

lavis home SOLAR-POWERED LED LANTERN -INDOOR/OUTDOOR

General Information and Safety Instruction

Remove all the packaging properly. Please read this instruction carefully before you use this product.

Solar-Charged Battery

This lantern is operated using solar energy.

The unit includes ONE (1) Ni-NH battery that is rechargeable using sun exposure and has energy-saving LED lighting. Please put the lantern under sunshine for 8 hours to fully charge the battery.

ON/OFF Mode

To turn the light on, slide the switch located on the bottom side of the lantern to "ON" position.

To turn the light off, slide the switch located on the bottom side of the lantern to "OFF" position.

When the switch is in "ON" position, the light will turn on automatically when it is dark and will turn off automatically when it is bright.

Water Resistant for Outdoor Use

Ingress Protection IP55. You can use this lantern outdoors, rain or shine, but this item cannot be submerged in water.

LED lantern maintenance

To clean, wipe with damp cloth.

Troubleshooting

If unit will not turn on, ensure the light is in dark. Weak flickering or dim light indicates it is time to charge the batteries.
