ASSEMBLY INSTRUCTIONS
WARDROBE

⚠ WARNING

Children have died from furniture tip over. To reduce the risk of tip over:

- ALWAYS secure this furniture to the wall using an anti-tip device.
- NEVER allow children to stand, climb, or hang on drawers, doors or shelves.
- Do not defeat or remove the drawer interlock system.
- Place heaviest items in the lowest drawers.
- NEVER put a TV on this furniture.

To ensure the safety of those using this cabinet, it is crucial to properly secure it to the wall using a tip-over device. This product includes the necessary items for fixing the furniture to the wall. However, it is important to note that incorrect installation or failure to use the tip-over device can result in serious injury or even death.
For this reason, we highly recommend that a professional installer handle the installation of the cabinet to the wall.

What will you need?

Hi! I'll be with you while you assemble this cabinet.

A flat, smooth surface. You can use the cardboard of the box or a rug.

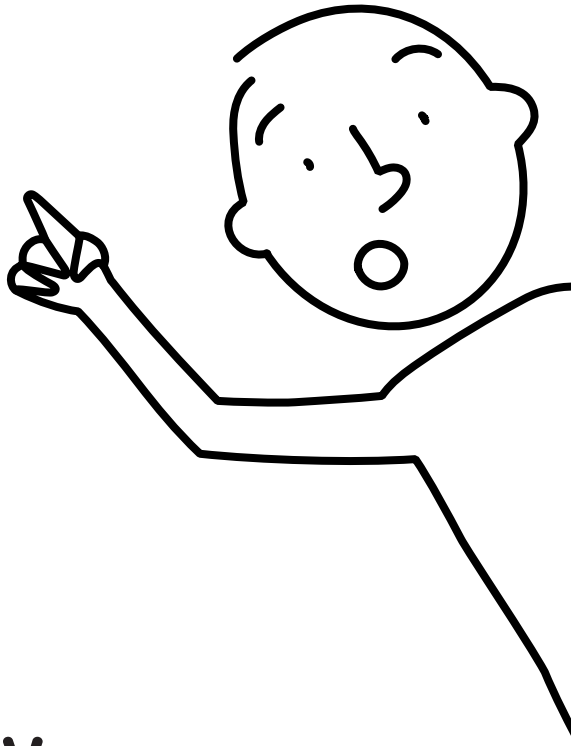

An electric screwdriver isn't necessary, but it can make the work much easier :)

Where should you start?

This is so IMPORTANT!

Over the next few pages is the panel and hardware content for this cabinet.
Please make sure that the quantity of each one is correct, and that everything is in good shape.

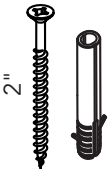

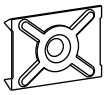

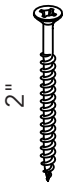

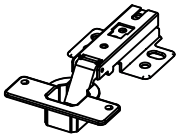

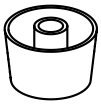

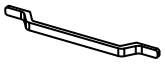

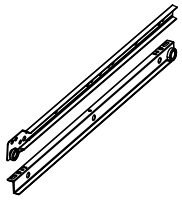

(When the cabinet is already assembled there's no warranty for this)

Be careful!, try not to lose anything from this bag, its content is necessary for assembling your cabinet.

How do the dowels and Minifix system work?

this is so important too!

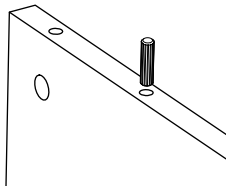

Everytime you're using one of these connectors during the assembly, you should follow these same steps.

Wood dowels

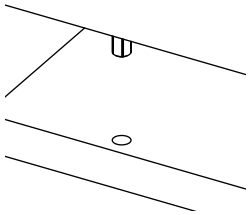

They are little wooden cylinders.

1

Put in the dowel inside the indicated hole and softly hit it until it's fully inside.

2

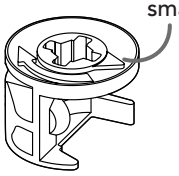

When joining two panels together, don't forget to gently hit the panels to adjust the joint.

Minifix system

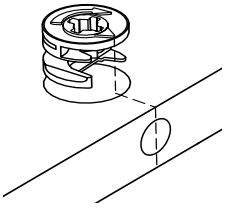

It's a joint compound of two parts: a spreading bolt and a Minifix cam.

1

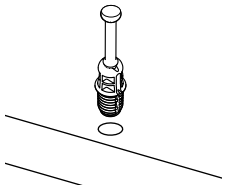

This is a Minifix cam. It has a little arrow on its upper surface.

2

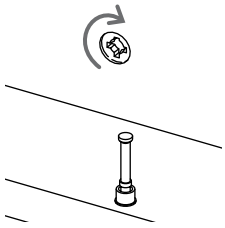

You should insert these cams with the little arrow pointing towards the drilling on the panel's edge (shown on the left).

3

This is a spreading bolt. You should put it with the black plastic part facing down.

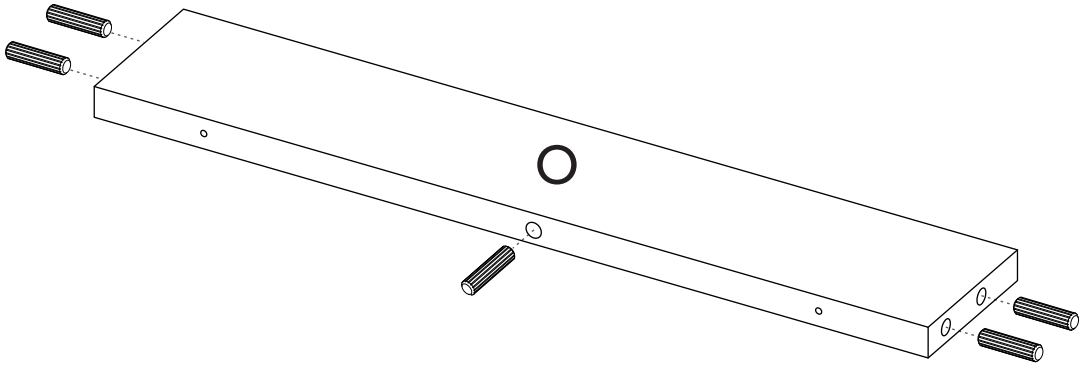

4

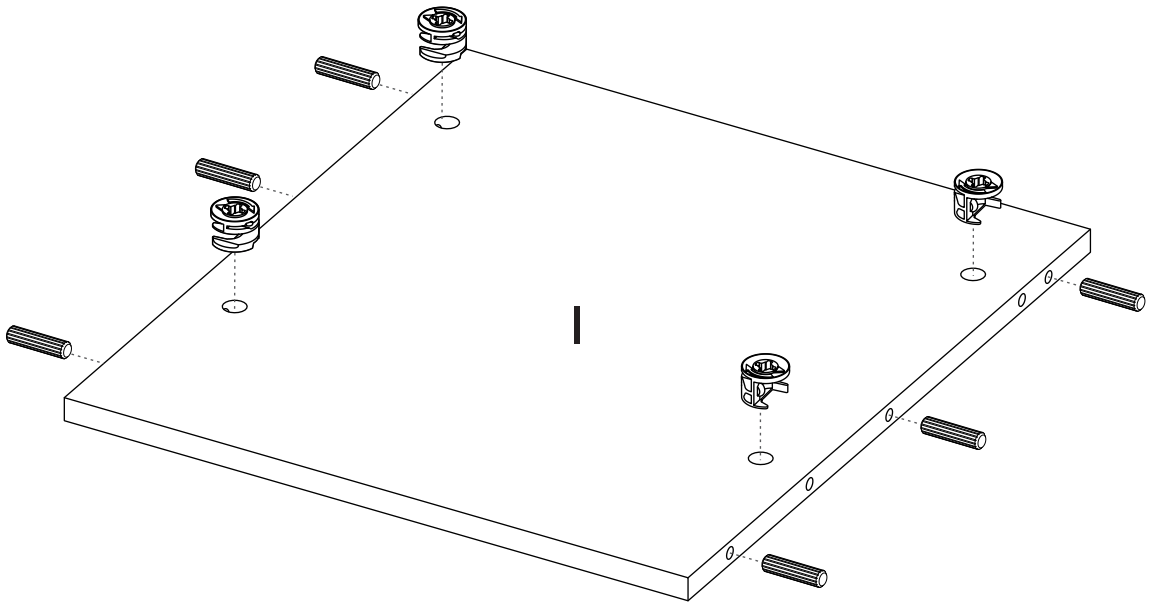

After joining two panels together you should turn the cams 180° with a phillips head screwdriver to adjust and secure the joint.

Congratulations! It's done

But don't go yet!

There are some recommendations left for you to take care of your cabinet correctly from now on.

SUPER IMPORTANT!

We suggest fixing the cabinet to the wall, so we can avoid the cabinet tipping and harming anyone. Be specially careful with the kids.

Taking care of your cabinet:

— Do not paint the cabinet.

— The cabinet it's exclusively for indoor spaces. Do not expose it to the direct sun.

— Clean the metallic hardware with a dry cloth.

— DO NOT overload the cabinet (see suggested loads)

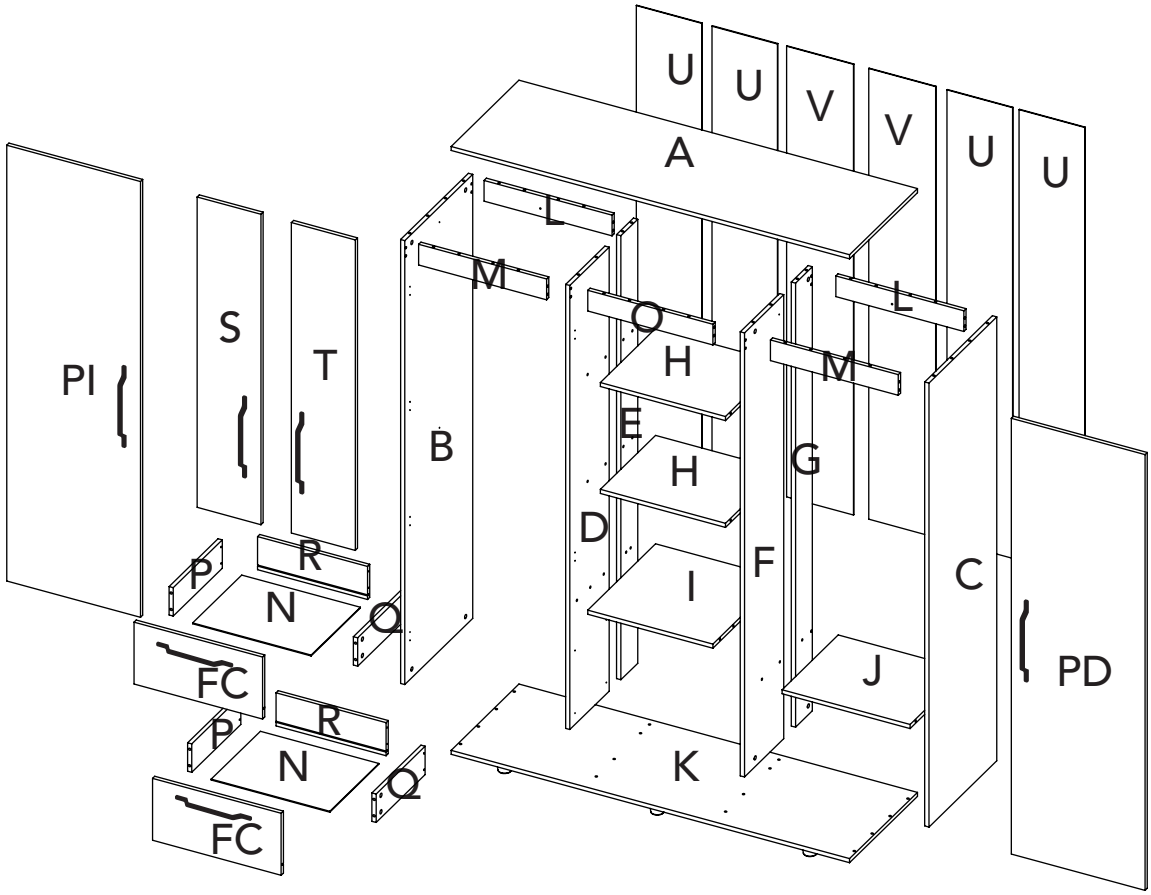

— Do not hit or hammer the cabinet (only when indicated here).

— Clean it with thinner, a soft soap solution or simply a damp cloth.

— Don't drag the cabinet, lift it up with other people.

— Avoid direct contact with water, fire or exposing it to high heat.
