THEODORE ALEXANDER

The Color of Rain 1

D1835S36696-3116

The Color of Rain is a masterful landscape painting that presents an expansive of color and a well-balanced composition that creates a striking image of the natural world. The top half of the work features a sweeping sky as envisioned after a rainstorm. Radiant clouds form high in the atmosphere anchored by a band of solid cloud cover below. Hints of dark blue sky punctuate the clouds. A mountain formation on the horizon lends a sense of depth and distance. In the foreground pools of color dominate the scene representing the wash of rain across the land. The color scheme is a subtle interplay of warm and cool tones in indigo, cotton, smoke, chestnut, and umber that combine to create texture and harmony.

An original painting for ART by TA, viewers are invited to immerse themselves in the beauty of the natural world, with its striking imagery and masterful use of color and form.
