How the knock down assembly system works

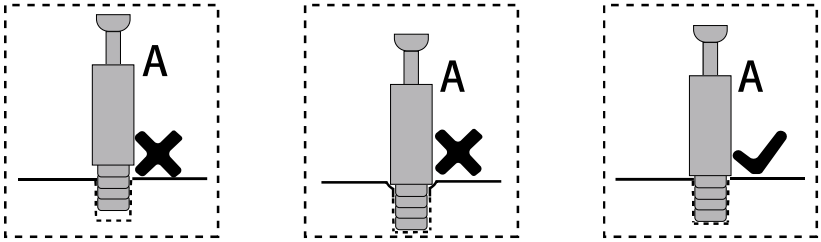

How to Install Wood Dowel

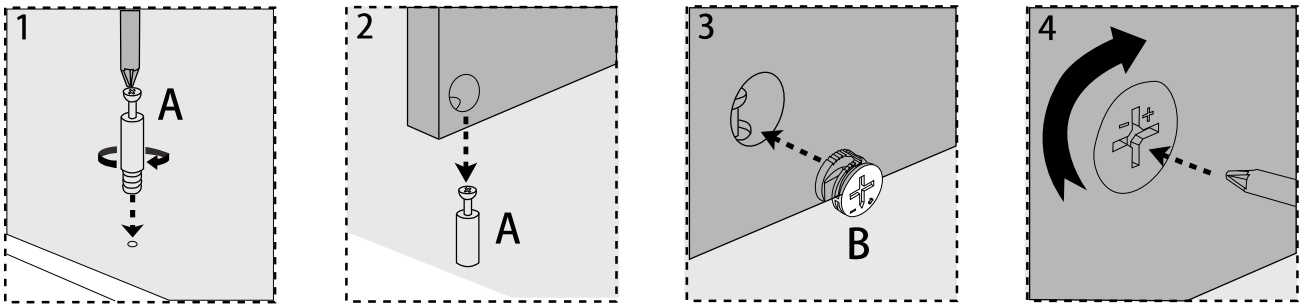

Insert the wood dowel [C] at least halfway into the pre-drilled hole. If necessary, tap it gently with a rubber mallet.

Cam Lock System Operation

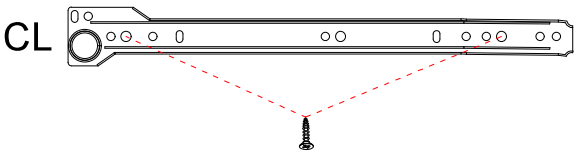

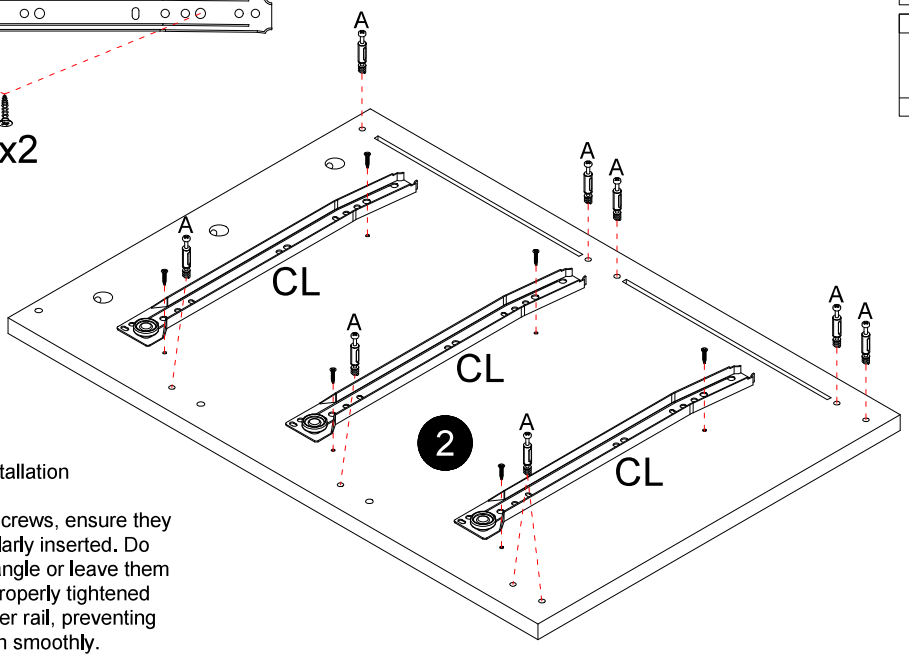

1. Screw the cam bolt [A] fully into the threaded insert on the panel.
2. Align and join the two panels, ensuring the cam bolt [A] passes through the pre-drilled hole for the cam lock [B].
3. Insert the cam lock [B] into the pre-drilled hole on the panel. Make sure the arrow on the cam lock faces outward (toward the Screw No. A).
4. Use a Phillips screwdriver to turn the cam lock [B] clockwise 100 – 180 degrees to lock the cam bolt [A] in place. Stop turning when tight.
