## Notes

1. Please check the size of the lamp before purchasing, and compare the specific conditions of the installation location to see if it is appropriate.

2. It's best to space them 6 to 8 feet apart and not near other light sources (such as streetlights) to ensure a good lighting effect.
3. Please cut off the power before installation. It is recommended to be installed by a professional electrician.
4. It is **waterproof**, but it cannot be soaked in water.
5. The wall lamp is not dimmable. It is directly wired for use.
6. Please allow the slight color difference caused by the shooting light and 1-3cm error due to manual measurement, and make sure you do not mind before you order.

#### Installation Procedures:

**This product is relatively large, please pay attention to put it in a clean and flat place, preventing the lamp from being scratched.**
