# TEST REPORT

**Prepared for:**

**SOLACE FURNITURE**

**Dongguan Huangjiang Banhu Village Hecheng furniture**

**Product Name: Dresser**

**Model Name: A6DD-02**

**Trade Mark: N/A**

**Date of Test: From December 12, 2024 to December 18, 2024**

**Date of Report: December 18, 2024**

**Report Number: HK24121222281-1RR**

**Prepared by:**

**Shenzhen HUAKE Testing Technology Co., LTD.**

**1-2/F., Building B2, Junfeng Zhongcheng Zhizao Innovation Park, Heping Community,  
Fuhai Street, Bao'an District, Shenzhen, Guangdong, China**

The results shown in this test report refer only to the sample(s) tested unless otherwise stated and the sample(s) are retained for 30 days only. The document is issued by HUAKE, this document cannot be reproduced except in full with our prior written permission. The more details and the authenticity of the report will be confirmed at <http://www.cer-mark.com>.

**Applicant:** SOLACE FURNITURE

**Address:** Dongguan Huangjiang Banhu Village Hecheng furniture

**Manufacturer:** SOLACE FURNITURE

**Address:** Dongguan Huangjiang Banhu Village Hecheng furniture

**The following sample was submitted and identified by/on behalf of the client as:**

Sample Name: Dresser

Model No.: A6DD-02

Trade Mark: N/A

Tested Age Grade: Over 18 years old

Labeled Age Grading: Over 18 years old

Appropriate Age Grade: Over 18 years old

Sample Receiving Date: December 12, 2024

Testing Period: From December 12, 2024 to December 18, 2024

Results: Please refer to next page(s).

## B. ASTM F2057-23 Standard Safety Specification for Clothing Storage Units

| Applicable Section | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Result |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| 1.                 | <p>Scope</p> <p>1.1 This safety specification is intended to reduce injuries and deaths of children from hazards associated with tipover of free-standing clothing storage units, including but not limited to chests, chests of drawers, drawer chests, armoires, chifferobes, bureaux, door chests, and dressers, which are 27 in. (686 mm) or greater in height, 30 lb (13.6 kg) or greater in mass, and contain 3.2 ft<sup>3</sup> (90.6 dm<sup>3</sup>) or greater of enclosed storage volume.</p> <p>1.2 This safety specification does not cover shelving units, such as bookcases or entertainment furniture, office furniture, dining room furniture, jewelry armoires, underbed drawer storage units, occasional/accent furniture not intended for bedroom use, laundry storage/sorting units, or built-in units intended to be permanently attached to the building, nor does it cover "Clothing Storage Chests" as defined in Consumer Safety Specification F2598.</p> <p>1.3 This safety specification is intended to cover children up to 72 months. See Note 1.</p> <p>1.4 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.</p> <p>1.5 The following safety hazards caveat pertains only to the test procedure portion, Section 9, of this safety specification: This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety, health, and environmental practices and determine the applicability of regulatory limitations prior to use.</p> <p>1.6 This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.</p> |        |

| Applicable Section | Description                                                                                                                                                                                                                                                                                           | Result |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
|                    | removal of one or more extendible elements is allowed, for example, to install an anti-tip device or retrieve a lost sock.                                                                                                                                                                            |        |
| 4.6.1.2            | An interlocked extendible element removed for such one-time action shall not require removal of components such as back panels and dust bottom to access the interlocking mechanism during reengagement. Reengagement shall not require tools unless those tools are also required for disengagement. | Pass   |
| 4.6.1.3            | An interlocked extendible element removed for such one-time action shall either:                                                                                                                                                                                                                      | Pass   |
| (1)                | Not be fully functional when reinstalled until the interlock is reengaged. (For example, it will not fully close or ride on tracks if interlock is not reengaged—which can be an automatic action when reinstalled in case.); or                                                                      | Pass   |
| (2)                | Include a separate warning or warnings as described in 10.2.3.10.                                                                                                                                                                                                                                     | Pass   |
| 4.6.2              | Interlocks shall not require consumer assembly and/or installation if the unit is shipped assembled, except as allowed in 4.6.1.1.                                                                                                                                                                    | Pass   |
| 4.6.3              | Consumer assembly and/or installation of interlock components as part of the normal consumer assembly process is allowed for items shipped/sold unassembled.                                                                                                                                          | Pass   |
| 4.6.4              | When tested to 9.1, the extendible element shall be considered interlocked to the open extendible element if either:                                                                                                                                                                                  | Pass   |
| 4.6.4.1            | It remains closed during the test and is functional after tested extendible element is closed; or                                                                                                                                                                                                     | Pass   |
| 4.6.4.2            | Its opening acts to close the extendible element originally open.                                                                                                                                                                                                                                     | Pass   |
| 5.                 | Measurements                                                                                                                                                                                                                                                                                          |        |
| 5.1                | Measurements shall be taken on the test surface as defined in 8.2.1 to the nearest 1/8 in. (3 mm) after following any assembly and leveling procedures from 8.1.2.                                                                                                                                    | Pass   |
| 5.2                | Extendible Element Measurement:                                                                                                                                                                                                                                                                       | Pass   |
| 5.3                | Non-Extendible Enclosed Storage Measurement                                                                                                                                                                                                                                                           | Pass   |
| 5.4                | Volume Calculations:                                                                                                                                                                                                                                                                                  | Pass   |
| 6.                 | Scope                                                                                                                                                                                                                                                                                                 | Pass   |
| 6.1                | This test method is designed to test free-standing clothing storage unit stability                                                                                                                                                                                                                    | Pass   |
| 7.                 | Significance and Use                                                                                                                                                                                                                                                                                  |        |
| 7.1                | The test methods in this safety specification are intended to simulate the reaction of a clothing storage unit on carpet, loaded drawers, multiple open drawers, and a dynamic force from possible interaction of a child up to 72 months.                                                            | Pass   |
| 8.                 | Test Setup                                                                                                                                                                                                                                                                                            | Pass   |
| 8.1                | Unit Setup:                                                                                                                                                                                                                                                                                           | Pass   |
| 8.2                | Test Equipment                                                                                                                                                                                                                                                                                        | Pass   |
| 8.3                | Load Calculations and Distribution:                                                                                                                                                                                                                                                                   | Pass   |
| 9.                 | Test Procedure                                                                                                                                                                                                                                                                                        | Pass   |

## Tested part(s):

| Seq. no | Part(s) name                | Sample description    |
|---------|-----------------------------|-----------------------|
| 1       | White coating (yellow wood) | White cabinet surface |
| 2       | Silver metal clasp          | /                     |
| 3       | Silver screw                | /                     |

## C. USA 16CFR Part 1303 Ban of Lead Containing Paint and Certain Consumer Products Bearing Lead-Containing Paint

**Test method:** With reference to CPSC-CH-E1003-09.1, sample was digested with acid mixture and analyzed by inductively coupled plasma atomic emission spectrometer (ICP-OES)

| Item              | Unit  | MDL | Results     | Limit(Each) |
|-------------------|-------|-----|-------------|-------------|
|                   |       |     | 1           |             |
| Lead Content (Pb) | mg/kg | 5   | 5           | 90          |
| <b>Conclusion</b> | /     | /   | <b>Pass</b> | /           |

## D. USA Consumer Product Safety Improvement Act (CPSIA) Sec.101 Children's products containing Lead; Lead paint rule

### (1) Substrate Materials

**Test method:** With reference to CPSC-CH-E1001-08.3; CPSC-CH-E1002-08.3, by acid digestion and analysis was performed by inductively coupled plasma atomic emission spectrometer (ICP-OES).

| Item              | Unit  | MDL | Results     | Limit(Each) |
|-------------------|-------|-----|-------------|-------------|
|                   |       |     | 2+3         |             |
| Lead Content (Pb) | mg/kg | 5   | N.D.        | 100         |
| <b>Conclusion</b> | /     | /   | <b>Pass</b> | /           |

## TEST REPORT

Report No.: HK24121222281-1RR

Date: December 18, 2024

Page 10 of 17

## Remarks:

| Item                                   | Limit (ppm) |
|----------------------------------------|-------------|
| (a) for hardwood plywood               | 0.05 ppm    |
| (b) for particleboard                  | 0.09 ppm    |
| (c) for medium-density fibreboard      | 0.11 ppm    |
| (d) for thin medium-density fibreboard | 0.13 ppm    |
| (e) for a laminated product            | 0.05 ppm    |

## Exemption — laminated products

(4) A manufacturer of laminated products is not required to have the selection, testing and verification referred to in subsection (1) performed for a product type if

(a) in the case of a product type whose core or platform is a composite wood panel, formaldehyde emissions from the core or platform, prior to incorporation into the laminated product, do not exceed the applicable limit set out in subsection 6(1) or the correlated limit referred to in subsection 6(2); and

(b) the veneer is glued to the core or platform using a phenol-formaldehyde resin or a no-added-formaldehyde resin.

## Note:

- N.D. =Not Detected or less than MDL.
- MDL=Method Detection Limit.
- NA= Not Applicable
- %=Percentage by weight.
- 0.1%=1000mg/kg, mg/kg=ppm.
- <sup>(R)</sup>=Re-submitted sample

## G. CPSA Section 14(a) (5) Tracking Labels for Children's Products (15 USC §2063(a)(5) (CPSA))

| Applicable Section | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Result |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| (a)(5) (A)         | Effective 1 year after the date of enactment of the Consumer Product Safety Improvement Act of 2008, the manufacturer of a children's product shall place permanent, distinguishing marks on the product and its packaging, to the extent practicable, that will enable—                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Pass   |
| (i)                | the manufacturer to ascertain the location and date of production of the product, cohort information (including the batch, run number, or other identifying characteristic), and any other information determined by the manufacturer to facilitate ascertaining the specific source of the product by reference to those marks; and                                                                                                                                                                                                                                                                                                                                                                                                      | Pass   |
| (ii)               | the ultimate purchaser to ascertain the manufacturer or private labeler, location and date of production of the product, and cohort information (including the batch, run number, or other identifying characteristic).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Pass   |
| (B)                | The Commission may, by regulation, exclude a specific product or class of products from the requirements in subparagraph (A) if the Commission determines that it is not practicable for such product or class of products to bear the marks required by such subparagraph. The Commission may establish alternative requirements for any product or class of products excluded under the preceding sentence consistent with the purposes described in clauses (i) and (ii) of subparagraph (A).                                                                                                                                                                                                                                          | NA     |
| (b)                | The Commission may by rule prescribe reasonable testing programs for any product which is subject to a consumer product safety rule under this Act, or a similar rule, regulation, standard, or ban under any other Act enforced by the Commission, and for which a certificate is required under subsection (a). Any test or testing program on the basis of which a certificate is issued under subsection (a) may, at the option of the person required to certify the product, be conducted by an independent third party qualified to perform such tests, unless the Commission, by rule, requires testing by an independent third party for a particular rule, regulation, standard, or ban, or for a particular class of products. | Pass   |
| (c)                | The Commission may by rule require the use and prescribe the form and content of labels which contain the following information (or that portion of it specified in the rule) —                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Pass   |
| (1)                | The date and place of manufacture of any consumer product.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Pass   |
| (2)                | The cohort information (including the batch, run number, or other identifying characteristic) of the product.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Pass   |
| (3)                | A suitable identification of the manufacturer of the consumer product, unless the product bears a private label in which case it shall identify the private labeler and shall also contain a code mark which will permit the seller of such product to identify the manufacturer thereof to the purchaser upon his request.                                                                                                                                                                                                                                                                                                                                                                                                               | Pass   |
| (4)                | In the case of a consumer product subject to a consumer product safety rule, a certification that the product meets all applicable consumer product safety standards and a specification of the standards which are applicable. Such labels, where practicable, may be required by the Commission to be permanently marked on or affixed to any such consumer product. The Commission may, in appropriate cases, permit information required under paragraphs (1) and (2) of this subsection to be coded.                                                                                                                                                                                                                                 | Pass   |
