

GTX™ LED Panel

Standard Panel for Everyday Jobs

The GTX LED by Lithonia Lighting® is a cost-effective, reliable lighting solution designed for a variety of commercial applications. This low-glare flat panel features an external driver, ensuring visual comfort and efficiency. Constructed with an extruded aluminum frame and a prismatic lens, the GTX LED Panel offers excellent shielding and a modern appearance. Its low-profile design provides increased installation flexibility, particularly in spaces with restricted plenums. The back plate includes integral T-bar clips, allowing for easy installation into T-grid ceilings. Ideal for offices, retail spaces, convenience stores, and more

Features and Benefits
