Y  Nut M8 x 1 Clé à clé	Z  Handle & Fixings x 2 Poignée & fixations	

Assembly Tools Required (Not Included)
Outils d'assemblage requis (Non Inclus)

Using Camlocks

Step 1

Connect the male camlock as directed in the assembly instructions using a screwdriver.

1

DO NOT OVER TIGHTEN.
NE PAS SERRER EXCESSIVEMENT.

Step 2

Push the male camlock into the entry hole.

2

Step 3

Insert the female camlock as shown in the instruction.

Note: ensure that the arrow on the top of the camlock points towards the entry hole for the male camlock.

3

Step 4

Turn the female camlock clockwise with a screwdriver.

You should feel a click when the camlock is locked in place.

The joint is now secure.

4

Important information to read before starting the assembly. Keep this information for future reference.

IMPORTANT WARNINGS

Risk of serious injuries if the wall bed tips over.

To prevent wall bed from tipping over, mount it permanently to the wall.

Only a qualified person* must carry out the installation and any possible adjustment of the wall bed (including disassembly). If the wall bed is not firmly mounted (anchored) to the wall, it might tip over and cause serious injuries to the installer, users of the bed as well as the people near the bed.

The choice of wall anchoring depends on the type of wall. Use wall anchors suitable for the wall material.

* Qualified person: it is necessary to have a good understanding of the wall structure where the bed is anchored, including the positioning of the wall studs and structural components in the case of a wood or metal structure. If you do not have the necessary skills, make sure that the installation is done by someone who has the qualifications and required knowledge. When you choose the installer, make sure to comply with all applicable regulations in the province, state or country where the furniture is installed.

IMPORTANT: BEFORE STARTING ASSEMBLY

Be sure to confirm the following information:

1. The installer has the qualifications * and required knowledge.

2. Only wall anchor screws for wood-frame walls are provided with this bed. See anchor requirements and installation notes provided in the instruction manual, according to the type of wall, and use the appropriate anchors such as described in this manual.

3. Your bed can hold a maximum distributed weight of 800 lb (362 kg), including the weight of the mattress.

4. Maximum thickness of mattress: 9.8 in (23 cm), and must stand in vertical position without sagging.

5. The bed will not stay open without the weight of the mattress which must be between: 38 lbs (15 kg) and 90 lbs (41 kg).

6. Minimum ceiling height requirements for installation: 83 in (2.11 m).

7. It is recommended to assess the structural integrity of the floor and wall and to make sure that the wall anchoring devices can withstand the forces generated. More specifically, before installing the wall bed, it is necessary to verify that the floor and the wall on which you want to install the bed are flat and have no structural damage that could affect the installation of the wall bed or its anchoring to the wall. Do not install the bed on weakened or rotten structures.

8. It is necessary to ensure that wall anchors of the bed can withstand forces generated. The value of the holding power (Fh) of each anchor should be 630 Newtons (142 lbf).

If the wall bed is not installed properly, the latter might close unexpectedly or could open involuntarily.

In addition, if the wall bed is installed incorrectly, one of its structural components may break and fall off.

WALL ANCHORING REQUIREMENTS & INSTALLATION RECOMMENDATIONS

Important information to read before starting the assembly.
Keep this information for future reference.

IMPORTANT WARNINGS

* Qualified person: it is necessary to have a good understanding of the wall structure where the bed is anchored, including the positioning of the wall studs and structural components in the case of a wood or metal structure. If you do not have the necessary skills, make sure that the wall anchoring is done by someone who has the qualifications and required knowledge. When you choose the installer, make sure to comply with all applicable regulations in the province, state or country where the furniture is installed.

IMPORTANT WARNINGS

INSTALLATION AND APPROPRIATE HARDWARE

Using appropriate hardware, all the anchor screws of the wall bed must be firmly secured to the wood or metal studs, the structural components, or a masonry wall.

Only wall anchor screws for wood-frame walls are provided with this bed.

NEVER USE DRYWALL ANCHOR SCREWS OR SECURE THE BED TO DRYWALL

See wall anchoring requirements and installation notes provided in the instruction manual, according to the type of wall, and use the appropriate anchors such as described in this manual.

NUMBER OF SCREWS NEEDED

Two (2) screws are required for each anchor point. Three (3) wall anchor points are necessary for the proper installation of the wall bed. So you need a total of six (6) wall anchor screws.

THE SCREWS MUST BE VERY WELL ANCHORED TO THE STRUCTURAL COMPONENTS OF THE WALL.

** A CERTIFIED CONSTRUCTION PROFESSIONAL, IN COMPLIANCE WITH APPLICABLE REGULATIONS IN THE PROVINCE, STATE, OR COUNTRY WHERE THE FURNITURE IS INSTALLED.

Utilisation de Camlocks

1 Connectez le mâle Camlock tel que dicté dans Les instructions de montage Utiliser un driver scewdriver.	1 Ne pas trop serrer. NE PAS SERRER EXCESSIVEMENT. 	2 Poussez le camlock mâle Dans le trou d'entrée.	2 
3 Insérer le femle Camlock comme indiqué dans le Instruction. Note: assurez-vous que le Flèche sur le haut de la Camlock pointe vers Le trou d'entrée pour la Mâle camlock.	3 	4 Tournez la femelle camlock Dans le sens horaire avec un Tournevis. Vous devriez sentir un clic Lorsque le camlock est Verrouillé en place. Le joint est maintenant sécurisé.	4 

Informations importantes à lire avant le début de l'assemblée.
Conservez cette information pour référence future.

Avertissements importants

Risque de blessures graves si le lit mural se renverse.

Pour empêcher le lit mural de basculer, montez-le en permanence au mur.

Seule une personne qualifiée * doit effectuer l'installation et tout ajustement éventuel du lit mural

(y compris démontage). Si le lit de mur n'est pas solidement monté (ancré) au wal, il peut se basculer Et causer des blessures graves à l'installateur, aux utilisateurs du lit ainsi qu'aux personnes près du lit.

Le choix de l'ancrage mural dépend du type de mur. Utilisez des ancrages muraux adaptés au matériau du mur.

*personne qualifiée: il est nécessaire d'avoir une bonne compréhension de la structure du mur où le lit est ancré, y compris le positionnement des goudjons de mur Fabrication dans laquelle la valeur de toutes les matières utilisées ne doit pas excéder 40 % du prix départ usine du produit Vous ne possédez pas les compétences nécessaires. Mak2 s'assurer que l'installation est effectuée par une personne possédant les qualifications et les connaissances requises. Lorsque vous choisissez l'installateur, assurez-vous de vous conformer à toutes les réglementations applicables dans la province, l'état ou le pays où la fumiture est installée.

IMPORTANT: avant de commencer l'assemblage

Assurez-vous de confirmer les informations suivantes:

1.L'installateur possède les qualifications * et les connaissances requises.

2. Seules les vis d'ancrage pour les murs à ossature en bois sont fournies avec ce lit. Voir les exigences en matière d'ancre et les notes d'introduction fournies dans le manuel d'instructions, selon le type de wal, et utiliser les ancrages appropriés telles que décrites dans le présent manuel.

3. Votre lit peut contenir un poids réparti maximum de 800 lb (362 kg), y compris le poids du matelas

4. Épaisseur maximale du matelas: 9,8 po (23 cm), et doit se tenir en position verticale sans fléchir.

5. Le lit ne restera pas ouvert sans le poids du matelas qui doit être compris entre: 38 lb (15 kg) et 90 lb (41 kg).

6. Hauteur minimale de plafond requise pour l'installation: 83 po (2,11 m).

7. Il est recommandé d'évaluer l'intégralité structurelle du floor et du wal et de s'assurer que les dispositifs d'ancrage muraux peuvent résister aux forces générées. Plus précisément, avant d'installer le lit mural, il est nécessaire de vérifier que le lit et le mur sur lequel vous souhaitez installer le lit sont plats et ne présentent aucun dommage structurel qui pourrait affecter l'installation du lit mural ou son ancrage à la wal. Ne pas installer les structures affaiblies ou pourries bedon.

8. Il est nécessaire de s'assurer que les ancrages muraux du lit peuvent résister aux forces générées. La valeur du pouvoir de maintien (Fh) de chaque ancre devrait be 630 Newtons (142 LBF).

Si le lit mural n'est pas installé correctement, ce dernier peut se fermer inopinément ou peut s'ouvrir involontairement.

En outre, si le lit mural est mal installé, l'un de ses composants structurels peut se briser et tomber.

INSTALLATION RECOMMENDATIONS-MASONRY Recommandations d'installation-maçonnerie

IMPORTANT WARNINGS / Avertissements importants

INSTALLATION AND APPROPRIATE HARDWARE

Using appropriate hardware, all the anchor screws of the wall bed must be firmly secured to the wood or metal studs, the structural components, or a masonry wall. Only wall anchor screws for wood-frame walls are provided with this bed.

INSTALLATION et matériel approprié

À l'aide de quincaillerie appropriée, toutes les vis d'ancrage du lit mural doivent être solidement fixées aux goujons en bois ou en métal, Les composants structuraux, ou un mur de maçonnerie. Seules les vis d'ancrage pour les murs à ossature en bois sont fournies avec ce lit.

NUMBER OF SCREWS NEEDED

You need a total of six(6) wall anchor screws.

Nombre de vis nécessaires

Vous avez besoin d'un total de six(6) vis d'ancrage murale.

THE SCREWS MUST BE VERY WELL ANCHORED TO THE STRUCTURAL COMPONENTS OF THE WALL.

Les vis doivent être très bien ancrées aux composants structurels du mur.

- 6** Put the bed back in its place. put the CONCRETE SCREWS 3/8"(10mm) diameter X APPROPRIATE LENGTH into the holes of part #8 and screw the bed onto the masonry wall until tight against the wall. Screw must be at least 43/8"(110mm) deep into masonry. USE AN ELECTRIC SCREWDRIVER WITH AN ADJUSTABLE TENSION CLUTCH THAT HELPS PREVENT OVER-TIGHTENING AND STRIPPING.

Remettre le lit à sa place. Mettez les vis en béton 3/8"(10mm) de diamètre X longueur appropriée dans les trous de la pièce #8 et vissez le Lit sur le mur de maçonnerie jusqu'à ce que contre le mur. La vis doit avoir au moins 43/8"(110mm) de profondeur dans la maçonnerie. Utilisez un tournevis électrique Avec un embrayage de TENSION réglable qui aide à prévenir le serrage excessif et le décapage.
