

FOLDING CHAIR

Components

- ① Folding Chair
QUANTITY: 1

Note:

There is no assembly required for this chair.

About Acacia Wood

Acacia is a plantation grown hardwood, high in oil content. It is resistant to weather, rotting, and bug infestation.

Wood Care Instruction

A seasonal cleaning may be desired. This can be done easily with a mild solution of water, laundry detergent and a little bleach. Just rinse the furniture and using a sponge or soft bristle brush scrub the furniture with the solution. Lastly, rinse the furniture with fresh water. Although Acacia weathers well we recommend a routine application of Cabot's Australian Timber Oil in umber brown in extremely dry climates. A routine oiling is also recommended for furniture to be used for dining purposes to discourage staining from food and drink spills.

To restore the original wood color, we suggest applying Cabot's Australian Timber Oil in brown umber (available through us) after cleaning. Paint or any products with polyurethane are not recommended, as application of these products will void the warranty.
