

Installation Steps

Step 1-2: Secure the Suspension Rod

Pass the main wire through the suspension rod and then securely fasten the suspension rod to the lamp post. Ensure that the suspension rod is firmly installed to guarantee the stability of the lamp.

Step 3: Install the Fabric Shade

Connect the rings sequentially with the fabric shade.

Step 4-5: Attach the Iron Ring

Slide the iron ring over the assembly.

Step 6-7: Install the Surrounding Wire Assembly

Install the surrounding wire structure properly.

Step 8: Place the Installed Fabric Shade

Insert the assembled fabric shade into the wire structure.

Step 9-14: Secure the Suspension Rod (Repeat)

Pass the main wire through the suspension rod and then securely fasten the suspension rod to the lamp post. Ensure that the suspension rod is firmly installed to guarantee the stability of the lamp.

Step 15: Wiring

Pull out the power cable from the junction box. Use terminal connectors for wiring as follows:

White Wire (Neutral): Connect the white wire from the fixture to the white wire from the power supply.

Black Wire (Live): Connect the black wire from the fixture to the black wire from the power supply.

Ground Wire: Connect the ground wire from the fixture to the installation bracket with a green grounding screw, then connect it to the building's grounding wire using a wire clamp. Carefully place the wires back into the junction box and ensure all connections are secure and no wires are exposed.

Step 16: Secure the Installation Bracket

Use mounting screws to attach the installation bracket to the junction box. Tighten the screws to ensure the bracket is securely mounted on the junction box.

Step 17: Secure the Ceiling Box

Place the ceiling box on the installation bracket and tighten the decorative nut to secure the ceiling box. Ensure the ceiling box is installed flat and securely to prevent loosening.

Step 18: Install the Light Bulb

Finally, install the light bulb (note: the bulb is not included). Choose an appropriate bulb and install it correctly. Ensure the bulb is securely installed and makes good contact with the socket.

Precautions

Ensure the power is turned off during installation to avoid electric shock.

Hold the bulb with a clean cloth or gloves to prevent oil from your hands from contaminating the bulb surface.

If you are unsure about any steps, consult a professional electrician for assistance.
