APP FEATURES

A. Color
1. Color & Brightness Control

- Choose from up to 16 million colors to create your preferred lighting atmosphere.
- Use the color wheel to select a color and adjust brightness according to your needs.
- Tap the "+" icon to save your favorite colors for quick access.

2. Delayed On/Off

- Use the Delayed On/Off feature to automatically turn the bulb on or off after a selected period of time.

B. Music
1. Music Sync

- In Music Mode, the bulb automatically changes colors and lighting effects in sync with the rhythm of the music.
- You can also add your favorite songs to the playlist for a personalized lighting experience.

2. Microphone Sync

- Select either your mobile device's microphone or the bulb's built-in microphone (if supported by your model).
- The lighting effects will dynamically respond to detected sounds and create an immersive audio-responsive experience.

Note:

- The built-in microphone feature is available only on models equipped with sound activation capability.

3. Lighting Effects

- Choose from 12 built-in dynamic lighting effects designed for different moods and occasions.
- You can also create customized lighting effects to personalize your lighting experience.

C. Scene Mode
1. Built-In Scenes

- Select from a variety of preset lighting scenes designed for different environments, activities, and occasions.
- Tap the "+" icon to create and save your own custom scenes.

2. Custom Scenes

- Create personalized lighting effects using the following modes:
  Static Color
  Dynamic Color
  Candle Mode
- Choose the mode that best matches your preferred lighting atmosphere.

D. Light Timer
1. Schedule Automatic On/Off

- Use the scheduling feature to set specific times for your bulb to turn on or turn off automatically.
- Create daily routines that fit your lifestyle and preferences.

2. Select a Lighting Effect

- When creating an automatic turn-on schedule, you can select the desired lighting effect that will activate at the scheduled time.

3. Adjust Transition Duration

- Set the Transition Duration to control how quickly the light changes when a scheduled action is triggered.

E. Group Control

- Group multiple compatible smart bulbs together for convenient simultaneous control.
- After creating a group, you can manage all connected devices within the group at the same time, including:
  - Turning lights on or off
  - Adjusting brightness
  - Changing colors
