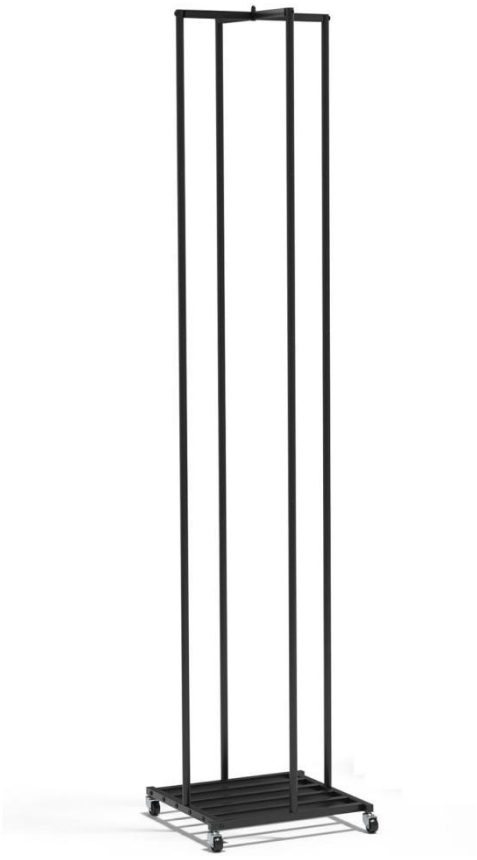
Installation Instructions

parts list			
	X2		X2
	X4		X12
	X4		X4
	X2		M8 X1
	M8-40 X20 (Installed on accessories)		M8 X1
	M8 X1		X4
	M8-30 X 1		
Step1:Check if the accessories are complete			
Firstly, remove the screws from the pipe fittings and install them according to the reference steps			
When installing the product, first fix the screws on the bracket, wait for them to be fully installed, and then lock all screws			
			
Step2:Place and install the square tube as shown in the diagram, and lock the screws			

Step3:Take out 4 round tubes and install them on the base, lock the screws at the bottom, and install the wheels

Step4:Install circular pipes on the bracket

Step5:Cross install the square tubes and secure them with screws



Step6:Install the cross stand at the top and secure it with screws, while locking all screws of the bracket，Installation completed
