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.52 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.53 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.54 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.55 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.56 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.57 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.58 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.59 Two-way Talk

Supports two-way voice calls between the device and the app.

11.60 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.61 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.62 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.63 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.64 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.65 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.66 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.67 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.68 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.69 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.70 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.71 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.72 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.73 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.74 Two-way Talk

Supports two-way voice calls between the device and the app.

11.75 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.76 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.77 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.78 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.79 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.80 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.81 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.82 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.83 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.84 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.85 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.86 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.87 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.88 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.89 Two-way Talk

Supports two-way voice calls between the device and the app.

11.90 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.91 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.92 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.93 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.94 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.95 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.96 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.97 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.98 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.99 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.100 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.101 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.102 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.103 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.104 Two-way Talk

Supports two-way voice calls between the device and the app.

11.105 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.106 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.107 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.108 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.109 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.110 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.111 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.112 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.113 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.114 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.115 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.116 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.117 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.118 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.119 Two-way Talk

Supports two-way voice calls between the device and the app.

11.120 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.121 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.122 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.123 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.124 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.125 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.126 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.127 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.128 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.129 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.130 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.131 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.132 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.133 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.134 Two-way Talk

Supports two-way voice calls between the device and the app.

11.135 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.136 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.137 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.138 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.139 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.140 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.141 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.142 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.143 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.144 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.145 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.146 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.147 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.148 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.149 Two-way Talk

Supports two-way voice calls between the device and the app.

11.150 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.151 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.152 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.153 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.154 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.155 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.156 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.157 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.158 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.159 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.160 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.161 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.162 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.163 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.164 Two-way Talk

Supports two-way voice calls between the device and the app.

11.165 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.166 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.167 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.168 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.169 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.170 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.171 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.172 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.173 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.174 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.175 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.176 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.177 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.178 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.179 Two-way Talk

Supports two-way voice calls between the device and the app.

11.180 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.181 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.182 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.183 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.184 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.185 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.186 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.187 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.188 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.189 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.190 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.191 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.192 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.193 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.194 Two-way Talk

Supports two-way voice calls between the device and the app.

11.195 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.196 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.197 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.198 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.199 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.200 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.201 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.202 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.203 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.204 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.205 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.206 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.207 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.208 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.209 Two-way Talk

Supports two-way voice calls between the device and the app.

11.210 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.211 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.212 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.213 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.214 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.215 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.216 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.217 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.218 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.219 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.220 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.221 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.222 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.223 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.224 Two-way Talk

Supports two-way voice calls between the device and the app.

11.225 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.226 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.227 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.228 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.229 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.230 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.231 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.232 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.233 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.234 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.235 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.236 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.237 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.238 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.239 Two-way Talk

Supports two-way voice calls between the device and the app.

11.240 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.241 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.242 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.243 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.244 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.245 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.246 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.247 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.248 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.249 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.250 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.251 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.252 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.253 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.254 Two-way Talk

Supports two-way voice calls between the device and the app.

11.255 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.256 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.257 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.258 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.259 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.260 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.261 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.262 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.263 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.264 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.265 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.266 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.267 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.268 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.269 Two-way Talk

Supports two-way voice calls between the device and the app.

11.270 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.271 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.272 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.273 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.274 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.275 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.276 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.277 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.278 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.279 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.280 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.281 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.282 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.283 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.284 Two-way Talk

Supports two-way voice calls between the device and the app.

11.285 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.286 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.287 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.288 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.289 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.290 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.291 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.292 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.293 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.294 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.295 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.296 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.297 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.298 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.299 Two-way Talk

Supports two-way voice calls between the device and the app.

11.300 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.301 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.302 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.303 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.304 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.305 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.306 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.307 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.308 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.309 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.310 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.311 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.312 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.313 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.314 Two-way Talk

Supports two-way voice calls between the device and the app.

11.315 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.316 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.317 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.318 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.319 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.320 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.321 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.322 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.323 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.324 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.325 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.326 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.327 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.328 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.329 Two-way Talk

Supports two-way voice calls between the device and the app.

11.330 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.331 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.332 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.333 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.334 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.335 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.336 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.337 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.338 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.339 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.340 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.341 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.342 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.343 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.344 Two-way Talk

Supports two-way voice calls between the device and the app.

11.345 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.346 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.347 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.348 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.349 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.350 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.351 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.352 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.353 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.354 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.355 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.356 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.357 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.358 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.359 Two-way Talk

Supports two-way voice calls between the device and the app.

11.360 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.361 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.362 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.363 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.364 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.365 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.366 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.367 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.368 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.369 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.370 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.371 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.372 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.373 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.374 Two-way Talk

Supports two-way voice calls between the device and the app.

11.375 Night Vision Mode

Automatically switches to infrared night vision when ambient light is low.

11.376 Bluetooth Pairing

Supports Bluetooth pairing with other devices (such as speakers).

11.377 Cloud Storage Expansion

Supports purchasing additional cloud storage space to extend video retention time.

11.378 Multi-device Management

Supports simultaneous management of multiple devices, suitable for multi-camera scenarios.

11.379 Data Encryption

Video data is encrypted during transmission to ensure privacy and security.

11.380 Firmware Update

Supports remote firmware upgrades to fix bugs and improve performance.

11.381 Offline Storage

Supports local storage when the network is disconnected, ensuring basic functionality.

11.382 Privacy Mode

Temporarily disable the camera or microphone to protect user privacy.

11.383 Voice Prompt

Supports voice prompts for device status changes, such as alarm triggers and connection success.

11.384 Data Backup

Supports backup and restore of device settings to quickly restore configurations after replacement or reset.

11.385 Alarm Schedule

Set the alarm time period, supporting different alarm strategies for different time periods.

11.386 Geofencing

Based on GPS location, automatically enable or disable alarms when entering or leaving specified areas.

11.387 Voice Changer

Supports voice changing functions, including adding and removing effects.

11.388 Motion Tracking

Supports automatic tracking of moving objects, ensuring they remain in the center of the image.

11.389 Two-way Talk

Supports two-way voice calls between the device and the app.
