1. First, attach 2 of the Lower Side Panels (B) to a Lower Back Panel (A), using the pre-drilled screws provided.	2. Once secure, flip the Lower section onto its back, and attach the Base (F), using the pre-drilled screws provided. Repeat this process to create the Middle section.	3. Now move onto the Upper section of the frame, attaching the 2 Upper Side Panels (angled) (D) to the Upper Back Panel (C), using the pre-drilled screws provided.	
4. Now insert the Shelf (F), in the same way as the Base, using the pre-drilled screws provided.	5. Now place the Middle section of the frame onto the Lower section and screw together where shown. Repeat this process by placing the Upper section onto the (now combined) Lower + Middle sections and screw together where shown.	6. Finally, sit the Roof (E) on top of the complete unit and screw together where shown.
