Assembly Instructions for Dressing Table

Secure the mirror and tabletop.

Stand the mirror upright behind the tabletop. Fasten the three-layer structure consisting of the mirror, tabletop drawer and lower tabletop together from the rear of the mirror. Drive self-tapping screws on the left and right sides at the back of the mirror to ensure the mirror stays stable without wobbling.

Step 1: Install the mirror frame connecting brackets

Take out the 3 connecting brackets included with the vanity table, and mount them respectively at the joints between the mirror frame and the vanity table. Tighten the brackets to the mirror frame and vanity table separately with self-tapping screws for reinforcement and support, preventing the mirror from tipping forward or backward.

Step 2: Secure the vanity cabinet (small drawer unit)

First, pull out all small drawers from the vanity cabinet. Place the cabinet in the designated position below the mirror panel. Drive self-tapping screws inward from the front of the cabinet, two screws at each position, to firmly fasten it to the bottom of the mirror panel. Finally, reinstall the small drawers back into place.
