

ASSEMBLY INSTRUCTIONS

Vertical Storage Shed

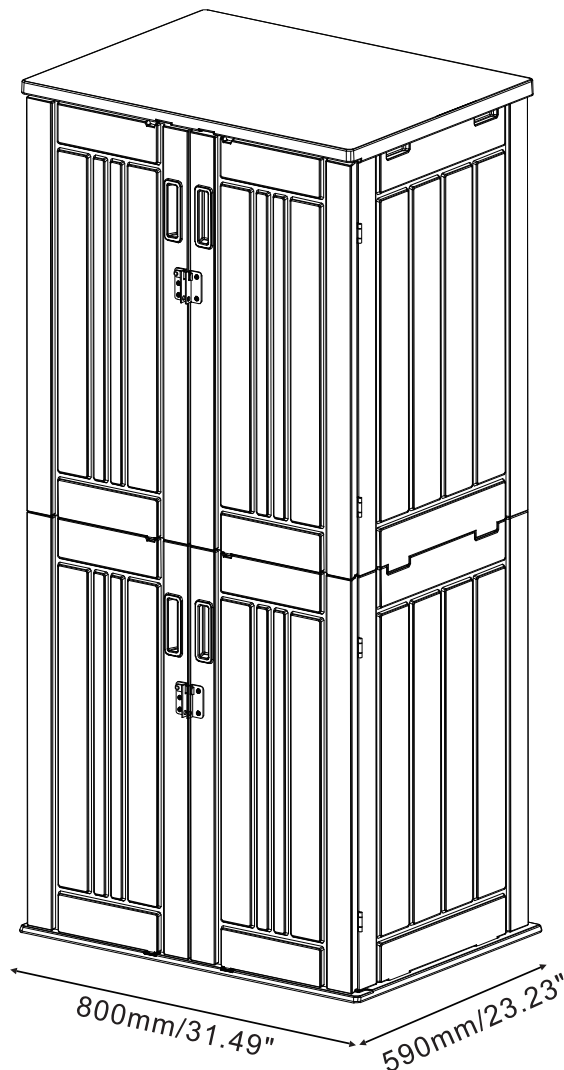

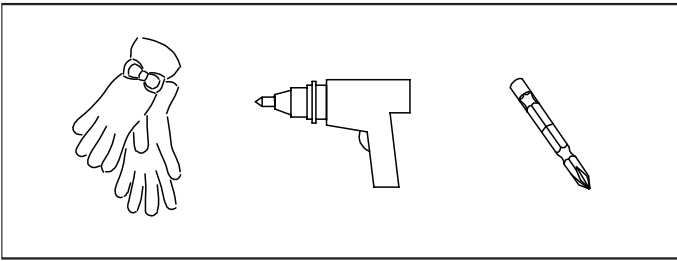

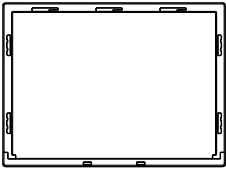

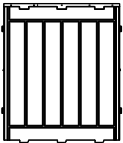

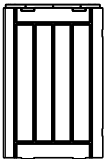

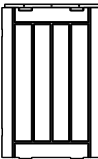

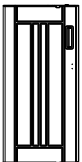

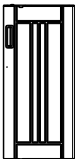

Installation Precautions

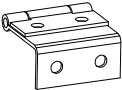

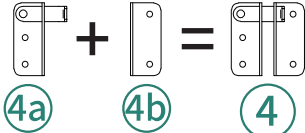

- ▲ 1. Gather and organize all required parts prior to assembly.
- 2. Assemble on a flat, clean and soft surface.
- 3. Two or more people are needed for the assembly.
- 4. Align the holes before assembly and snap into place with a slight tap.
- 5. The product's structure prevents it from being conveniently assembled in low temperatures, so do not intentionally install at low temperatures.
- 6. During installation, please refer to the accessories guides to ensure that they are installed in the correct directions.

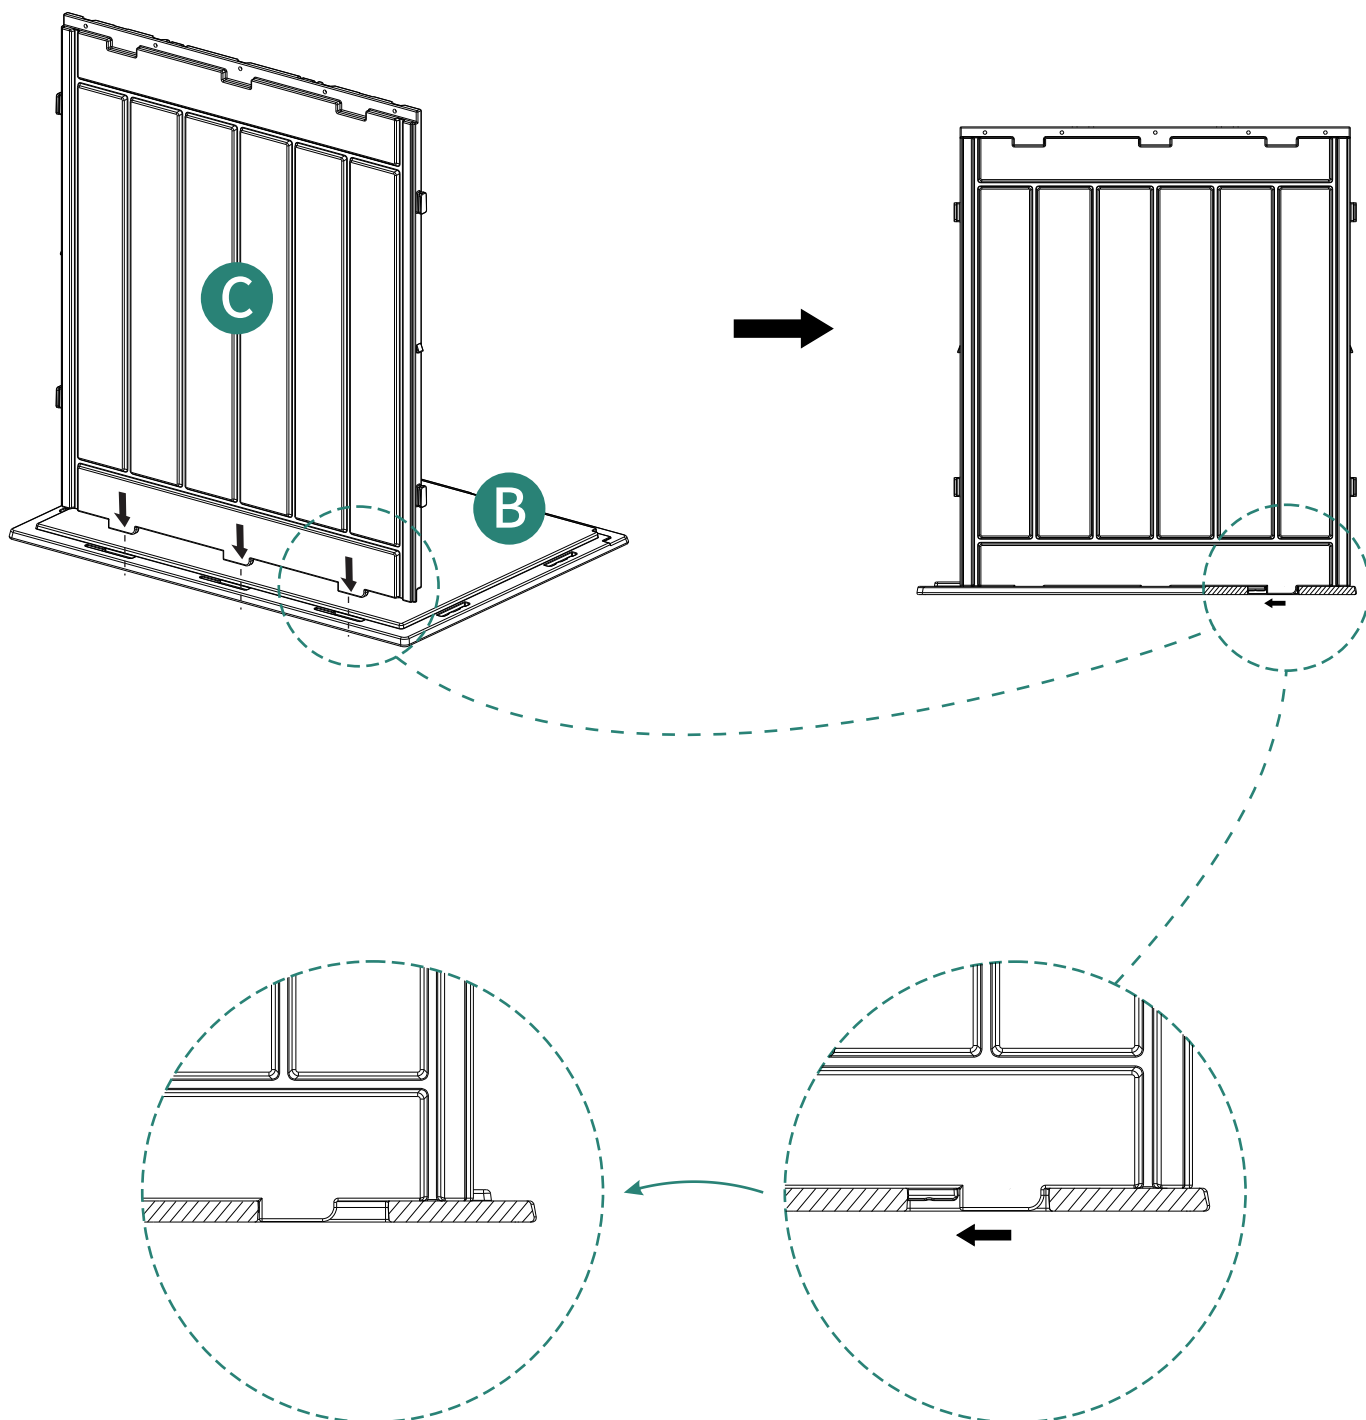

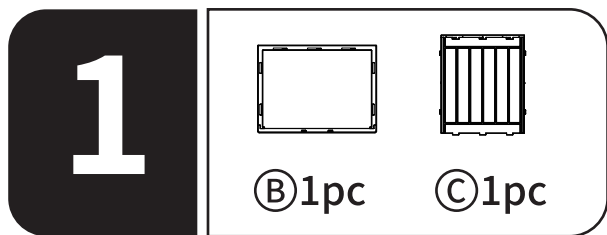

Please have the following auxiliary tools ready:

The diagram illustrates the fifth step of assembly, which involves attaching the back panel (labeled 'C') to the main frame. The main assembly view shows the panel being moved into position and secured to the vertical frame rails. A red circle highlights the specific attachment points on the rails. A red dashed circle provides a detailed view of a screw being inserted into a bracket on the frame rail. Two additional insets show the top and side connections of the panel, with dashed lines indicating the alignment and placement of the screws. Arrows indicate the direction of movement for the panel and the screws.
