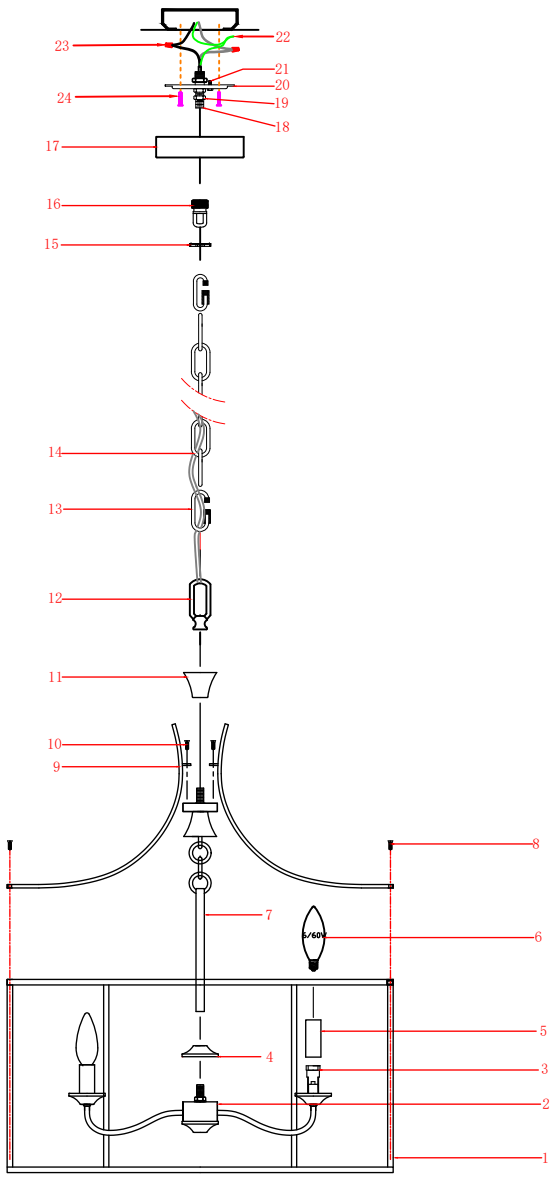
ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.



Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

1.Thread wires from the fixture assembly (2) through metal cover (4) and connecting rod (7). Secure rod (7) clockwise into fixture assembly (2).
2.Remove cover (11) and hanging ring (12) from rod assembly (7). Secure curved pipe (9) to rod assembly using short screws (10), and attach opposite end to lamp frame (1) using long screws (8). Reinstall metal cover (11) and hanging ring (12).
3.Thread fixture wires through chain (14). Connect chain to hanging ring (12) using quick link (13). Adjust chain length as needed.
4.Thread wires sequentially through retaining ring (15), threaded hanging ring (16), and canopy (17).
5.Secure threaded pipe (18) and hex nut (19) to mounting plate (20) as shown.
6.Pass wires through threaded pipe (18). Secure threaded hanging ring (16) to pipe and tighten with hex nut (19).
7.Mount mounting plate (20) to junction box using provided screws (24).
8.Wring Connections

·Use wire connectors (23) to connect the fixture's positive wire ("L"), negative wire ("N") to the corresponding wires from the junction box.

·Secure the ground wires to the mounting plate (20) using the green screw (21).

·Ensure no exposed conductors remain outside wire connectors or outside the junction box.

9.Tuck all wires neatly into junction box. Slide canopy (17) over threaded hanging ring (16) and secure with retaining ring (15).

10.Connect chain (14) to threaded hanging ring (16) using quick link (13). Tuck excess wires into junction box.

11.Install socket cover (5) over socket (3). Install light bulb (6) into socket (bulb not included). Do not exceed maximum wattage marked on socket cover (5).

Installation is complete.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.
1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
