

Installation Steps:

Thank you for using our products. Please read the operation manual before installation. Please keep this operation manual as a reference. Disconnect the power supply before installing this product. Installation by a professional electrician is recommended.

1. Install and fix the lamp arm on the cylindrical lamp body in sequence.
2. Install and fix the iron pipe to the top of the lamp body and finally connect it to the disk on the ceiling.
3. Fix the hanging plate to the reserved mounting box.
4. Connect the black wire to the fire and the white wire to the zero wire with wire caps (supplied) and wrap tightly with insulating tape. Connect the ground wire of the fixture to the ground wire of the junction box. If the house does not have a ground wire, connect it to the green screw on the wall plate (the screw labeled GND).
5. Secure the light to the wall plate with the round head nut.
6. Remove the ring at the top of the lamp head and install the glass cover onto the lamp head, holding it securely in place with the ring you just removed.
7. Install the bulb onto the lamp head, ensuring good contact.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
