

Installation & Assembly

1: Remove the lamp body from the packaging.

2: Manually unscrew the serrated piece covering the round ball, and the cover will come off.

3: Rotate the lamp head into the corresponding inner teeth of the ball one by one.

Pull the wire manually, then insert the upper cover over the ball, and manually lock the threaded parts.

4: Tighten the wiring end cover in the correct manner

5: Tighten and fix the mounting plate to the junction box, and then fix the screws on both sides of the ceiling.

6: Tighten and connect the ceiling plate, the middle rod and the round ball together.

7: Insert the 160MM long iron wire with teeth at both ends into the corresponding internal teeth of the lamp socket one by one.

8: Twist the 140MM-long wire with teeth at both ends into the teeth of the iron piece beneath the round ball.

9: Install the light bulb.

10: Install the clear light, acid-washed surface and glass flowers on each layer as much as possible in a staggered sequence.

11: Plug in the power supply and the light will turn on.
