Door Bolt

Assembly Tool

Bracket x 2

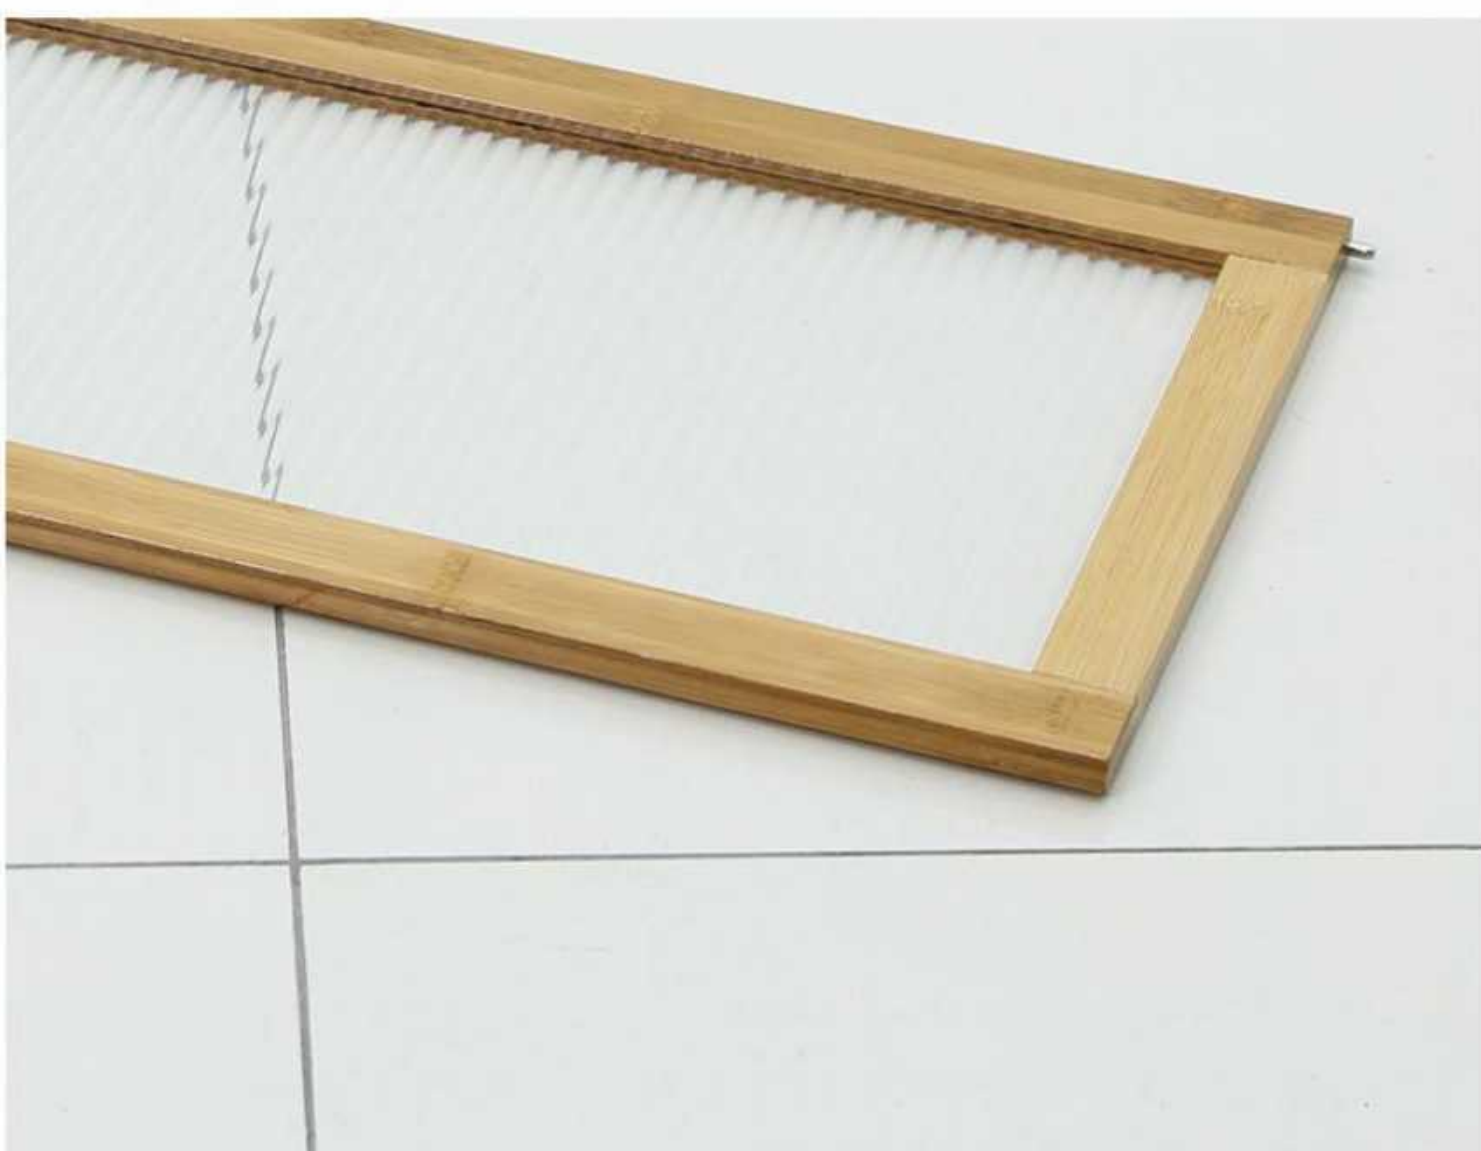

Bolt

Hinge

Door Panel Assembly

Take out the door panel and install the door handle with flat-head screws

Take out the door bolt and insert it into both ends of the door panel

Small Bracket Assembly

Take out the bolt and install the bracket with short screws

Take out the hinge and install it with short screws

Tabletop Assembly

Take out the large and small tabletops, and install the hinges with short screws (install two rows of hinges first; align the tabletops, then install the middle hinge, and tighten the screws)

Assembly Steps

1.Take out the shelf board and left table leg, then install with long screws

2.Take out the wide batten and install with long screws

3.Take out the right table leg and install with long screws

4.Take out the back panel and insert it along the groove

5.Take out the shelf board and install with long screws

6.Continue to take out the back panel and insert it along the groove

7.Take out the bracket with the installed hinge, then fix the side bracket with short screws

8.Install the assembled large/small tabletops (A & B) with long screws

9.Take out the wide batten and install with long screws

10.Take out the shelf board and install with long screws

11.Continue to take out the back panel and insert it along the groove

12.Insert the door bolt into the hole of the table leg

13.Take out the door panel, and snap the door bolt on the panel into the groove

14.Continue to take out the shelf board and install with long screws

15.Take out the narrow batten and install with long screws
