

LV C1148

Thank you for shopping with us!

We encourage you to take a few minutes to go through this booklet. It contains important information on installation and care tips to keep your furniture looking as good as new.

Before Installation

Important – Please read these instructions fully before starting assembly

Thank you for purchasing this quality product. Be sure to check all packing materials carefully for small parts, which may have come loose inside the carton during shipment. Identify and count all items according to the PARTS LIST and/or HARDWARE LIST shown below. Check you have all the components and tools listed on the following pages.

- We recommend that you assemble this product with the assistance of another person; this will make the assembly easier, and will help eliminate damage to the product or injury to persons during assembly.
- Please do not over tighten screws or bolts until the assembly is completed.
- Keep children and animal away from the work area, small parts could choke if swallowed.
- Please put all parts on a non-abrasive floor before assembly, and follow the assembly steps to assemble your newly purchased product correctly and efficiently.

Cam Lock Assembly Instructions

Diagram A

Insert Cam Bolt into hole as shown in diagram A.

Diagram B

Also avoid inserting the Cam Bolt too close to the surface of the hole as shown in figure B, as this will cause the Cam Lock to be too loose, and not interlock properly.

Connect the panels together.

Attention: Cam lock arrow point to the steel rod.

first step

second step

third step

To tighten the Cam Lock, turn it clockwise on half a turn with a flat screwdriver. Do not use an automatic screwdriver as it may bend or break if too much power is imposed.

Installation of wooden tenons as shown in the diagram.

Dimensions

Components

Hardware

NO.	Draw	QTY
A	Screws Ø4x14mm	56
B	Two-in-one connector	24
C	Two-in-one connector	24
D	Wood plug	7
E	Plastic anchor(Ø10mm)	2
F	Screws for fix on the wall	2
G	Bracket (53x70x44mm)	2
H	Bracket (19x19x35mm)	2
I	Metal Feet	4

NO.	Draw	QTY
J	Screws M4x16mm	8
K	Middle metal foot M4x12mm	1
L	Hinges (Internal hiding)	4
M	Hinges (Half cover)	2
N	Screws Ø4x25mm	1
O	Door stopper	2
P	Anti-collision gasket	4
Q	Screwdriver	1

Step 5

The diagram illustrates the final assembly step. The main structure consists of a base (2), a middle shelf (5), and a top panel (1). A side panel (3) is being attached to the right side. A circular inset shows a close-up of the corner where the side panel meets the base and shelf, highlighting the placement of D parts (screws) into pre-drilled holes. Another circular inset shows a close-up of the side panel's edge, highlighting the placement of D parts into three specific holes. A legend on the right lists the parts: B (screws), C (screws), D (screws), and Q (corner brace).

Note: The D parts are used for these three holes

Step 7

The diagram illustrates the final assembly step of a cabinet. The main view shows a perspective of the cabinet with its internal dividers (K) being installed. The parts are numbered 1 through 7. Three circular callouts provide detailed views of the installation process:

- Callout J:** Shows a divider (K) being inserted into a pre-drilled hole in the side panel (1).
- Callout K:** Shows a divider (K) being inserted into a pre-drilled hole in the back panel (2).
- Callout K:** Shows a divider (K) being inserted into a pre-drilled hole in the top panel (3).

The parts list on the right identifies the components:

- K:** Vertical divider (x4)
- J:** Screw (M4*16mm) (x8)

The tool required for this step is a screwdriver.

Step 6

Diagram illustrating Step 6 of the assembly process. The main assembly shows a rectangular frame with panels 1, 3, 5, and 7. Screws (A) are used to secure the top panel (7) to the side panels (1, 3) and the back panel (5). Callout circles show detailed views of the corner joints where the top panel meets the side panels (labeled G and A) and where the top panel meets the back panel (labeled H and A).

Step 8

Diagram illustrating the assembly of the cabinet door (Step 8). The main assembly shows the door (1) being attached to the cabinet frame (2, 3, 4, 5, 6, 7, 8, 9, 10) using hinges (L, M) and screws (A).

Parts List:

- L (x2)
- M (x4)
- M (ø4 x 14mm) (x36)
- A

Tool: Power drill

Assembly instructions for the door hinge:

- Align the hinge (L) with the door (1) and the cabinet frame (2).
- Secure the hinge (L) to the door (1) using screws (A).
- Align the hinge (M) with the door (1) and the cabinet frame (2).
- Secure the hinge (M) to the door (1) using screws (A).

HINGE ADJUSTMENTS

① Coverage Distance

Rotate screw to the right: Coverage distance decrease (-)
Rotate screw to the left: Coverage distance increase (+)

② Depth Distance

Rotate screw to the right: Coverage distance decrease (-)
Rotate screw to the left: Coverage distance increase (+)

③ Height Distance

Release the base screw, adjust the height of the door, and then tighten the screw.

CARE CLEANING AND MAINTENANCE

1. Dust regularly with a soft , dry cloth.
2. Avoid the use of all chemicals household cleaners, abrasives, or cleaners that contain lemon, vinegar, or other acids that may damage the finish.
3. Excessive exposure to sunlight and extreme changes in temperature and moisture can damage wood furniture .
4. The sink top is resilient, but care needs to be taken to preserve its appearance.
5. Do not place hot appliances, such as curling irons and hot hair dryers directly on the countertop. Wipe spills immediately.

THANKS FOR WATCHING

Your feedback is invaluable to us and we would love to hear about your experience. Please take the time to leave us a review.
