Assembly and installation

DD-NR136-04

Tools included: 4 mm hex key, 10 mm open-end wrench.

Additional tools required: drill, drill bit suitable for the wall substrate, level, tape measure, screwdriver.

Hardware: M6 socket-head bolts, washers, locking nuts, four fixed foot caps and wall-restraint strap with rack-side bracket; wall-specific fasteners excluded.

1. Join the four post assemblies and upper cross-members with the supplied M6 bolts.

2. Fit the two upper decks at 48 and 64 in elevations. Install bracing only in the upper section; do not add a lower front crossbar.

3. Tighten with the supplied hex key and wrench and fit the four fixed foot caps. Place on a firm, level floor.

4. Install the restraint to a suitable structural wall point with selected wall-specific fasteners and the required drill/tools. Wall fasteners are not included.

Use and care

Indoor residential storage only. Use a firm, level support surface. Do not climb, sit or stand on the product. Keep children away during assembly. Check fasteners periodically. Empty the rack before moving or reconfiguring it. Wipe with a soft damp cloth and dry promptly. Stored items and display props are not included.
