Lock Nut
Rubber Pad

Mounting Screw
Mounting Plate
Screw
Outlet Box
Lock Nut
Fixture Wire

Back Plate
Bolt Nut(-a)

Wire Nut
House Grounding Wire
Green Grounding Screw
Fixture Grounding Wire

Bolt Nut(-b)

Glass Shade

1. Unscrew bolt nuts(-a) from the back plate, and remove the mounting plate.
2. Thread two screws to the mounting plate, then secure them with two lock nuts. Adjust the length of the screws if necessary.
3. Attach the mounting plate to the outlet box by using two mounting screws.
4. Pull out the outlet wires and the house grounding wire from the outlet box. Make wire connections using the wire nuts:
     ---The black wire from the fixture to the black wire from the power source.
     ---The white wire from the fixture to the white wire from the power source.
     ---Attach the fixture grounding wire to the mounting plate with the green grounding screw. Then connect it to the house grounding wire with a wire nut.
      Carefully tuck the wires back into the outlet box.
5. Reattach the back plate to the mounting plate by inserting the two screws, secure it with two bolt nuts(-a).
6. Attach the two headless screws to the lock nuts on the back plate, then secure them with two lock nuts. Attach the rubber pads, glass shade to the back plate by inserting the two headless screws, then secure them with the two bolt nuts(-b). Adjust the length of the headless screws if necessary.
7. Install a bulb (not included), see relamping label at socket area or packaging for maximum allowed wattage.
8. Turn on the power at the main fuse or circuit breaker box.
