SOLAR STREET LIGHT

INSTALLTION INSTRUCTONS

In order to illuminate the lamp normally, please follow the following rules.

- The solar lamp has been charged before leaving the factory and can light up normally. Please check whether the lamp is working normally before installation.
- Turn on the switch manually, if the light is on, it can be used normally.
- When installing, please install the solar panel face up, and install it in a position where the sun is exposed for a long time to ensure that the solar lamp can have enough charging time.
- The battery must be fully charged before it can be used for more than 12 hours.
- Working mode of solar lamp: light sensing mode. The light will turn on automatically when it is dark, on the contrary, it will turn off automatically when the brightness is enough.
- Please make sure the lamp is firmly fixed to avoid accidents in wind days.
- Please don't disassemble the solar lamp at will, so as not to affect the maintenance.
