

LUFTRUM Air Purifier AC400

User Guide

Details about LUFTRUM Purifier AC400

Proper use of your purifier and precautions

It is simple to use Luftrum purifier. In fact, the purifier is an electrical product. Before your first use, please refer to the user guide and stay sharp, so as to reduce the risks of fire, electric shock and injury. Also, please keep in mind that the warranty is restrictive, which applies only to the proper use as per the user guide.

The purifier is not suitable for those who are weak in physical strength, sensibility and intelligence (including children), as well as those who lack experience and cognition; if they want to use, they must operate the purifier under the supervision or guidance of the person in charge of their safety.

The purifier shall be installed in a well-ventilated place; the purifier shall be installed

with a spacing of at least 30cm from

adjacent objects, specially it is necessary to ensure that the air inlet and outlet shall not be blocked by objects.

Please take good care of your children and ensure that they will not operate the purifier at will. Once the power cord is damaged, it must be replaced by the manufacturer, its authorized service personnel or similar qualified personnel in order to avoid danger.

If you do not use the purifier for a long time, please unplug it, otherwise it is likely to cause an electric shock due to the aging of insulation layer or trigger a fire due to electric leakage. In addition, it is strictly prohibited to use the purifier in places with inflammables and explosives.

READ AND SAVE THESE INSTRUCTIONS

Please install the purifier as per the installation guide, and please do not place it outdoors. Please do not place it in humid areas where it is likely to be exposed to water, such as bathroom and laundry, etc. Please do not place it near heat sources such as induction cooker, fireplace or oven; near oxygen carrier and other inflammables; near electrical sensitive equipment, such as within 15cm from the computer.

To Reduce The Risk Of Fire Or Electric Shock, Do Not Use This Fan With Any Solid-State Speed Control Device.

Please close the window when using it

In the hot summer, if you open the window, the air conditioning is unable to work efficiently, because you can clearly feel the inflow of hot air and the outflow of cold air. Even if you cannot see the inflow of polluted air and the outflow of clean air, please close the window when using the purifier.

You must also close the door

Just as you may confine part of the house on a cold winter night to keep the heater run more efficiently, the relative close space enables your purifier to run at its best.

It is suggested to run your purifier 24 hours a day

In order to get the best result, you shall continue to run the Luftrum purifier 24/7. In fact, uninterrupted operation for 24 hours a day can ensure continuous supply of clean, healthy air indoors.

How to use your purifier

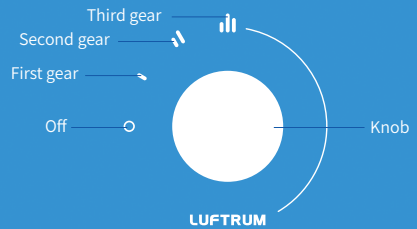

AC400

Please put the power cord plug in the socket or switchboard.

In initial use, it is suggested to turn the speed up to maximum in order to clean the polluted air indoors.

After several minutes, turn it to low speed.

Knob operation instructions

Operating instructions

Switch knob: turn this button to set the air speed of the air purifier to 1 ->2 ->3 clockwise, then turn to 2->1-> Off anticlockwise.

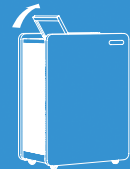

Filter replacement

It is recommended to replace the filter for half a year, in order not to affect purifier performance and cause secondary pollution.

Attention: When replacing the filter, please stop the purifier and disconnect the power supply.

The replacement method is as follows:

1. Disconnect the power supply, Open the top strainer cover, pull up the handle, and lift up the old one.
2. Install the new filter in the direction indicated above the filter (note that the white side of the filter faces outwards), switch on the power, and start the machine to run.

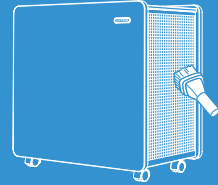

Product maintenance

Product maintenance LUFTRUM purifiers are manufactured with brand-new cutting-edge design, high-quality material and perfect technique. In order to ensure your purifier is always at its best, we recommend regular cleaning.

- 01** Prior to cleaning or maintenance, be sure to cut off the power supply of the purifier.

- 02** When the filter is removed for replacement, it is recommended to use a vacuum cleaner to clean the grid of air inlet from the inside.

- 03** It is suggested to clean the shell of the purifier with a soft, clean wet cloth.

- 04** It is strictly prohibited to clean the purifier with gasoline, chemical solvents or corrosive materials, otherwise these agents may damage the surface.

- 05** Be sure not to allow foreign matters to enter the air inlet and outlet of the purifier, otherwise it may cause an electric shock or damage.

Attention:

Be sure not to repair the LUFTRUM purifier or adjust its electrical or mechanical functions without authorization. You shall contact the local dealer for more information about the product warranty.

FAQs and troubleshooting

Question:

The indicator light is not on and the purifier does not work after it is powered on.

Solution:

1. Check whether the power plug is properly inserted and whether there is looseness.
2. Check whether the power cord at the bottom of the purifier is inserted in place or loose.
