

# Classic Outdoor Kitchen Cabinet Series

## MASTER INSTALLATION GUIDE

### **Warning: Excessive weight hazard!**

Use two or more people to move, assemble, or install Cabinet to avoid back injury. Do not leave children unattended near the cabinets. High risk of tipping if cabinets are installed incorrectly. For assistance, call 1.877.306.8930; e-mail at [info@newageproducts.com](mailto:info@newageproducts.com).

### **ATTENTION:**

Is your Cabinet damaged?  
Need help or spare parts? For fastest service, contact NewAge Products at 1-877-306-8930; or [support@newageproducts.com](mailto:support@newageproducts.com).  
Do not return to the retailer.

# Outdoor Area Preparation

**ATTENTION :** NewAge recommends using a professional kitchen installer to prepare and install kitchen cabinets.

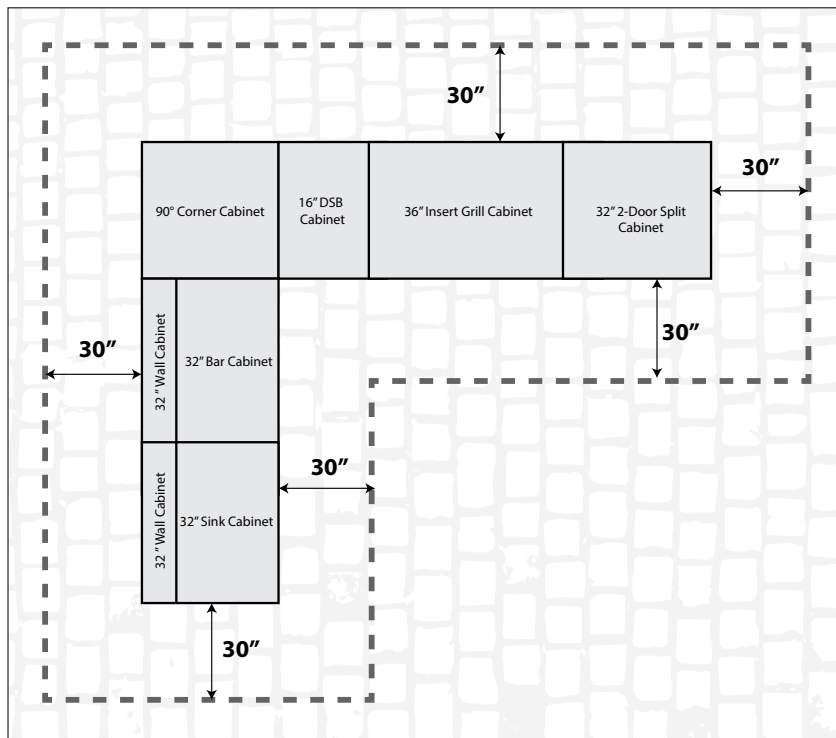

**NOTE:** If you are unfamiliar or unsure of how to handle utility connections, have a qualified professional perform these duties.

## Components For Assembled Cabinets

- Shut off all existing water, power and utility lines.
- Remove existing cabinets and appliances. It is best to move these out of the Outdoor Area for easier access to the work area while the installation is being done.
- Make sure having a flat leveled surface to install your Classic Outdoor Kitchen.
- Having the adjustable leveling legs, the Classic Outdoor Kitchen cabinets can be installed on any flat decking, concrete, or paving surface, however, the surface has to be leveled for the proper installation.

## STEP 1 : FIND THE BEST LOCATION AND UNDERSTAND YOUR NEEDS

- The first step to setting up an outdoor kitchen is conducting a site survey.
- Determine how large of an area you can dedicate to your outdoor kitchen, measure the proposed area's square footage.
- Be sure that the planned location is close to accessible utilities, and provides a clear path to your Outdoor kitchen.
- We would recommend a 30" border space surrounding your kitchen cabinets to ensure that you have plenty of room for food prep, cooking, serving, and entertaining.

**NOTE :** If you want to maintain the view you currently have looking outside of your home, be sure to position your outdoor kitchen space in such a way that the view is not blocked.

Sketching out your layout on graph paper will help you to visualize where things should go, later determining what you may need.

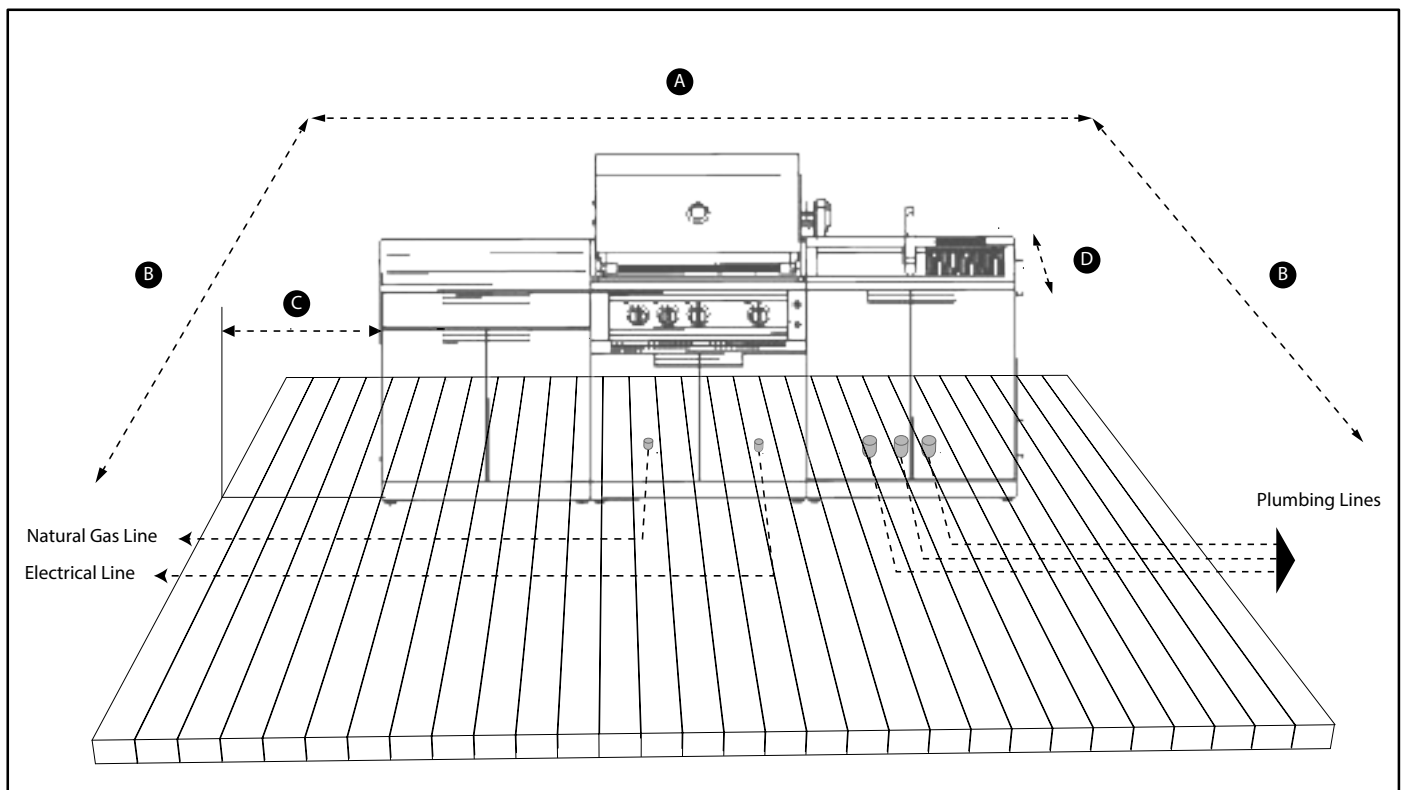

# Outdoor Area Preparation

## STEP 2 : HOW TO UTILIZE YOUR SPACE

- Determine the ideal spot for the appliances and the other cabinet features into the Outdoor Kitchen setup
- Determine how many appliances should be included, along with storage requirements and added features like bar service.

## Measuring and Marking your Space

- Now Use a tape measure and list down the following to help you through the cabinet set installation.
- A. Width of the Outdoor Area to be used.
- B. Depth of the Outdoor Area to be used
- C. Distance of Platform edge to the side of the cabinet (30" or more)
- D. Distance of Platform edge to the back of the cabinets (30" or more)
- It is recommended that the plumbing, natural gas and electrical lines be mounted from the bottom or back of the cabinets as shown below, before assembling the cabinet sets.

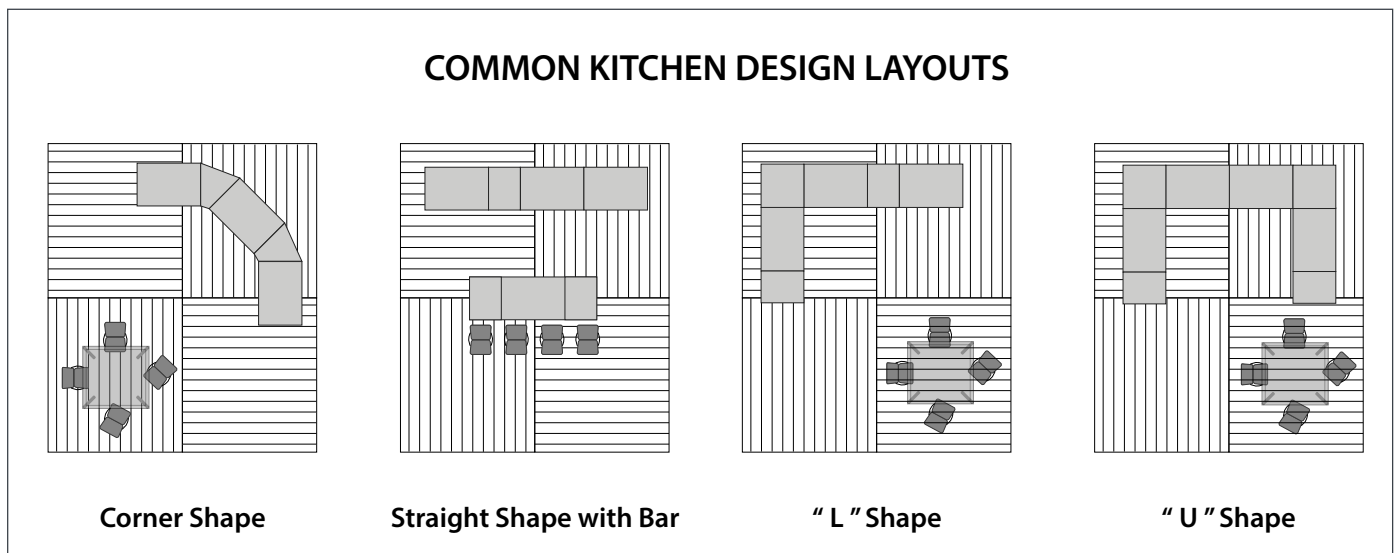

**i NOTE :** To have the exact location of the plumbing access holes in the sink cabinets and the gas/ electrical pass-through holes for the Appliance cabinets, refer to the individual cabinet sections in the manual.

# Outdoor Area Preparation

## STEP 3 : HOW SHOULD YOU DESIGN YOUR OUTDOOR KITCHEN

- Once you've chosen which appliances you want in your outdoor kitchen, it's time to consider how each appliance and cabinet will fit within the greater design scheme—how much room to allow for each, and how they will 'flow' into each other.
- You may have heard of the "golden triangle" rule of kitchen design, designing an outdoor kitchen is no exception. The close proximity of sink, grill and prep station is key for effective food preparation and service.

### Preparing your Outdoor Area as per your Cabinet Layout

- While preparing your cabinet layout ensure the plumbing, gas and electrical pipelines are laid as per the regional certifications and ensure it is done with professional help.
- Once you have finalized on the cabinet set layout, assemble the cabinets as per detail instructions given in the following pages to ensure a smooth process throughout the activity.
- Cabinets must be installed on a leveled surface. Levelling Legs are provided to provide adjustments between the high and low spots in the installations but are not intended to be installed on a non-level surface.
- Take note of existing Gas/electrical/plumbing access in relation to your planned installation.
- Take note of existing access holes on the cabinets for ease of installation.

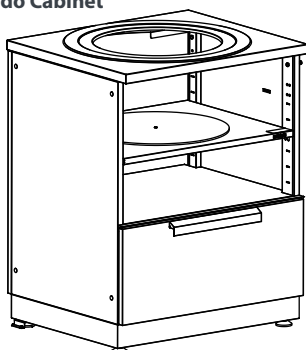

# Installing Anti-Tipping Brackets

**i** For increased safety, especially with individual cabinets, always install an anti-tipping bracket.

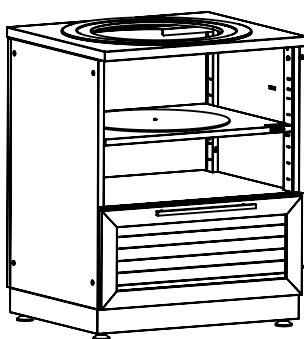

Ensure area is leveled and install the anti-tipping brackets

**i NOTE:** The following instructions apply to the cabinets below

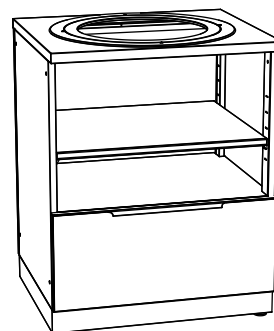

28" Kamado Cabinet

SKU# 70006  
SKU# 70310

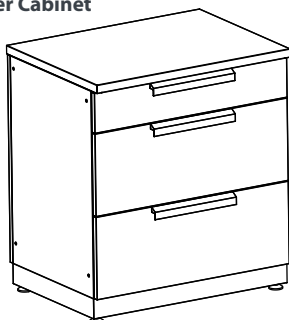

SKU# 70106

SKU# 65626

SKU# 65629  
SKU# 65593

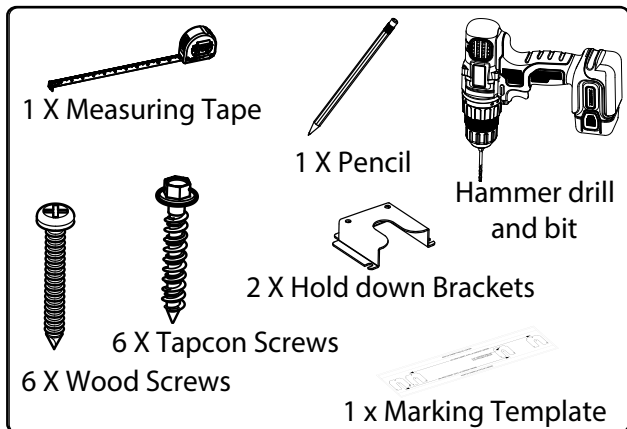

Serious or fatal crushing injuries can occur from furniture tip over. To prevent tip over, this furniture must be used with the anti-tipping brackets provided. Open one drawer at a time.

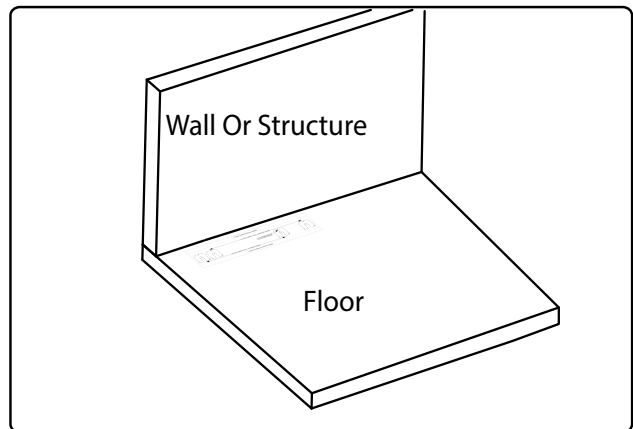

# Installing Anti-Tipping Brackets

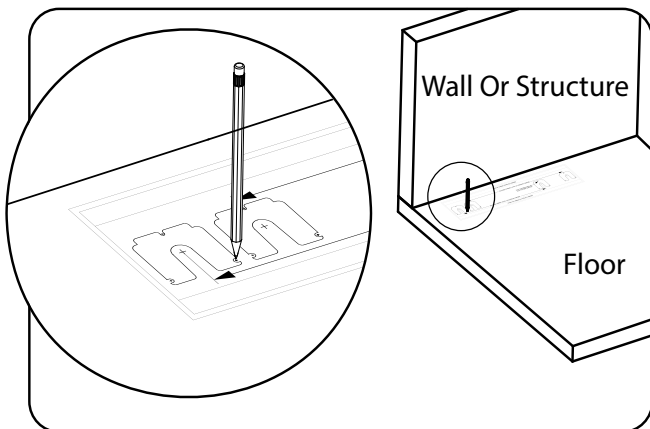

## Parts Needed

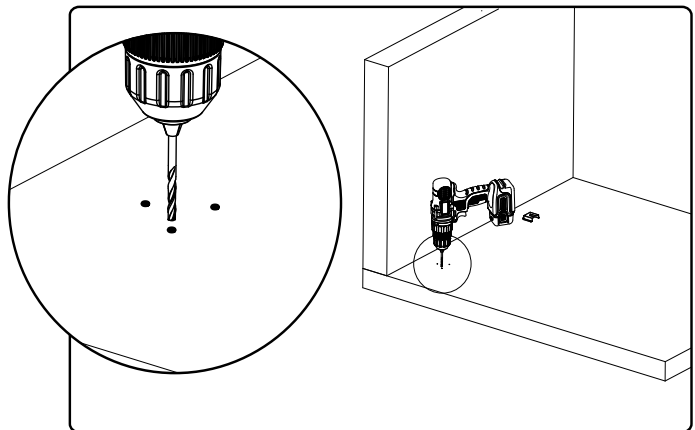

**1** Position the Marking Template, where the 2 x rear feet of the cabinet should be installed.

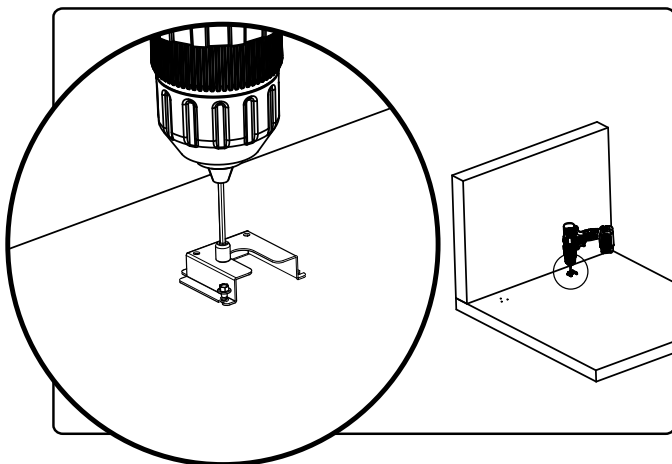

**2** Mark 6 drill locations using template to place brackets.

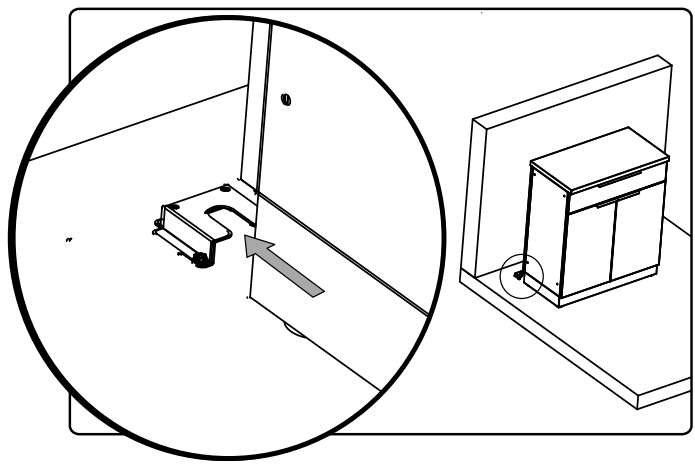

**3** Drill floor in marked positions with M3.5 drill bit for concrete.

**4** Fasten each Anti-Tipping Bracket with 3x Tapcons into concrete surfaces or 3x wood screws for wood surfaces.

**5** Slide cabinet into the Anti-Tipping Brackets until both rear feet are engaged.

# Installing the Wall Cabinets

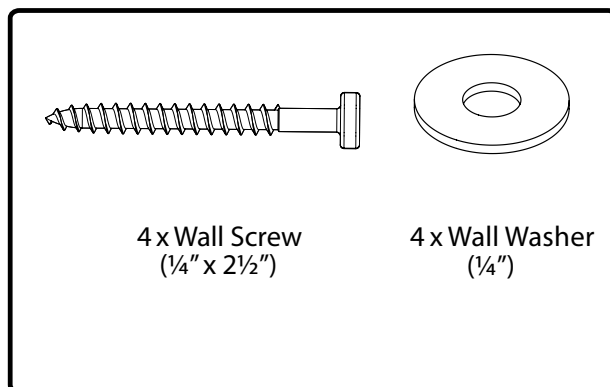

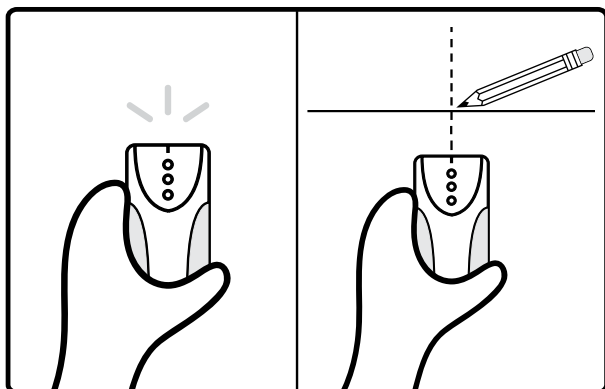

## Securing Cabinets on Studded Wall

Use stud finder to locate the studs and mark a line on the wall with a pencil at desired height.

Parts Needed

1

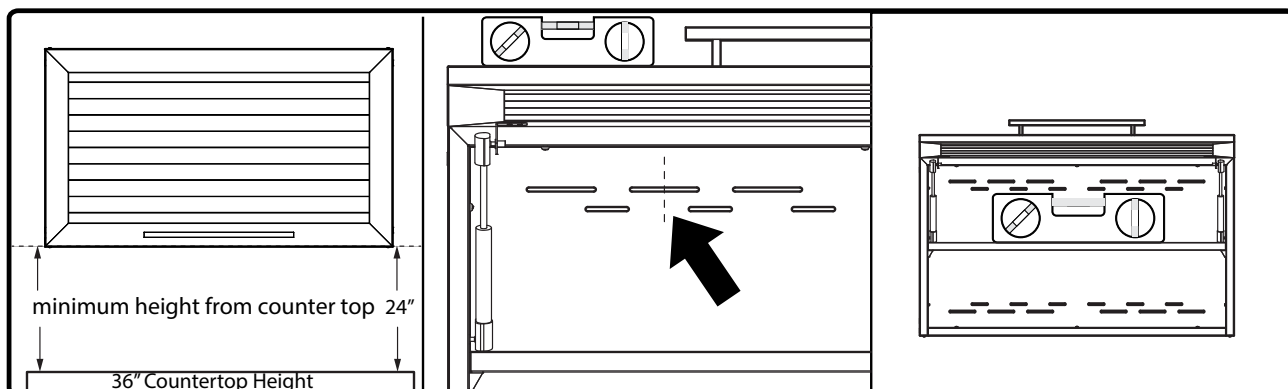

Place cabinet tight against the wall.

2

Align cabinet to stud marks.

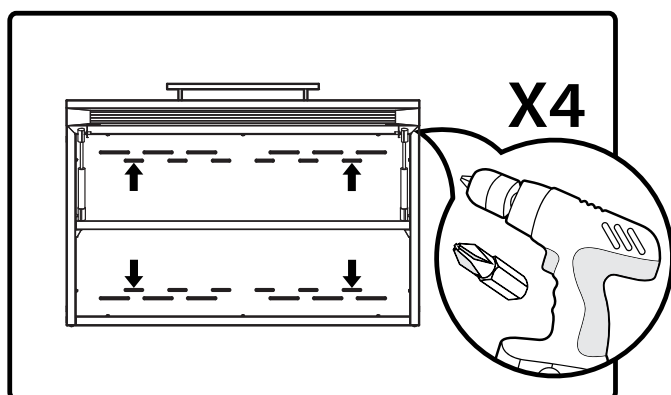

3

Level cabinet.

4

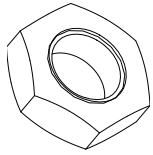

Pre-drill (4)  $\frac{1}{4}$ " (6.5mm) then drill 4 wall screws and washers through perforated holes into studs.

# Installing the Wall Cabinets

## Fastening Cabinets(to each other)

### **i** Parts Needed.

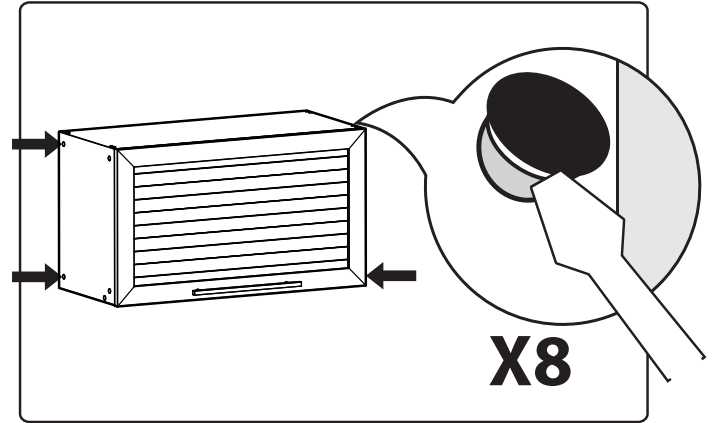

4 X Hex Nut(M6)

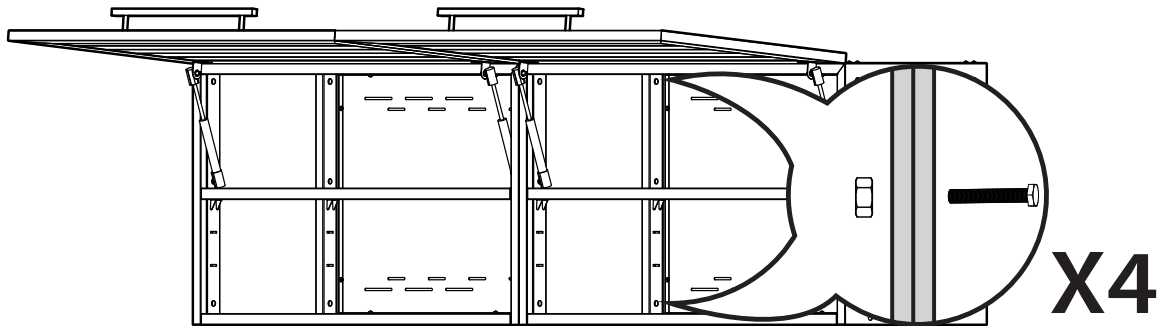

4 X Hex Bolt  
(M6 x 50mm)

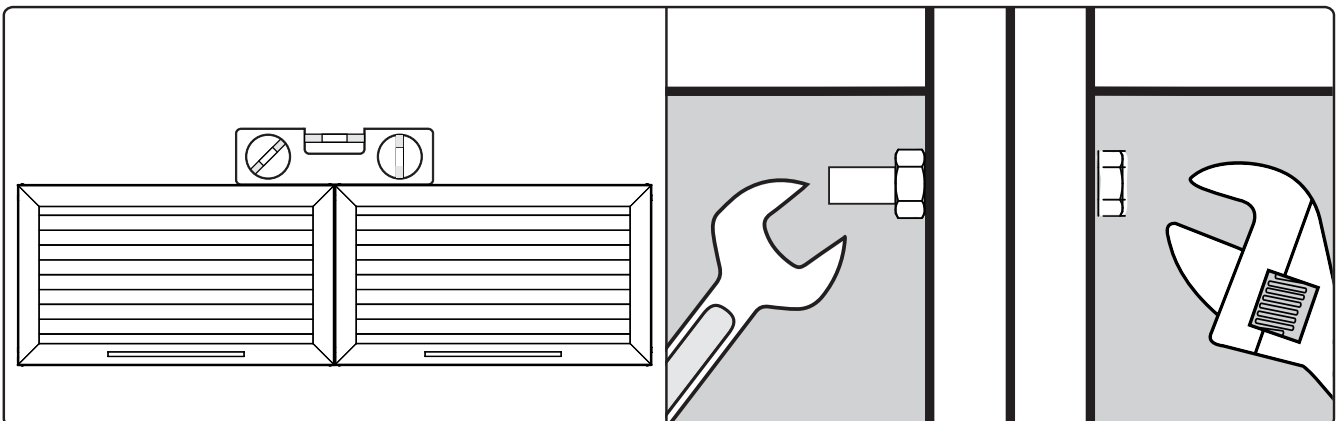

### **1** Remove plastic caps from cabinets.

### **2** Align bolts, tighten lightly.

### **3** Level cabinets and tighten all bolts.

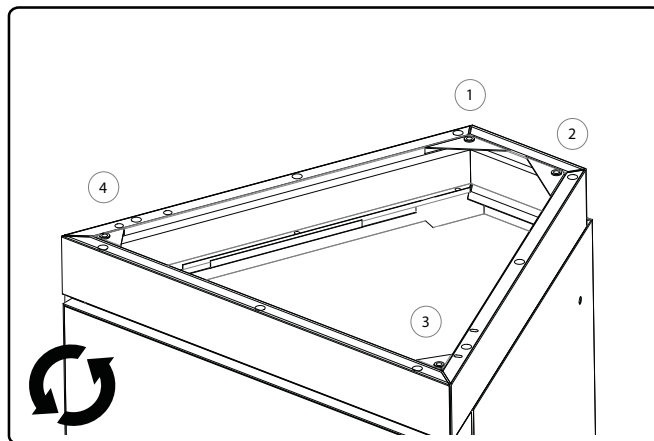

# Installing the Legs

## **i** Parts Needed.

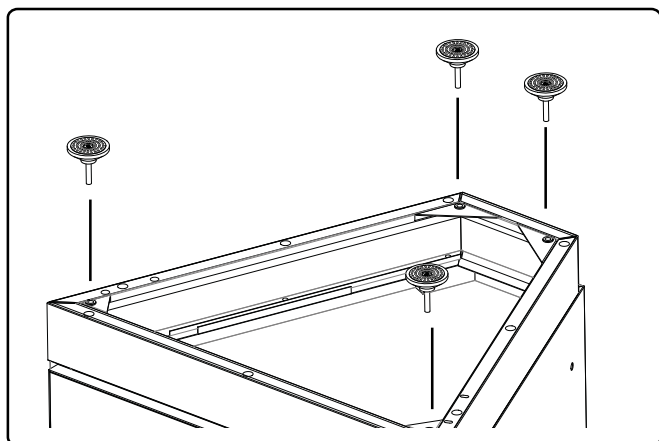

4 x Height-Adjustable Levelers

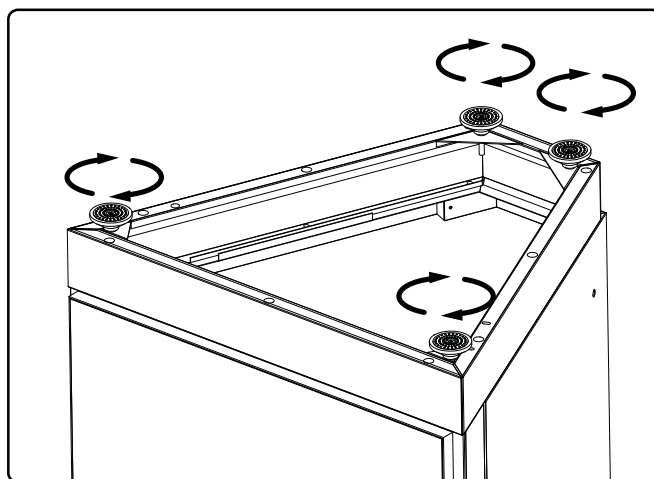

## **1** Flip cabinet upside down, locate corner leveler brackets.

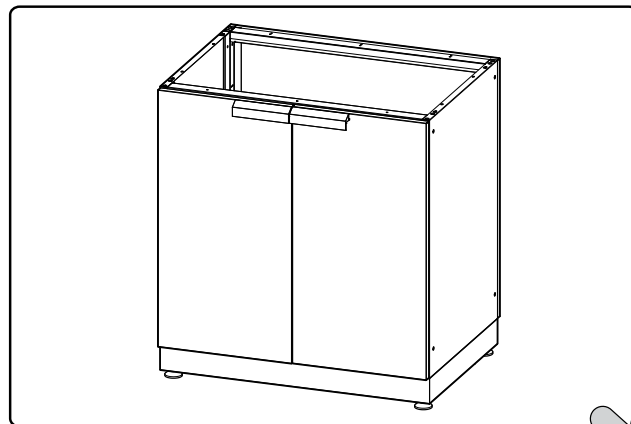

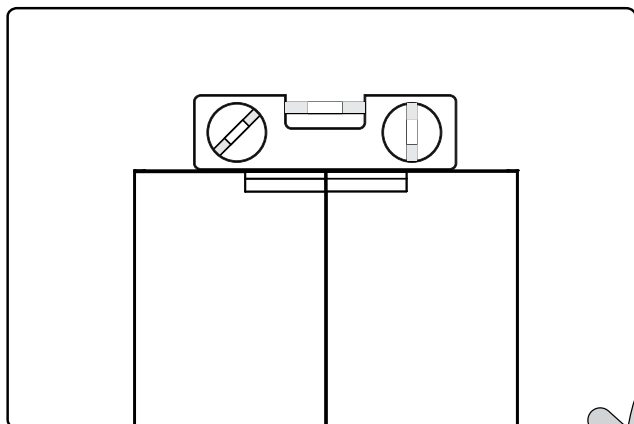

## **2** Align levelers with insert nuts in corner brackets.

## **3** Rotate clockwise to tighten each leveler.

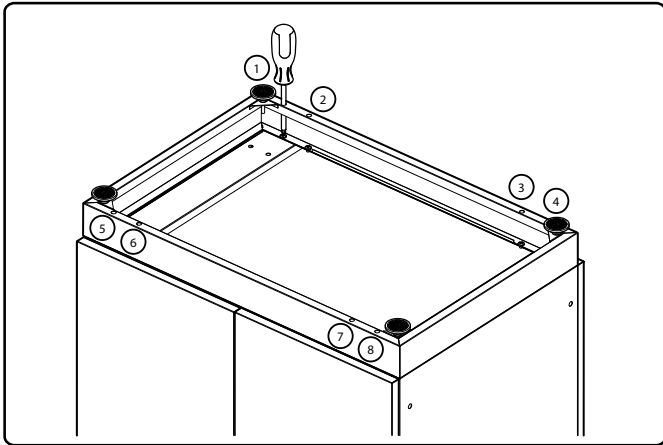

## **4** Flip over Cabinet and level the Cabinet by adjusting the leveler.

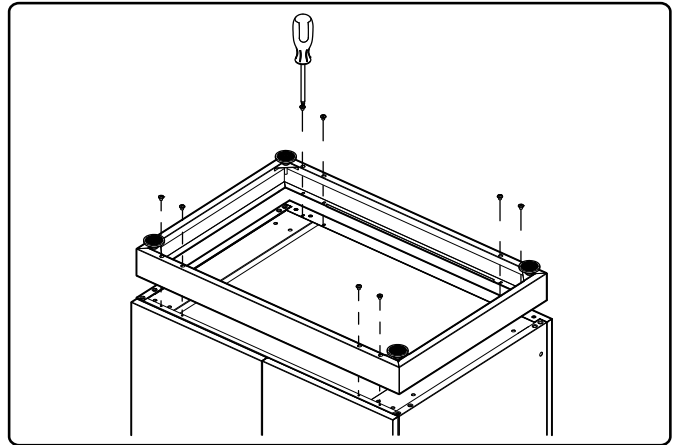

**i NOTE:** Make sure the left and right doors are in level, if not adjust the levelers.

# Installing Casters

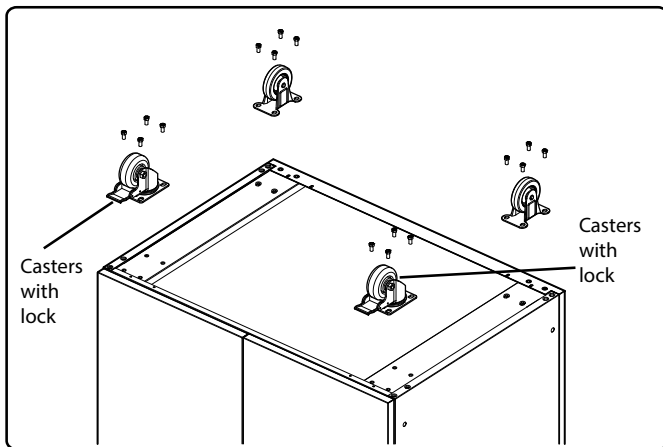

- 1** Remove (8x) M4 bolts in locations with phillips screw driver accessed through holes in kick

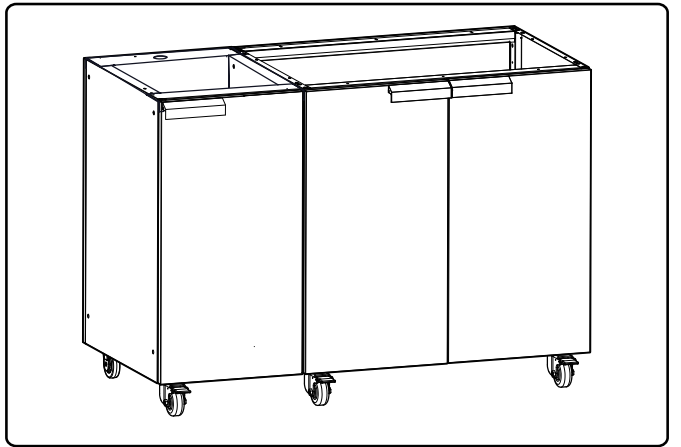

- 2** Remove kick and store with hardware for future configuration considerations.

- 3** Place caster plate over 4 rivet nuts in 4 corner locations install/tighten (16x) 1/4" x 1/2" bolts. Can be installed with socket or Phillips driver.

- 4** Rotate cabinet until all 4 casters are resting on the ground.

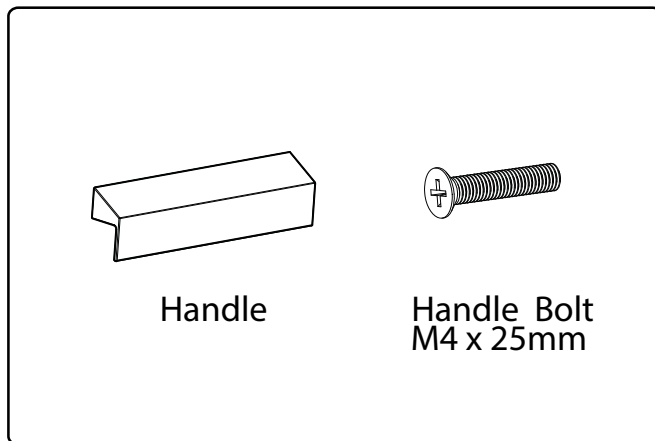

## NOTE:

- Dual Side Burner cabinet and 16in cabinets with casters can only be used when attached to other cabinets. Only two casters are required for the 16in and Dual side burner cabinets when attached to other cabinets.
- Locking casters should always be placed at the front corners of the cabinet set.
- Only 2 locking casters are required for any cabinet set and should be installed at the front-left and front-right end of the attached set. All other locations should be installed with non-locking casters.
- All individual cabinets should not be installed with casters. There should be a minimum of two cabinets installed in order to add casters. Remember to always open only one drawer at a time and keep heavy items to the bottom drawer.

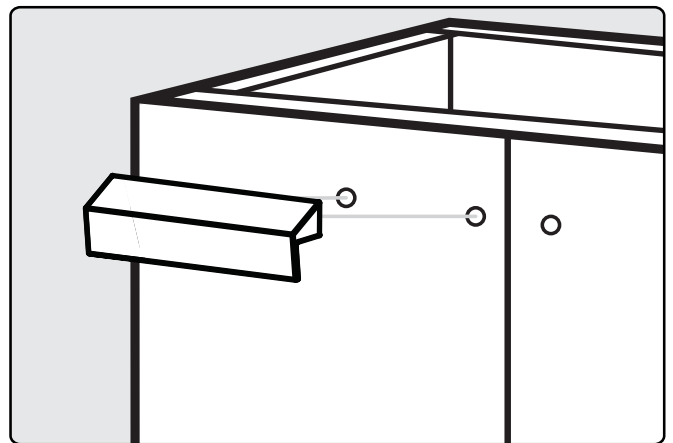

# Installing the Handles

## Cabinet Door & Drawer Handles

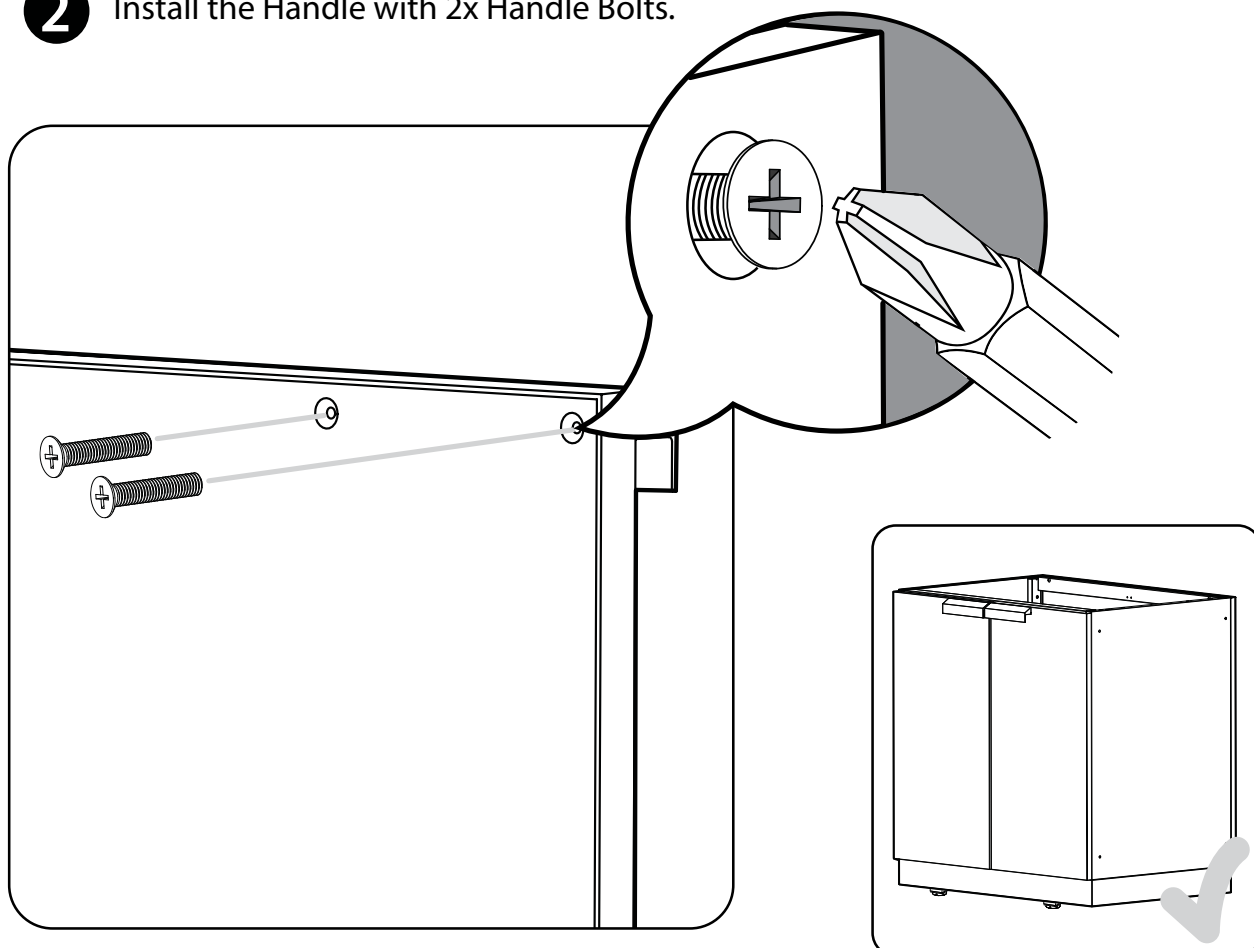

### Parts Needed

### **1** Align handle to holes

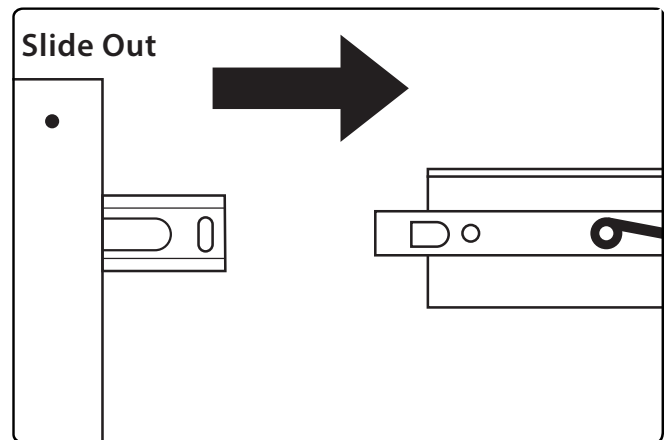

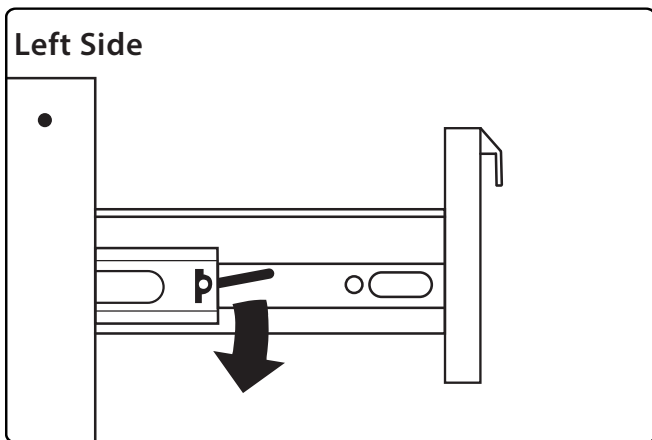

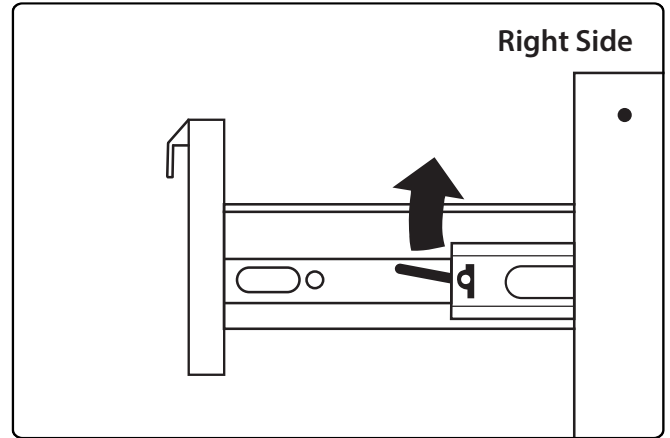

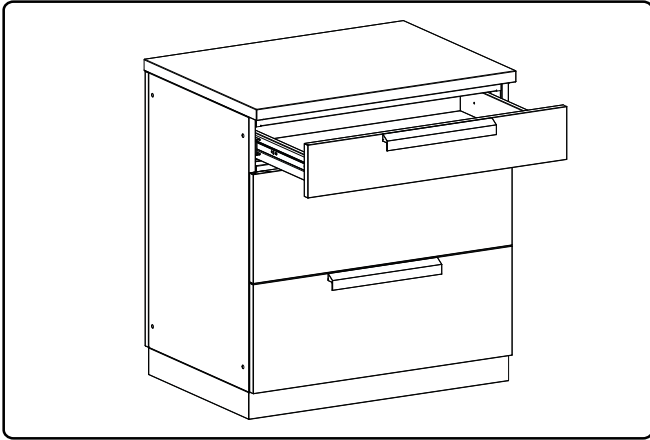

### **2** Install the Handle with 2x Handle Bolts.

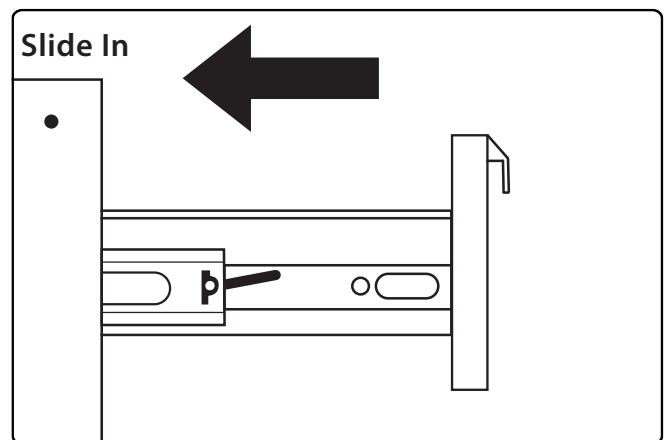

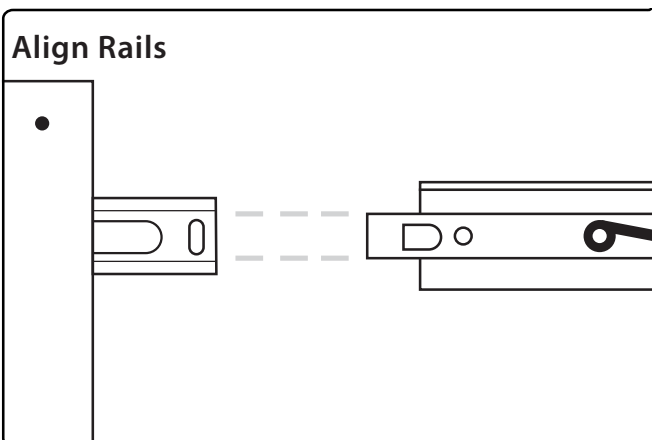

# Installing/Removing the Drawers

## Removing Drawers

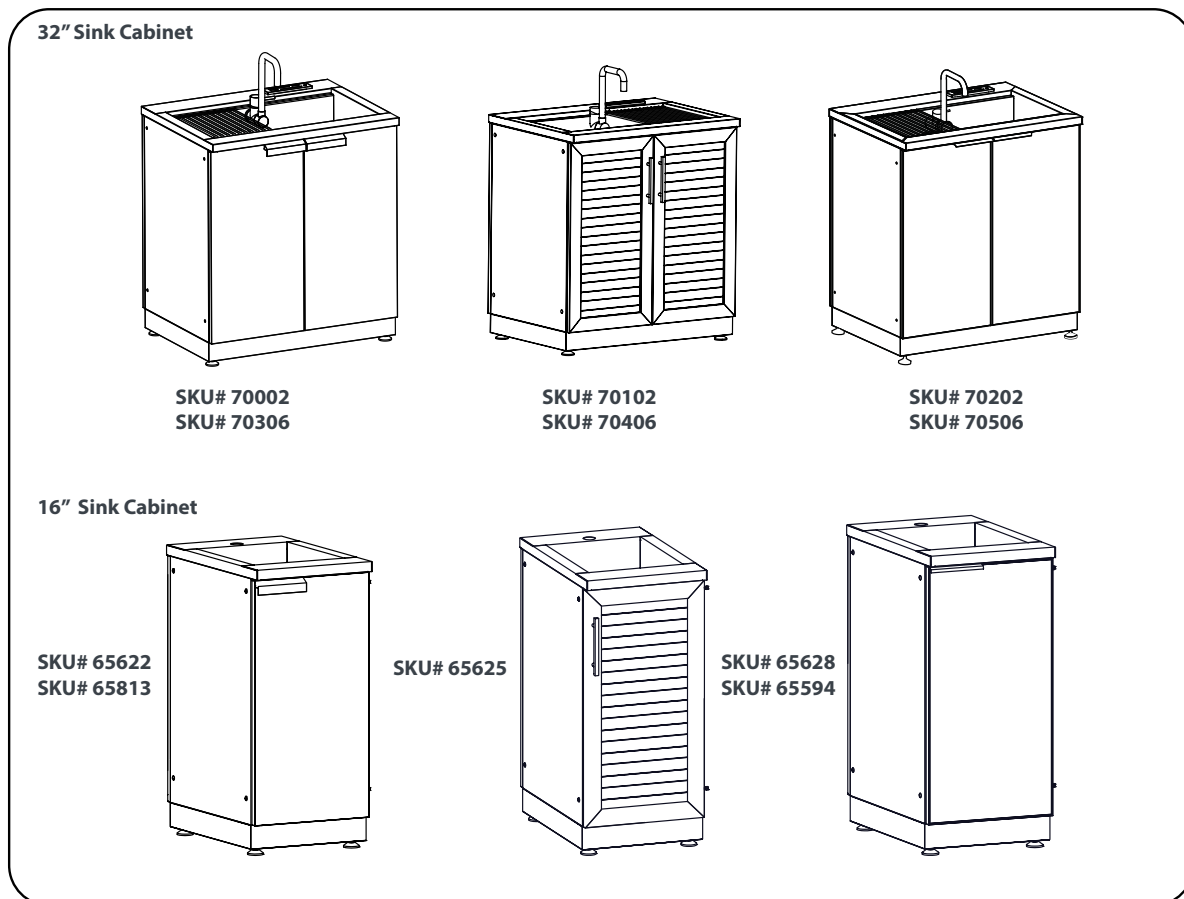

## Inserting Drawers

# Preparing the Sink Cabinets

**i NOTE:** The following instructions apply to the cabinets below

**i NOTE:** Make sure the plumbing work is done as per the Building codes of the region.

**i NOTE:** It is recommended to have a certified plumber for installing the sink Cabinets.

## WARNING

Drain your faucet before winter to prevent frozen pipes and potential damage. Freezing temperatures during winter can lead to the expansion of water within the pipes, causing them to crack or burst. To safeguard against such issues, draining the faucet is a vital preventative measure to mitigate the risk of costly damage and ensure the longevity of your plumbing system.

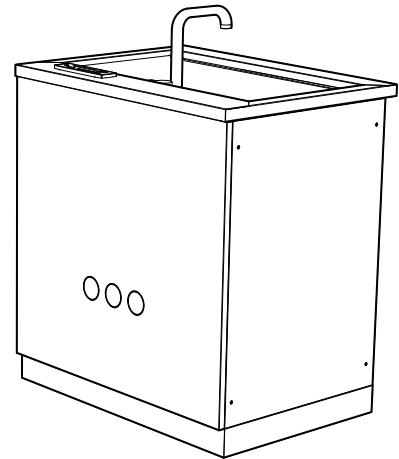

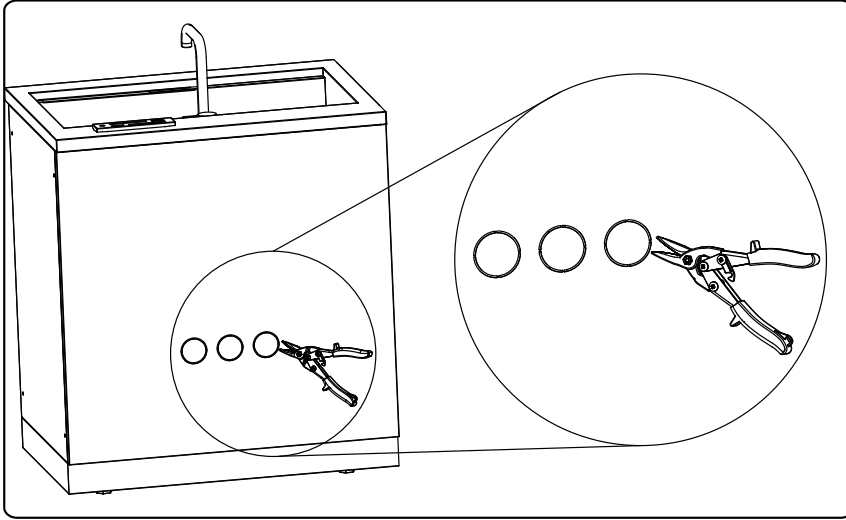

## How To Winterize An Outdoor Faucet

- Make sure to close the water supply to the faucet.
  - If you have a hose attached to the faucet, disconnect it and take off the spray nozzle. Drain the hose thoroughly and coil it neatly.
  - Open the drainage port.
  - Drain out the water.
- For an outdoor faucet without an indoor drainage port, drain out any remaining water by simply turning on the tap. Once all the water has drained onto the ground, turn off the faucet.
- Insulate or cover the faucet.

# Preparing the Sink Cabinets

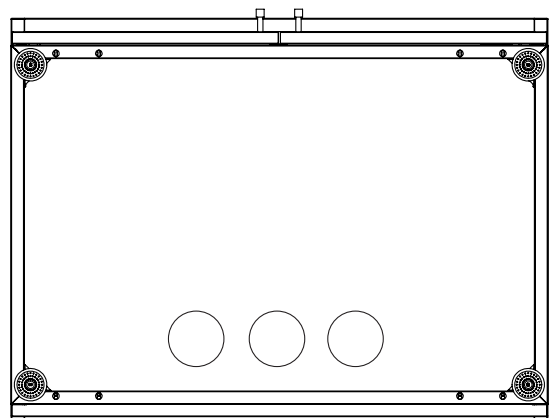

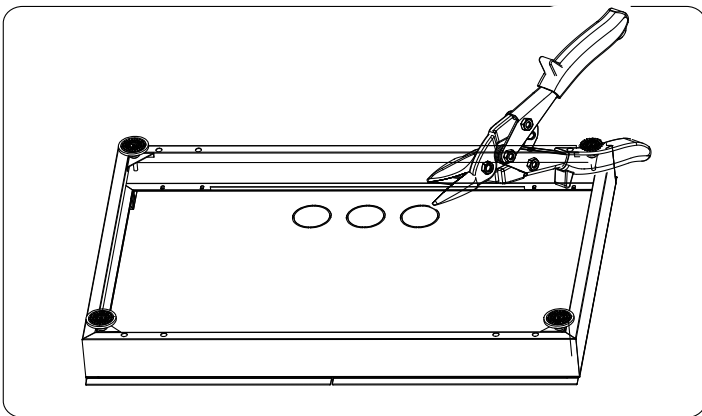

**i** Make sure the plumbing line (Cold/Hot water lines and drain pipe) are located underneath or behind the back wall of the cabinet, aligned with the three pre-slotted holes at the bottom of the cabinet. Follow Steps 1a or 1b as per the location of the plumbing lines.

**1a** Locate the 3 pre-slotted holes at the back wall of the cabinet for the plumbing lines. Using tin snips cut small webs to release the knockouts.

Back view of Sink Cabinet

**1b** Locate the 3 pre-slotted holes at the bottom of the cabinet for the plumbing lines. Using tin snips cut small webs to release the knockouts.

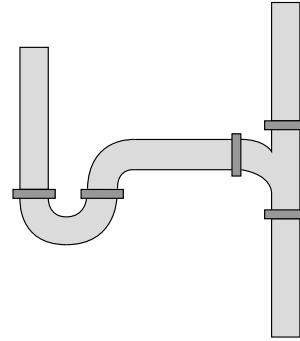

Bottom view of Sink Cabinet

# Preparing the Sink Cabinets

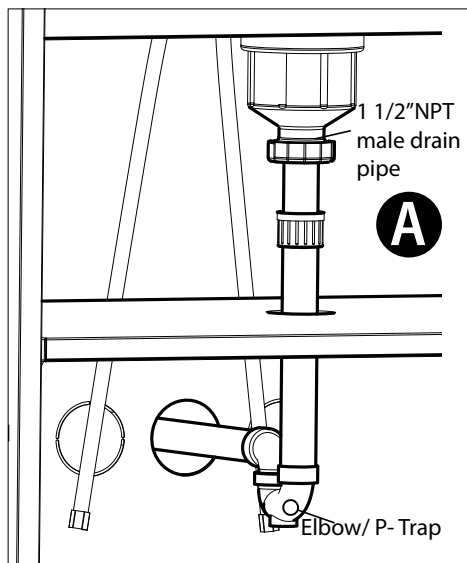

Make sure to apply the latest plumbing standards and requirements of your regional building codes. The P-Trap drainage is recommended for the plumbing. It is recommended to have a certified plumber for installing the sink Cabinets

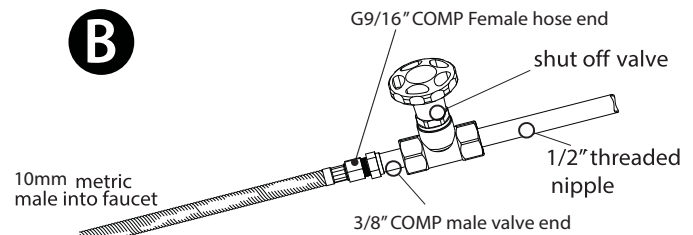

**P-Trap**

**3**

Connect the drain trap adapter to a P-trap and drainage tubing (A). Connect the braided water inlet lines hot and cold to the supply lines(B).

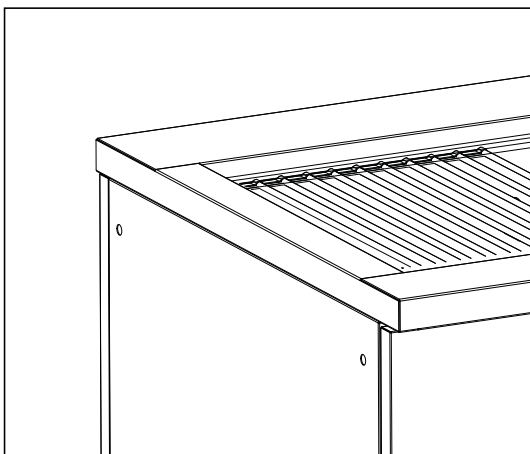

**B**

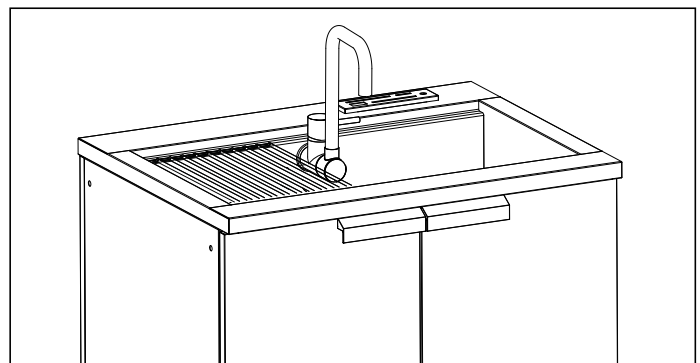

**4**

Place the drying tray on the surface of the sink

**5**

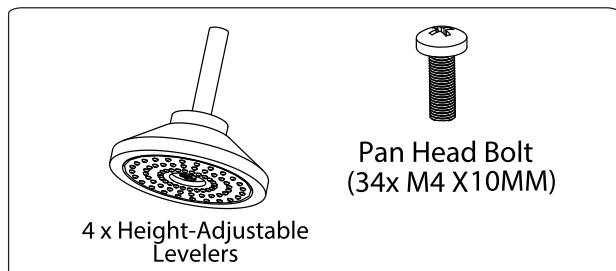

The faucet is pre-installed into the cabinet. The head is folded sideways inside the packaging. Unfold it upwards to restore its position.

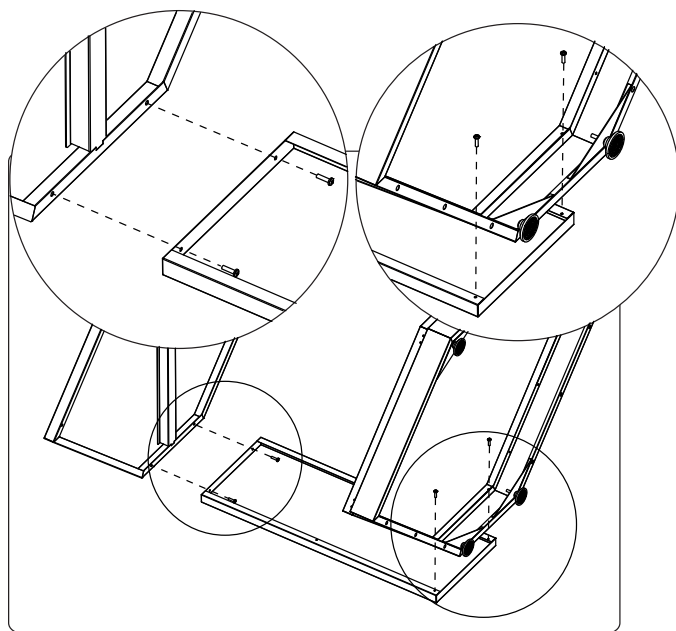

# Assembling the 90° Corner Cabinet

## Frame Assembly

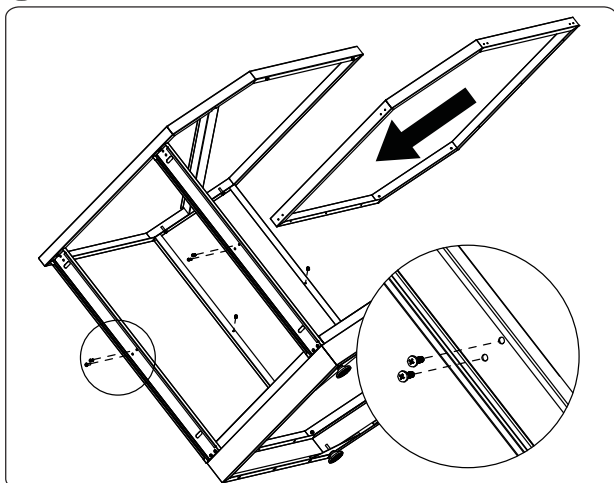

### Parts Needed

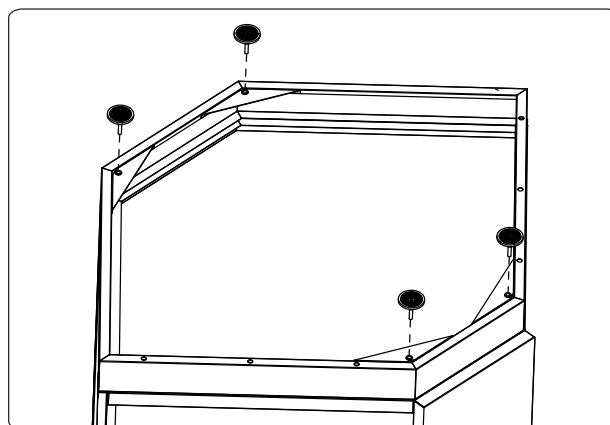

### **2** Attach Top, Back Panel and Base 2 with 4 X M4 x 10mm pan head bolts.

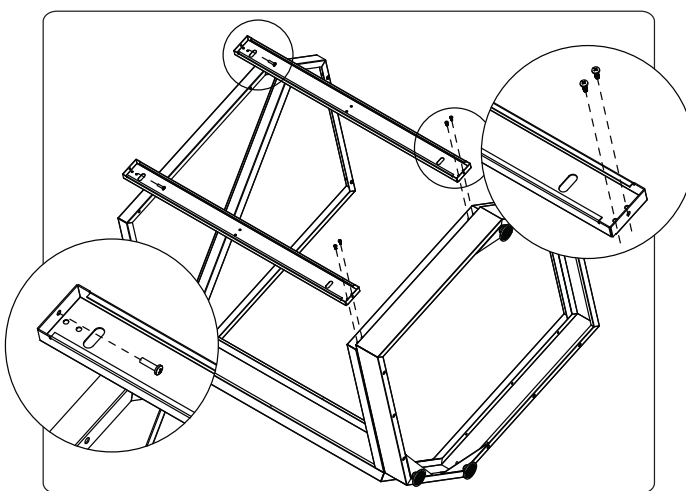

### **4** Attach shelf to vertical supports using 4X M4 X 10MM Pan Head Bolts.

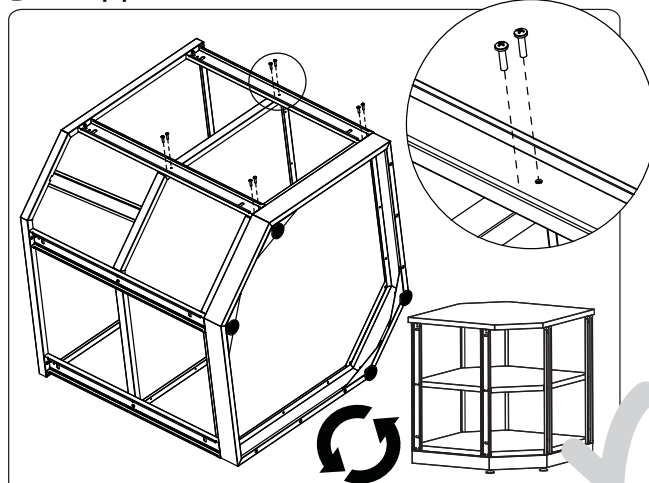

### **1** Attach 4 Levelers to 4 corner brackets with insert nuts.

### **3** Attach 2 uprights to assembly using 4x M4 x 10mm pan head bolts

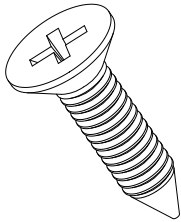

### **5** Repeat step 4 for 2 more vertical supports.

# Assembling the 90° Corner Cabinet

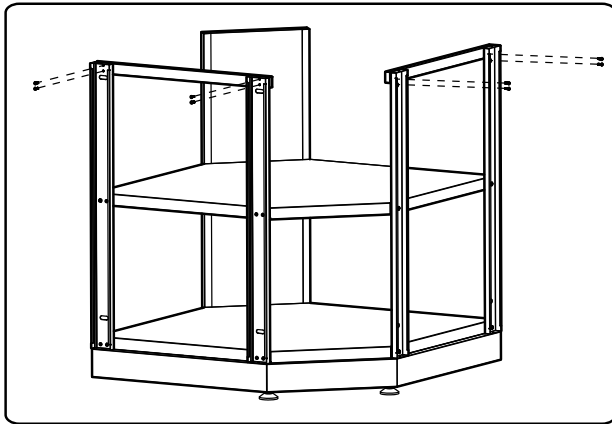

## Frame Assembly for Granite Top

### Parts Needed

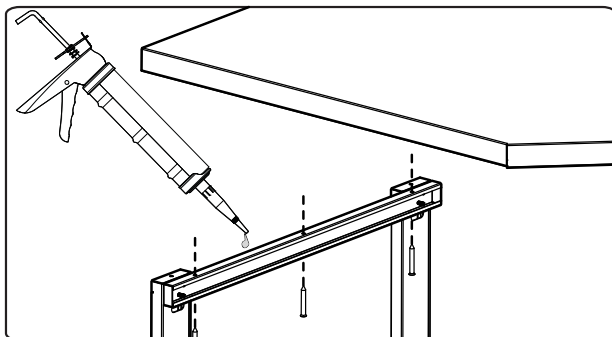

6 x Flat Head Wood  
Screw  
(ST 4.2-16 mm)

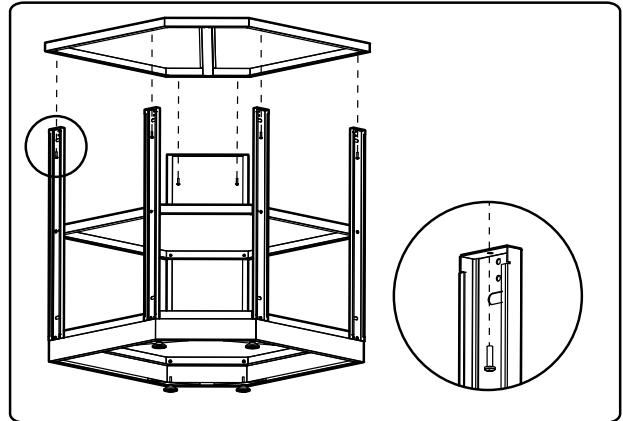

- 2** Attach 2 included Granite rails using 4 x M4 X 10MM pan head bolts at top of supports.

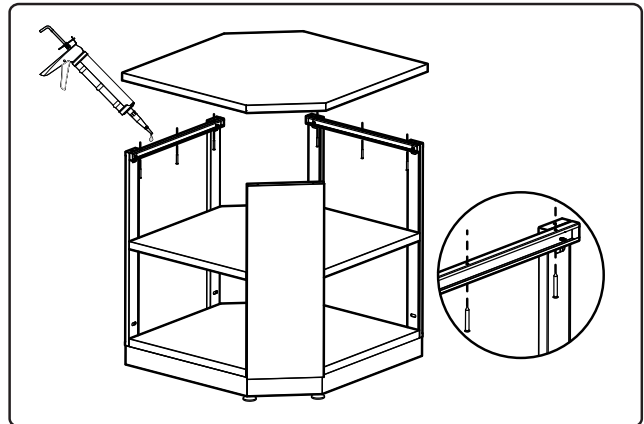

- 4** Add silicone using 8 small dabs to hold top in place. Wipe up any extra silicone that seeps out during installation.

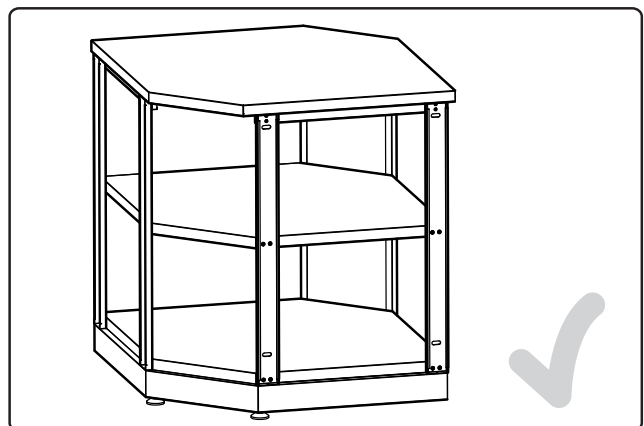

- 1** Undo Stainless Steel Top by removing 6 x Pan head M4 X 10MM bolts

- 3** Attach Granite corner top with 6 x ST 4.2-16 mm flat Head wood screws into Outdoor plywood granite backer.

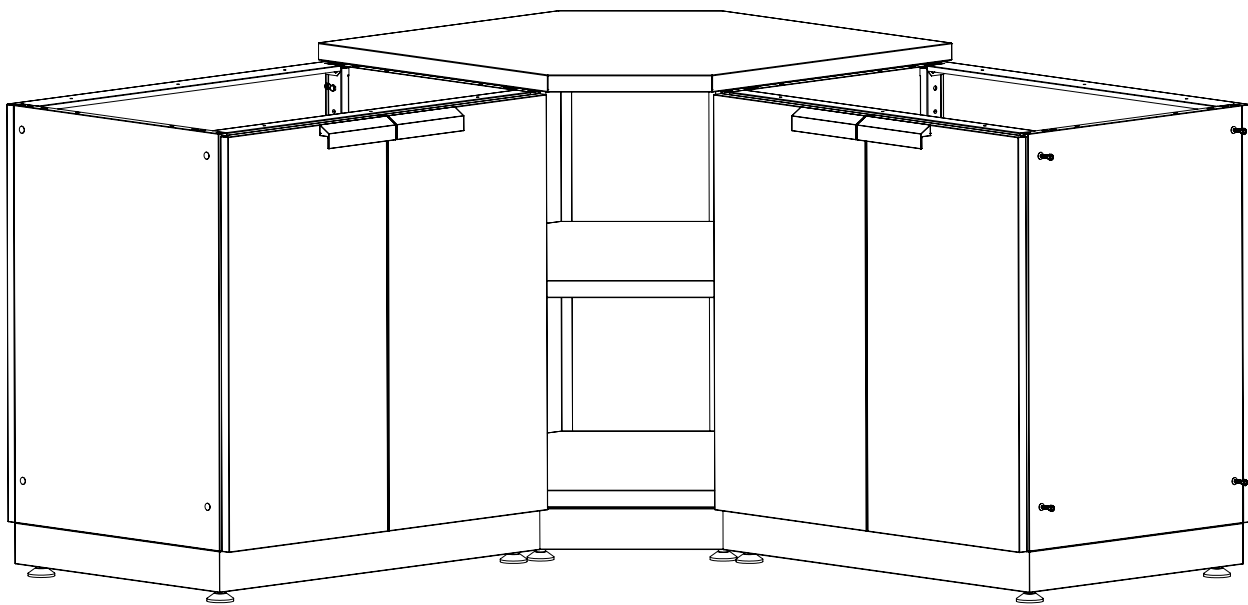

- 5** Undo Stainless Steel Top by removing 6 x Pan head M4 X 10MM bolts

# Creating the 90° Corner

---

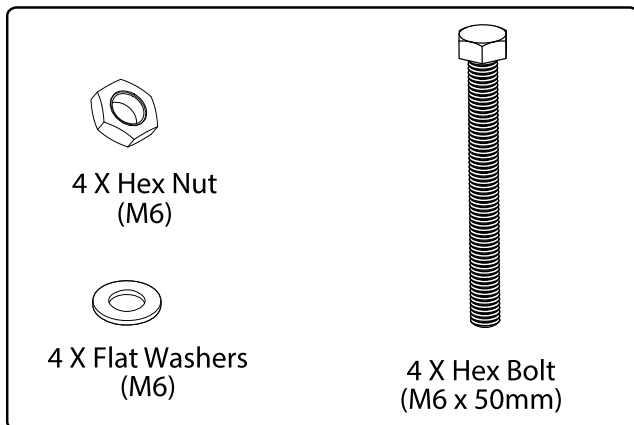

90° Corner Cabinet

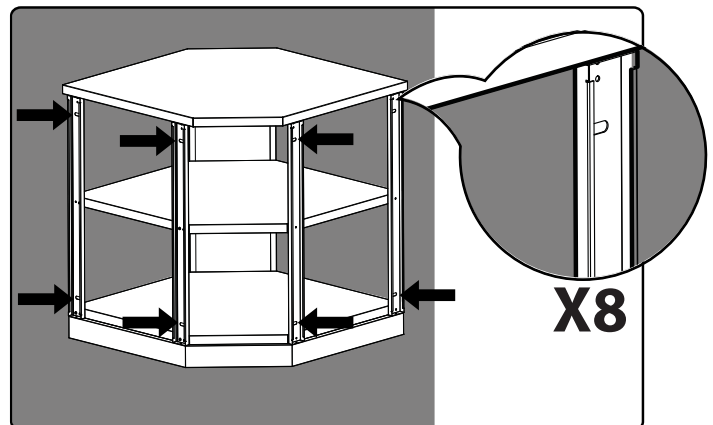

# Creating the 90° Corner

## Fastening the cabinets

### Parts Needed

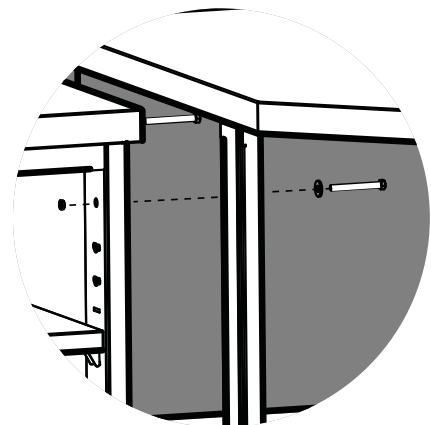

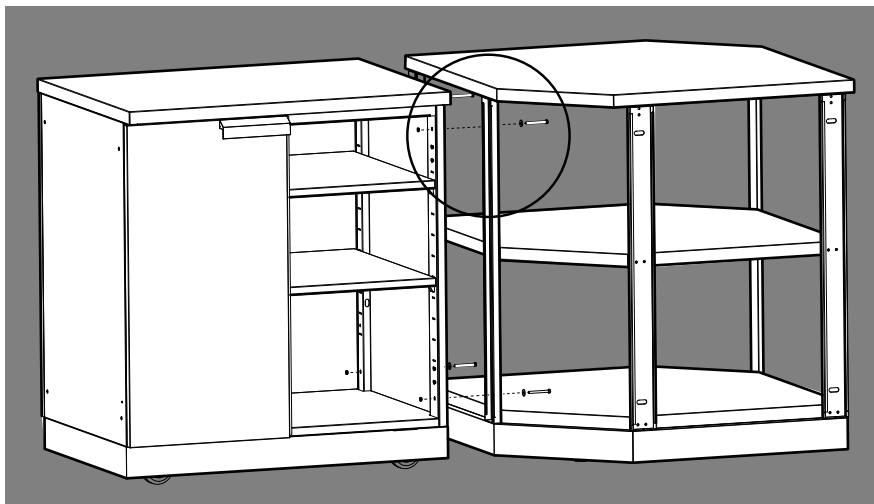

### **1** Locate bolt slots on upright supports.

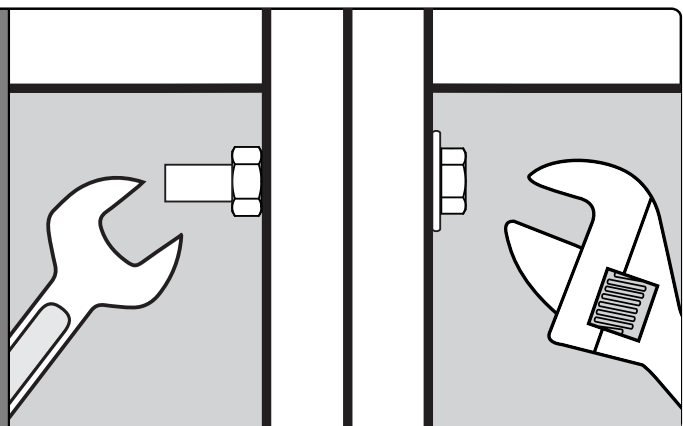

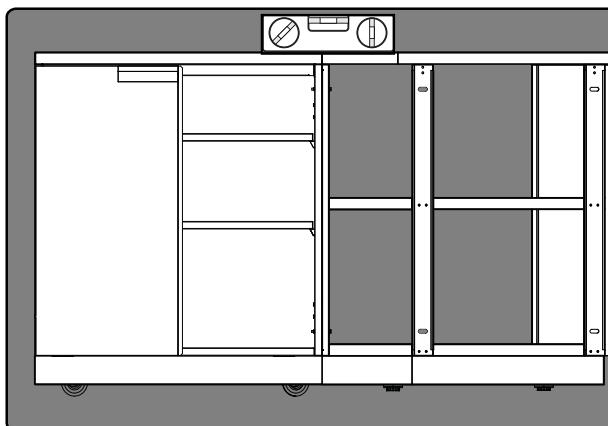

\*\*\* Door removed for ease of explanation \*\*\*

### **2** Align hole locations, put bolt and washer through holes and then tighten the nut lightly.

**X4**

### **3** Level cabinets and tighten all bolts.

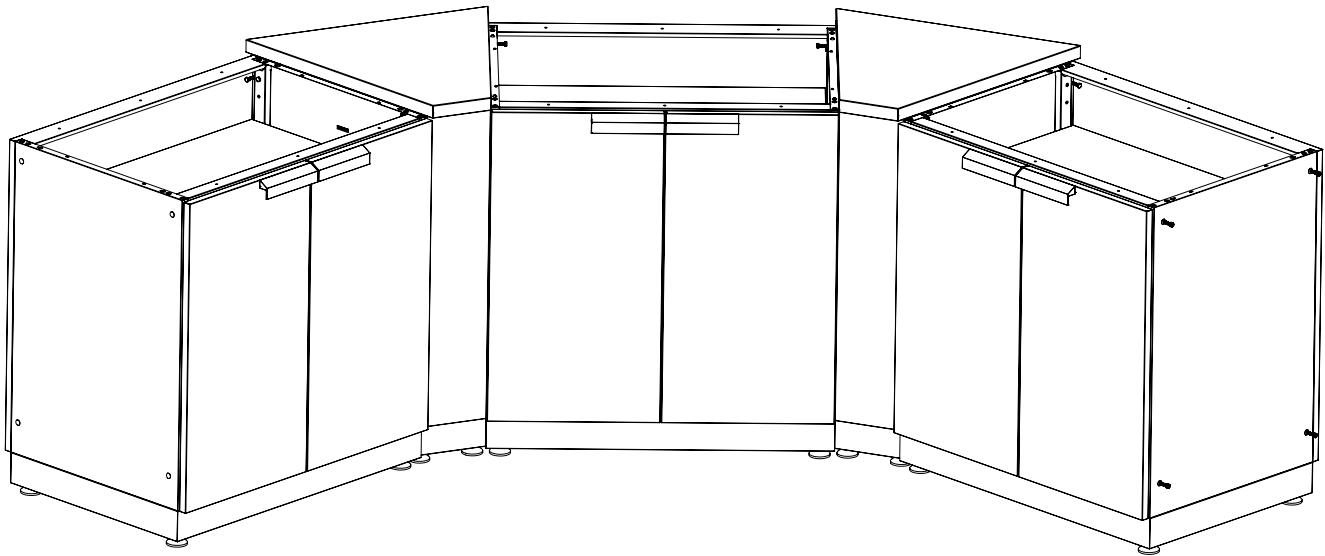

# Creating the 45° Corner

---

45° Corner Cabinet

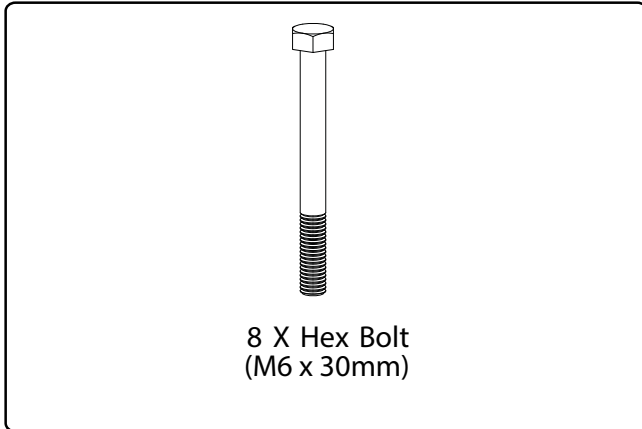

45° Corner Cabinet

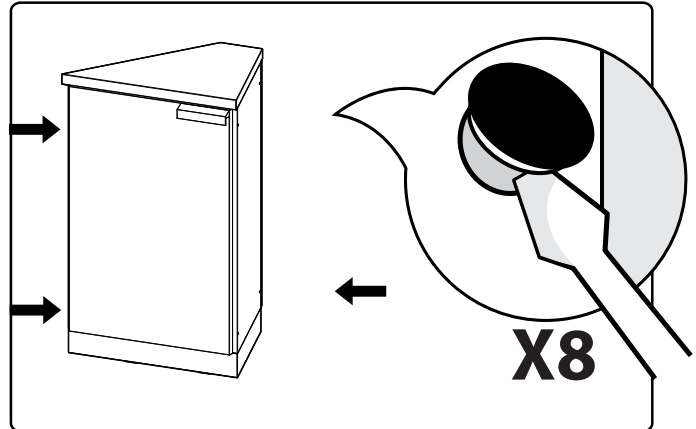

# Creating the 45° Corner

## Fastening the cabinets

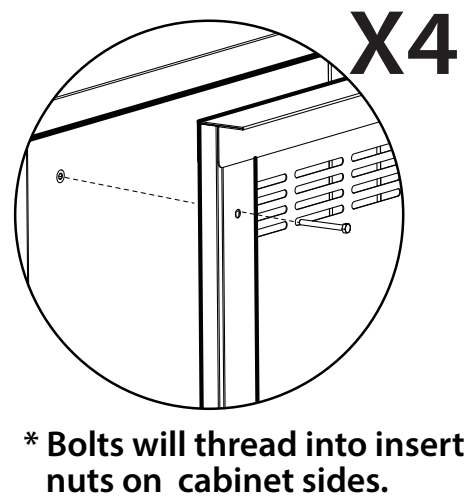

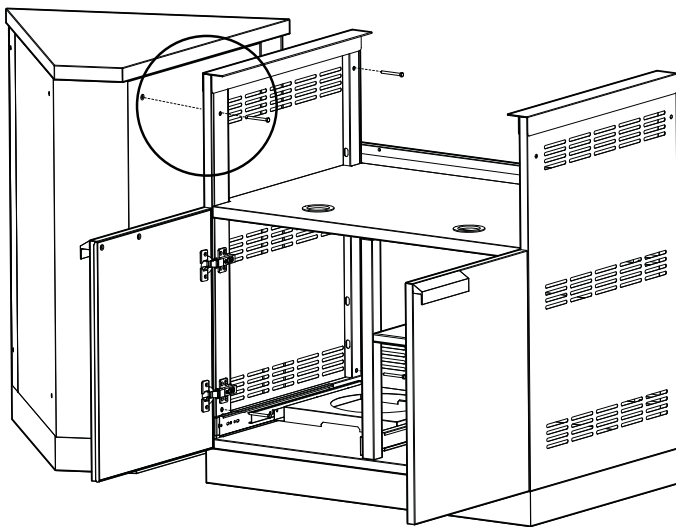

### Parts Needed

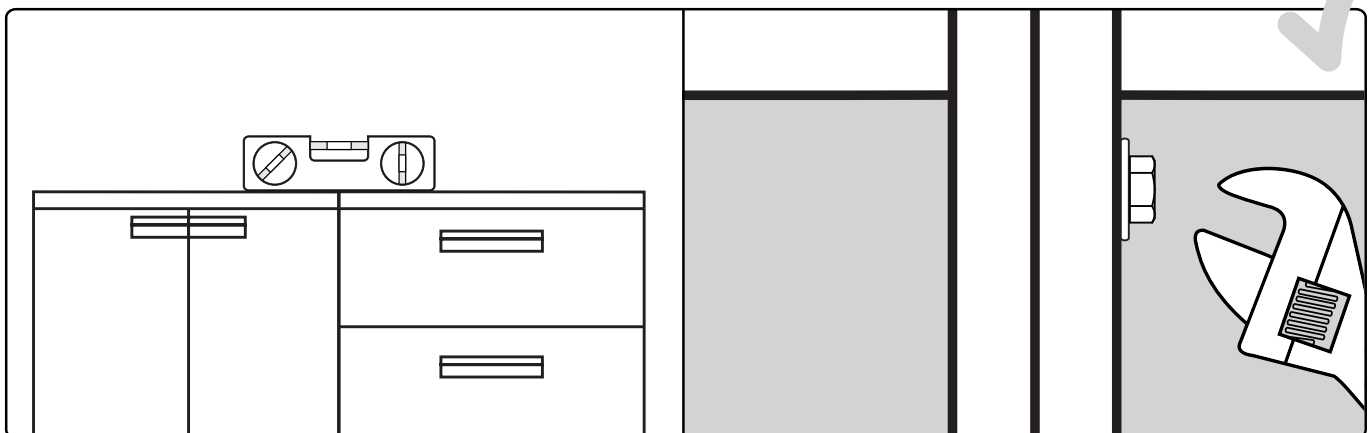

### **1** Remove plastic caps from the cabinet if installed.

### **2** Align bolts, tighten lightly.

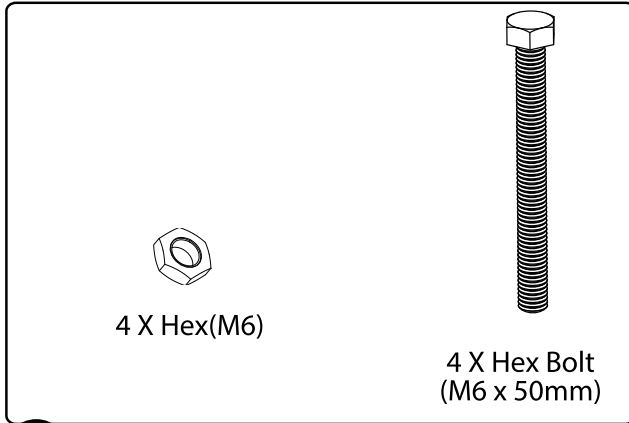

### **3** Level cabinets and tighten all bolts.

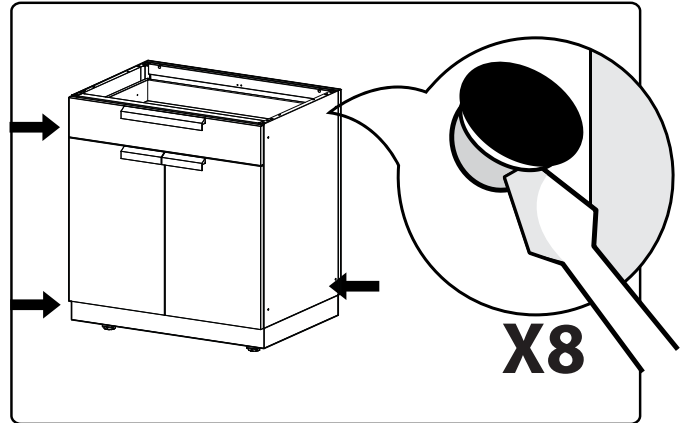

# Attaching the Cabinets

## Connecting the cabinets together

### Parts Needed

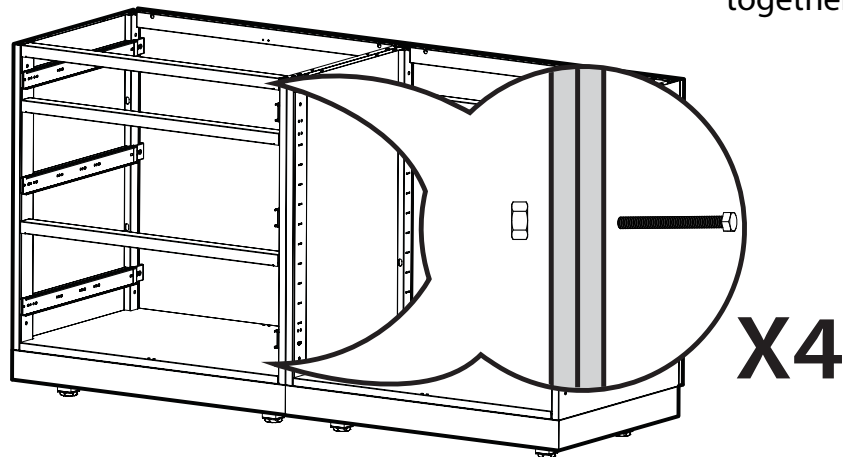

### **1** Remove plastic caps from the cabinets

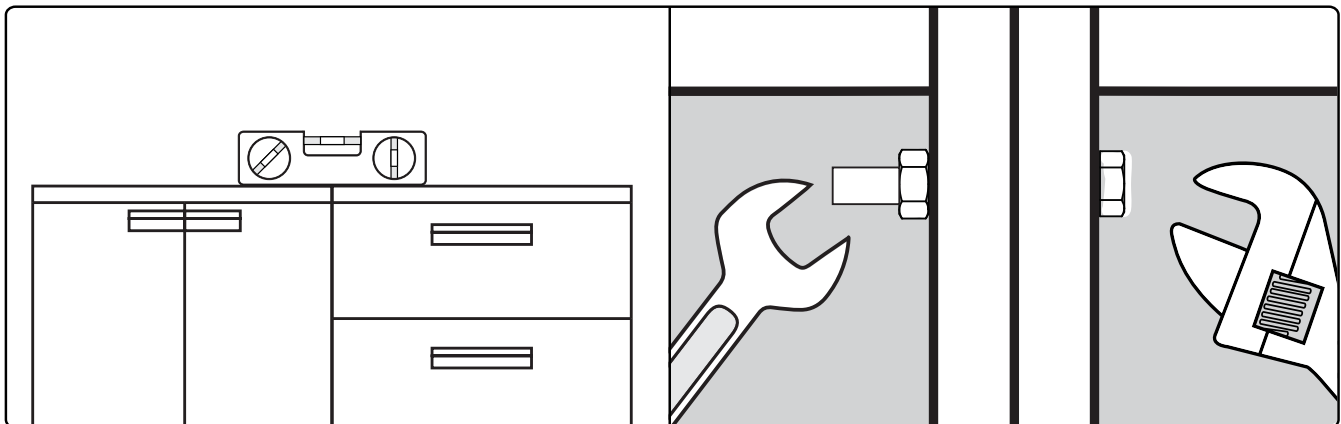

### **2** Align bolts, and tighten lightly.

**NOTE:** All drawers must be removed prior to fastening cabinets together.

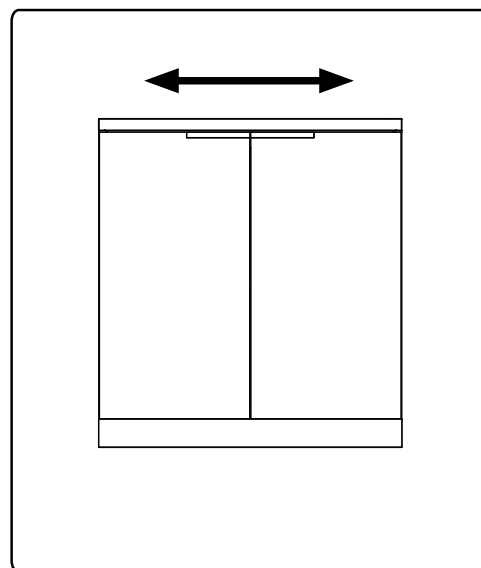

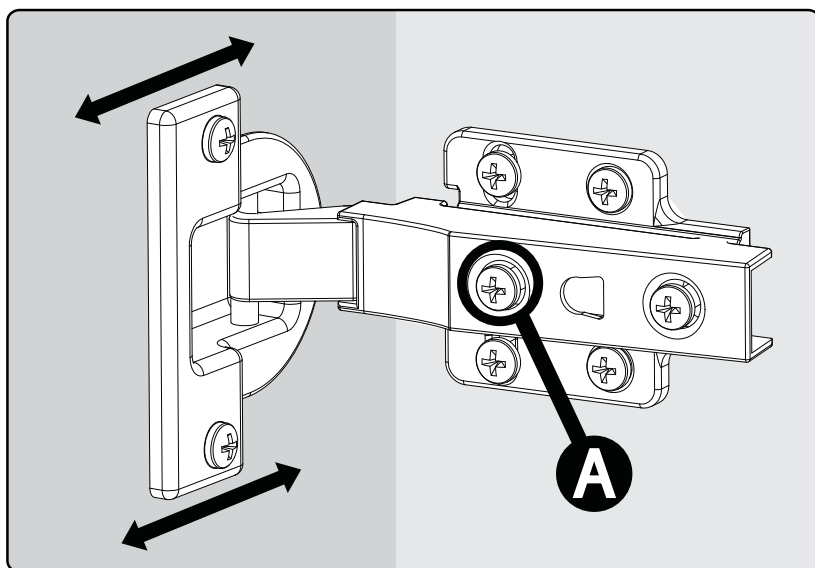

### **3** Level cabinets individually.

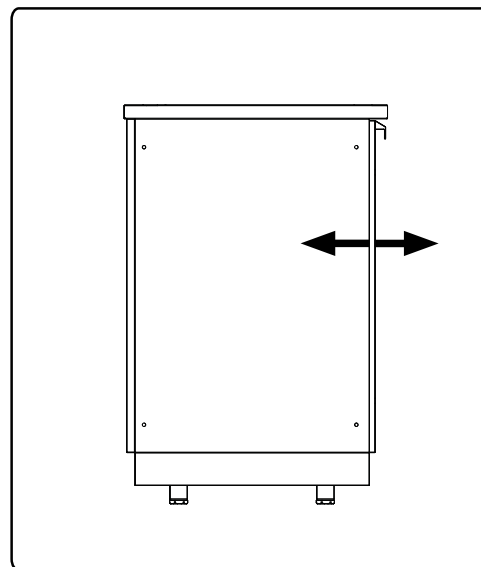

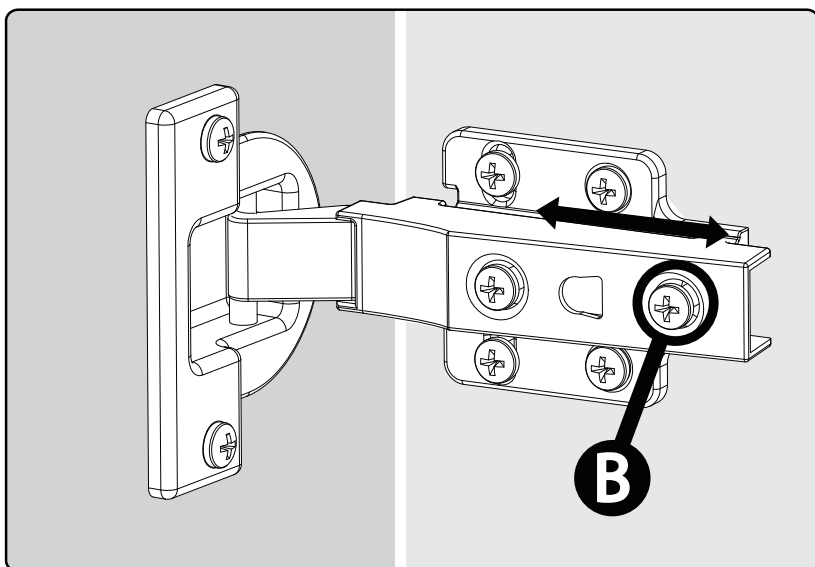

# Adjusting the Door Hinges

**i NOTE:** Using a Philips screwdriver, the doors can be adjusted:  
Left, right, forwards and backwards.

**1** To adjust the doors left or right, turn the screw (A) clockwise or counterclockwise.

**2** To adjust the gap between the doors and frame, turn the screw (B) clockwise or counterclockwise.

# Installing the Fridge brackets

---

# Installing the Countertops

## Mounting the SS Worktop on Cabinets

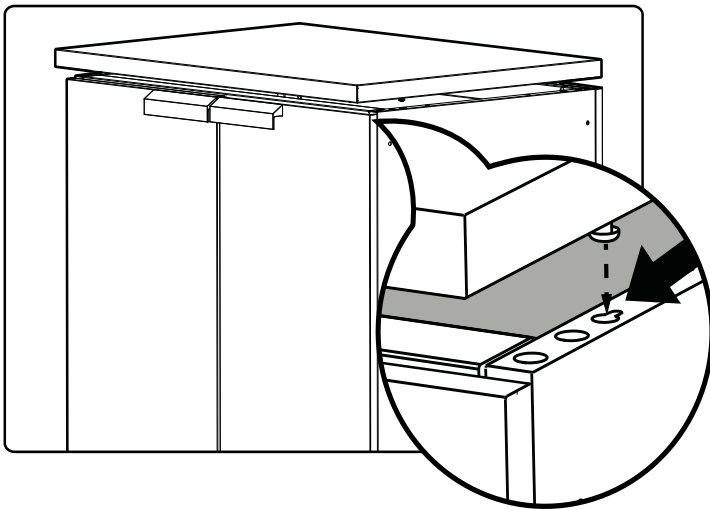

- 1** Stand cabinet upright.

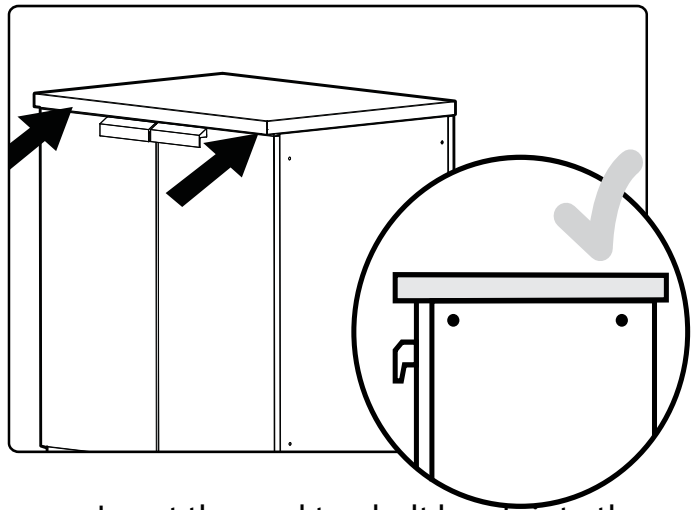

- 2** Place worktop over cabinets.

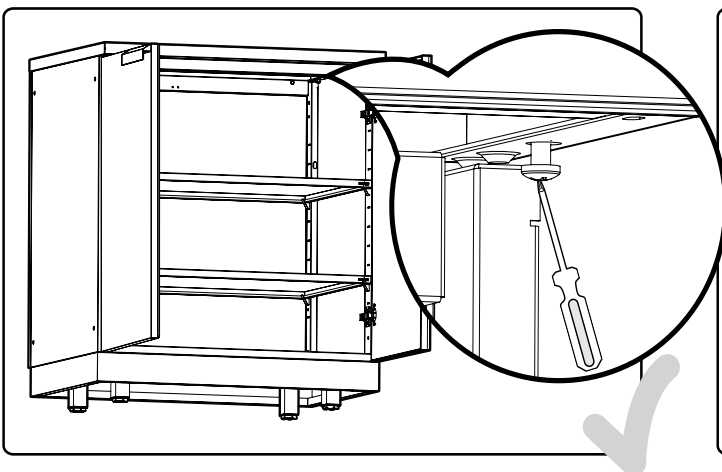

- 3** Insert the worktop bolt heads into the keyhole shape slots.

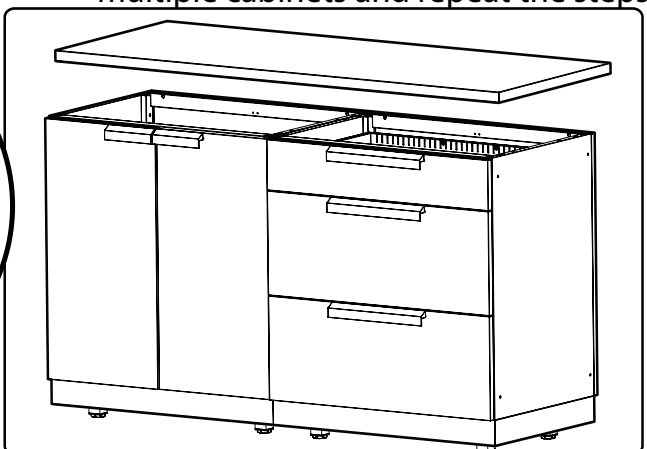

- 4** Push worktop in to lock.

- 5** Tighten screws to secure cabinets.

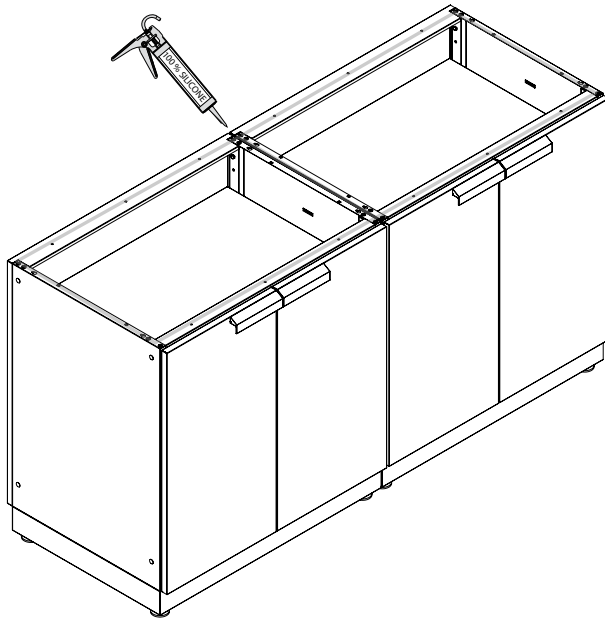

- 6** Insert the worktop bolt heads into the keyhole shape slots for the worktops on multiple cabinets and repeat the steps.

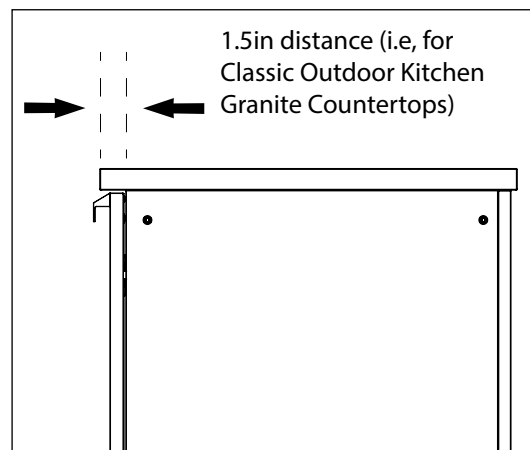

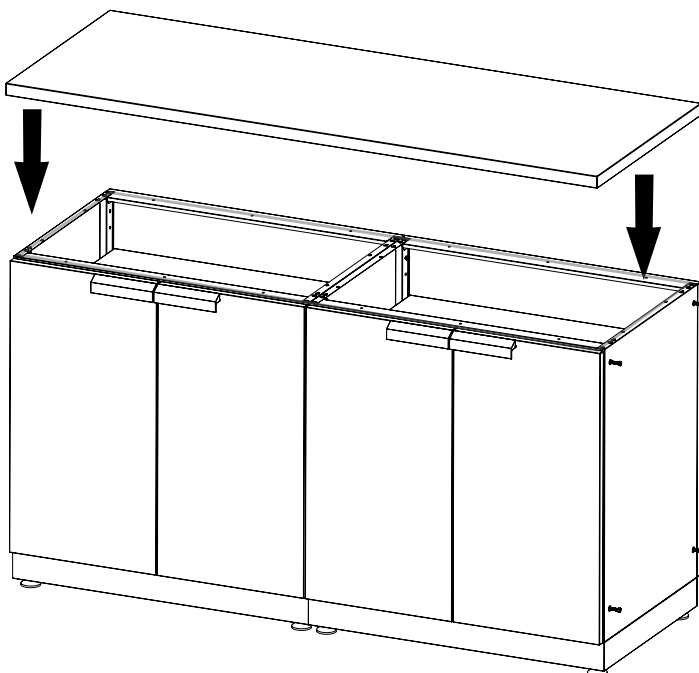

# Installing the Countertops

## Mounting the Stone Countertops on Cabinets

- 1** Using a caulking gun with 100% silicone (not included), apply a bead of Silicone on the top panel of the cabinets

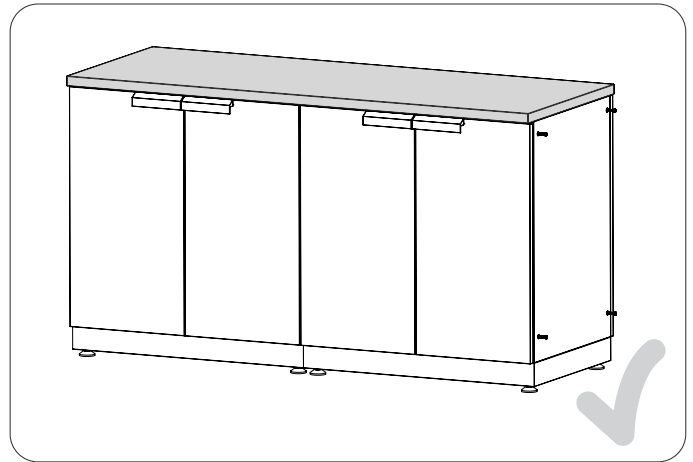

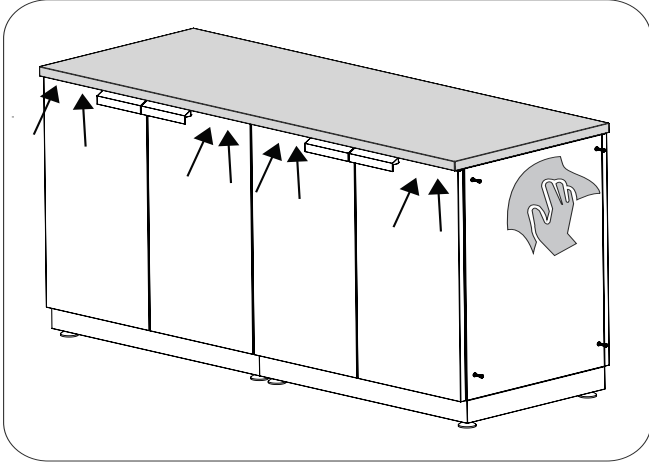

- 2** Using two people, lift countertop carefully. Align the front edge of the granite top to the front edge of the cabinets with a 1.5in offset and then slowly place it on top.

# Installing the Countertops

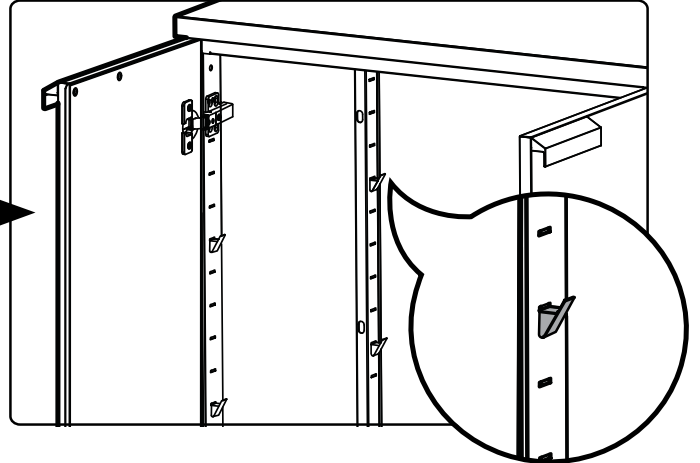

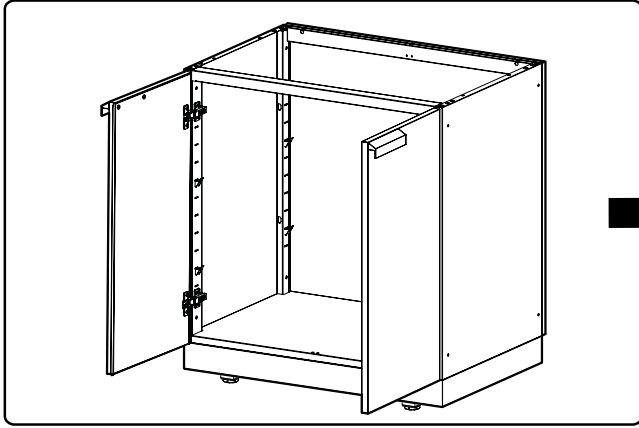

## Mounting the Stone Countertops on Cabinets

- 3** Using a wet cloth, wipe away any excess silicone along joint between countertop and cabinet.  
Follow the silicone manufacturers instructions for dry time.

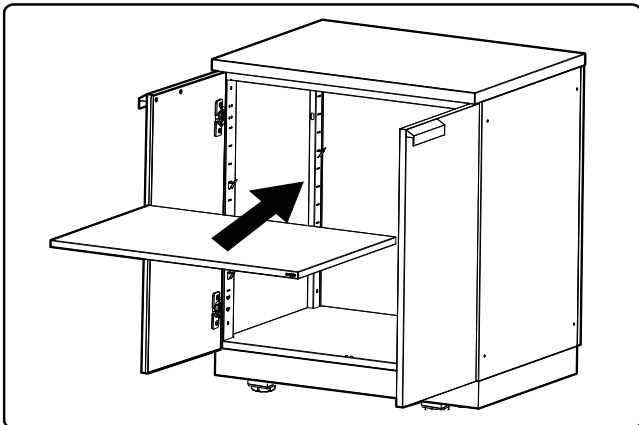

# Inserting Cabinet Shelves

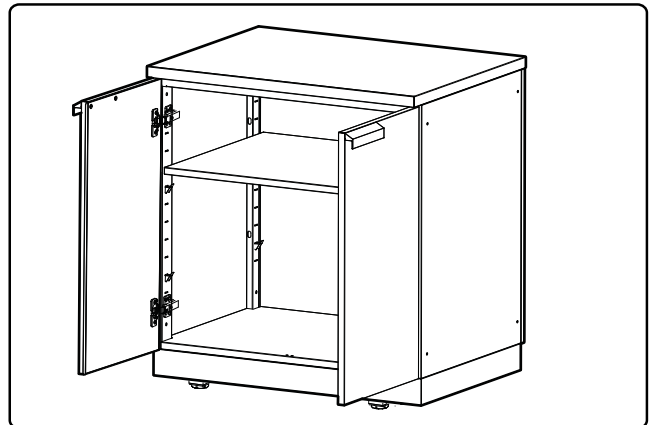

- 1** Open cabinet doors. Attach shelf clips to desired height.

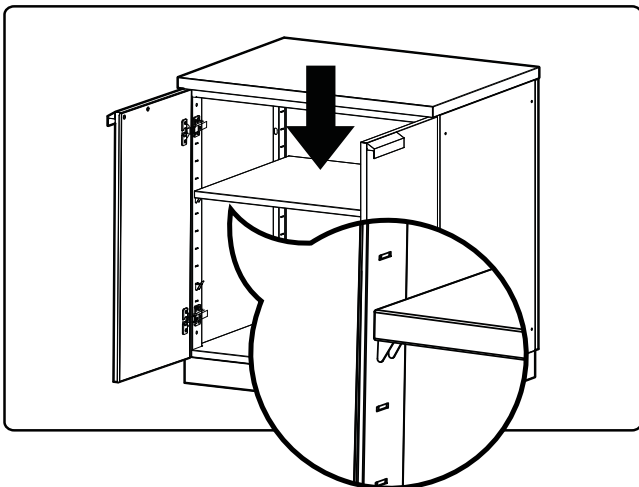

- 2** Begin by leveling the shelf.

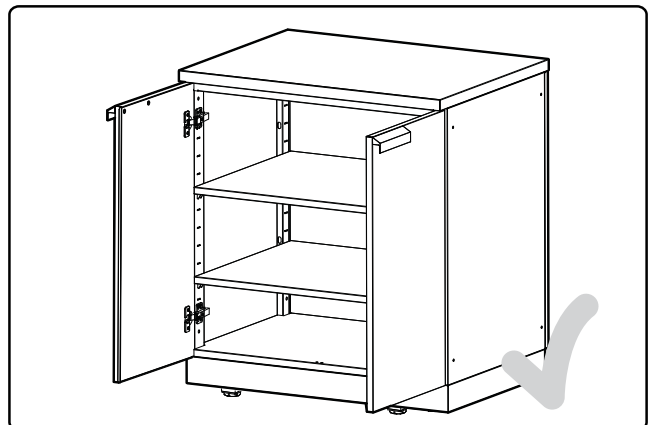

- 3** Insert and position the shelf above the shelf clips.

- 4** Lower the shelf down onto the shelf clips

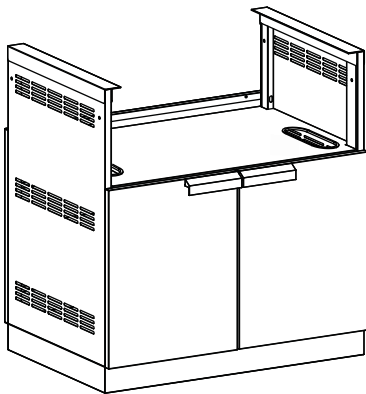

- 5** Install the remaining shelves.

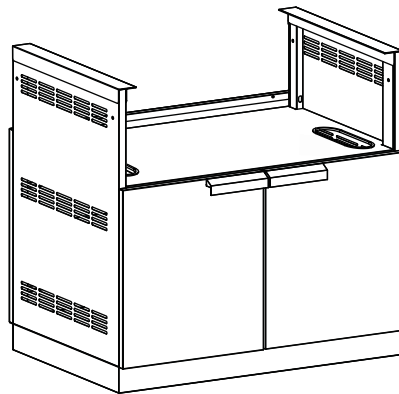

# Installing NewAge Insert Grills

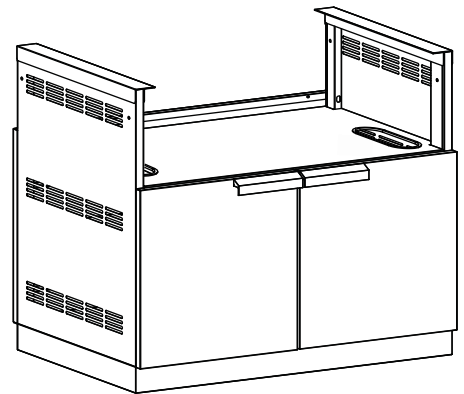

The following instructions apply to the cabinets below

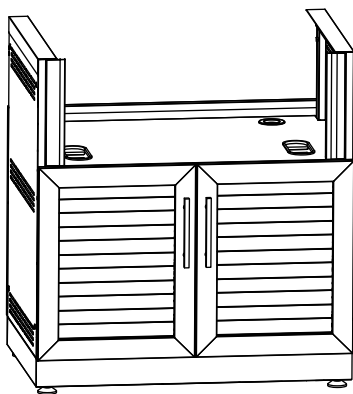

33" Insert Grill Cabinet  
**SKU# 70007**

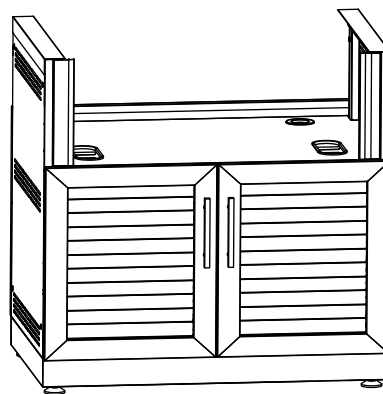

36" Insert Grill Cabinet  
**SKU# 70008**

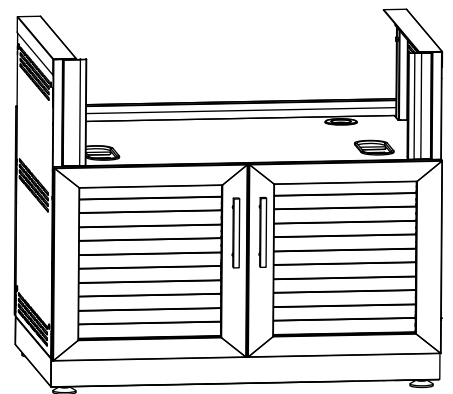

40" Insert Grill Cabinet  
**SKU# 70009**

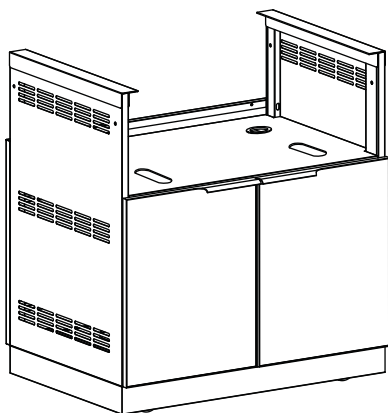

33" Insert Grill Cabinet  
**SKU# 70108**

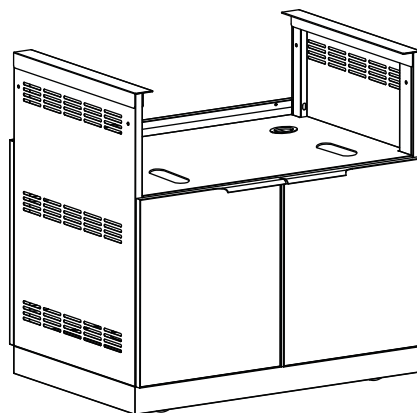

36" Insert Grill Cabinet  
**SKU# 70107**

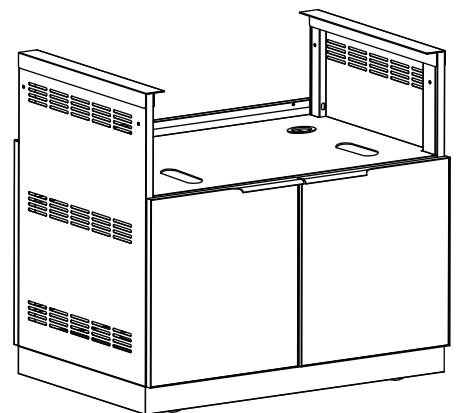

40" Insert Grill Cabinet  
**SKU# 70109**

33" Insert Grill Cabinet  
**SKU# 70208**

36" Insert Grill Cabinet  
**SKU# 70206**

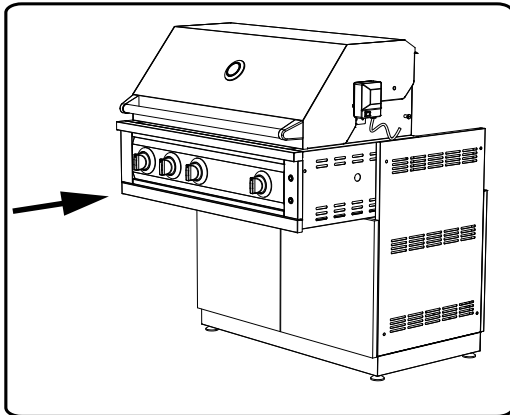

40" Insert Grill Cabinet  
**SKU# 70207**

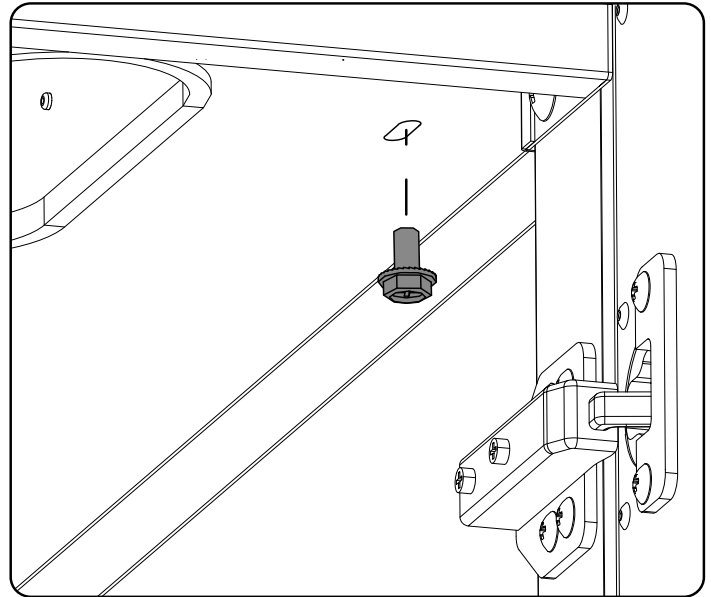

# Installing NewAge Insert Grills

## Mounting the NewAge Insert Grills on Cabinets

- 1** Place grill onto the cabinet

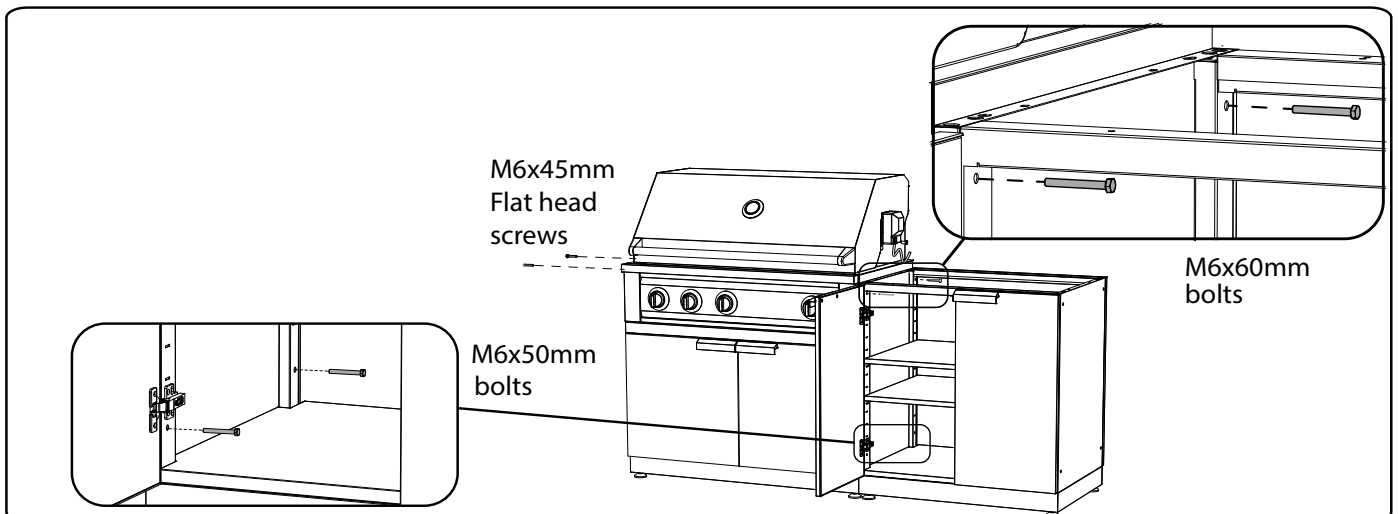

- 2** Secure grill to cabinet by inserting two M6X12 Flange hex head screws (supplied with Cabinet) that line up with insert nuts on the bottom side of the grill.

## Installing Grill on Grill cabinet attached to other cabinets

- To add an additional cabinet, attach both the cabinets using two M6x60mm bolts through top mounting holes.
- 3** Follow same to install additional cabinet on other side, else use two flat head screws to secure grill to cabinet on open end.

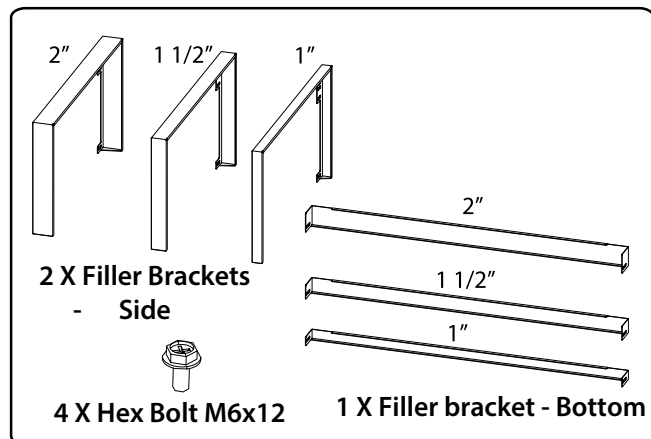

**i Note:** For more details please refer NewAge Grill Install Manual supplied with grill for installing NewAge Grill on Cabinet.

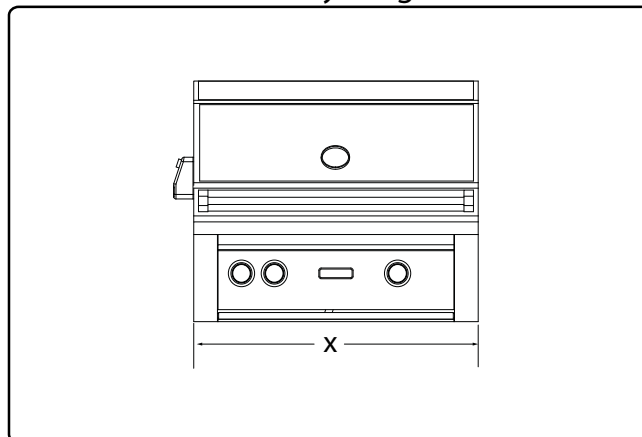

# Installing Custom BBQ Grills & Filler Brackets

**Note :** Filler brackets are not required for NewAge Grills, they are provided for adapting the installation of non-NewAge grills.

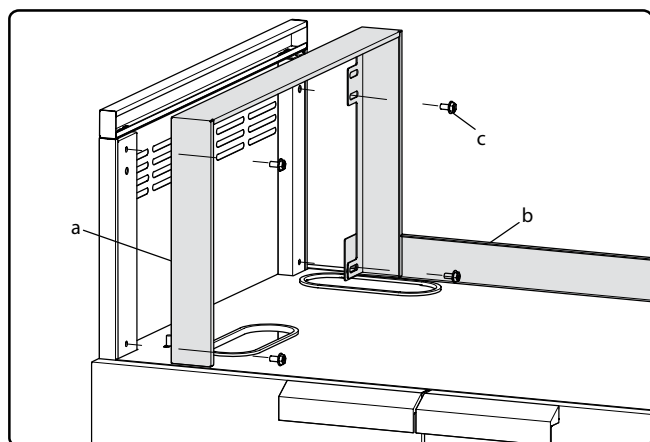

## Parts needed

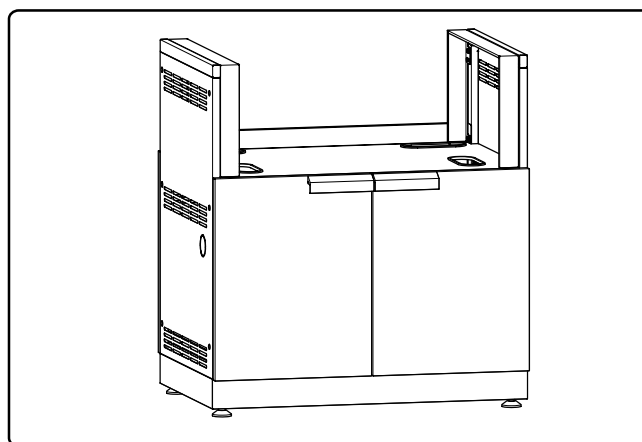

**1** Measure the length "X" of the grill to be assembled. Select the filler brackets that suits the size of your grill.

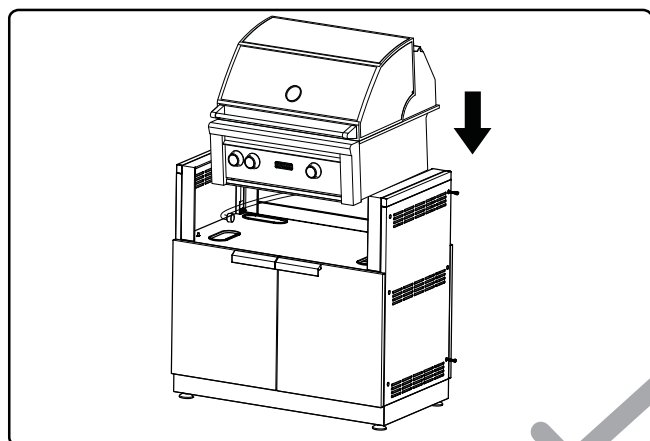

**2** Install the side filler bracket(a) and bottom filler bracket(b) to the cabinet with hex bolts(c).

**3** Repeat step 2 to install on the other side.

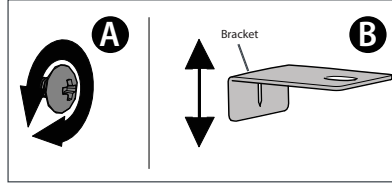

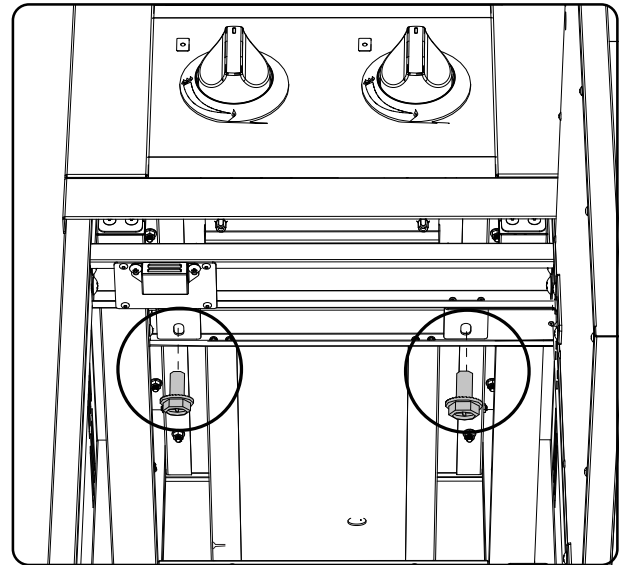

**4** Place grill so that the rails touch the brackets.

## Installing the Side Burner on individual Side Burner cabinet

**2** Use two M6X12 flange hex head screws (supplied with cabinet) to secure the Side Burner from bottom.

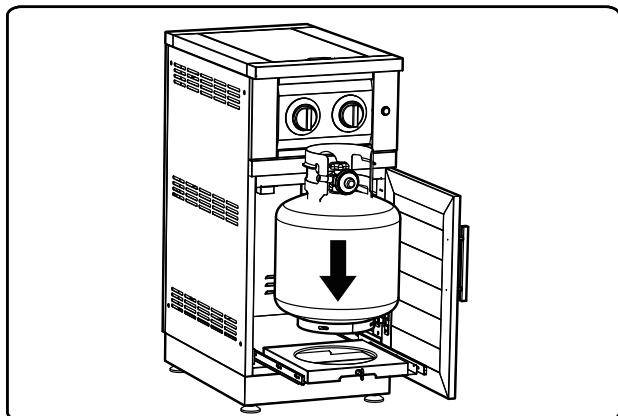

**3** To add an additional cabinet, attach both the cabinets using two M6x60mm bolts through top mounting holes and two M6x50mm through bottom mounting holes. Follow same to install additional cabinet on otherside, else use two flat head screws to secure Side Burner to cabinet on open end.

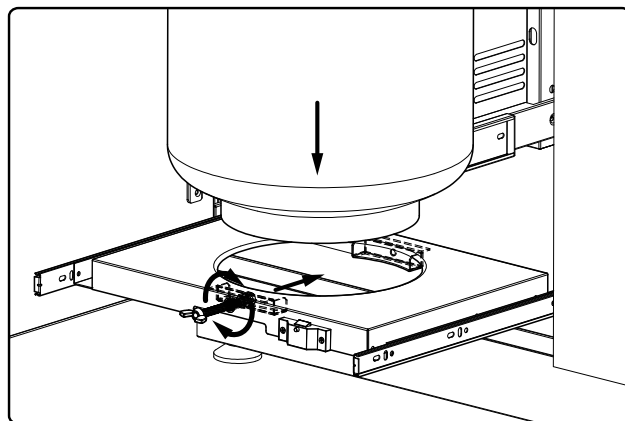

# Installing Propane Tank

---

- 1** Place the propane tank in the ring and turn the wing nut bolt until the tank ring clamp which is underneath the tray is tight to the propane tank.

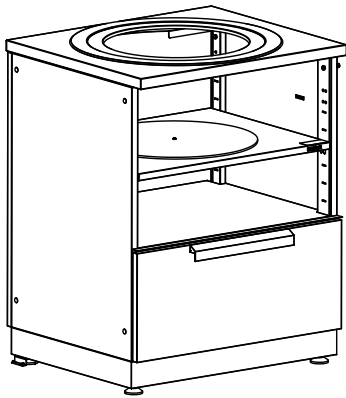

- 2** Once tank tray is pushed to the back of the cabinet, lock the tank tray by pushing down on the lock button. Push the release button to unlock.

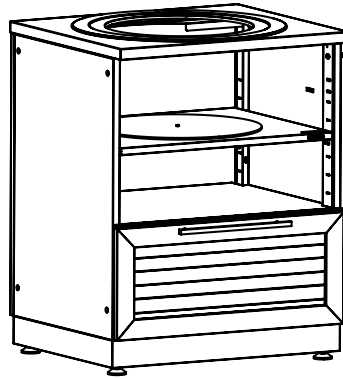

# Preparing the Kamado Cabinet

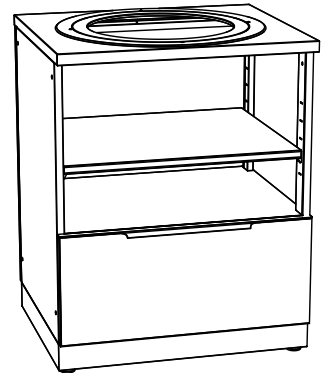

## 28" Kamado Cabinet

SKU# 70006

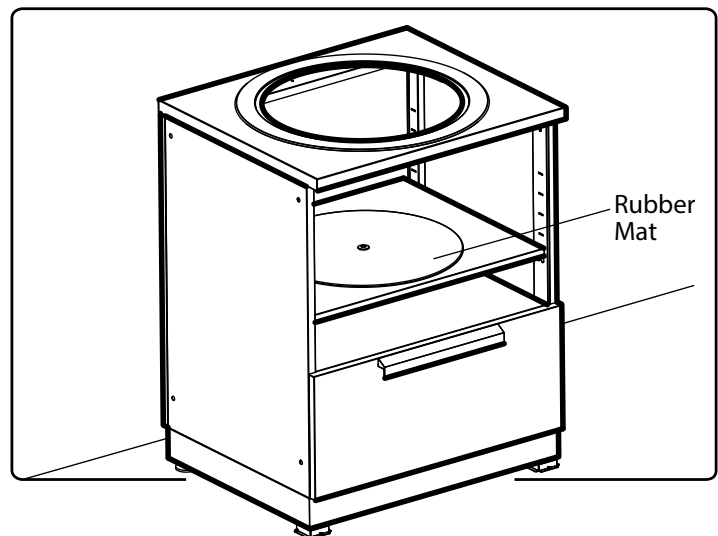

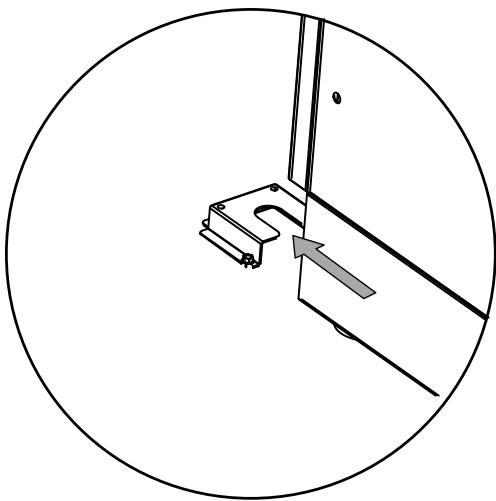

SKU# 70106

SKU# 70205

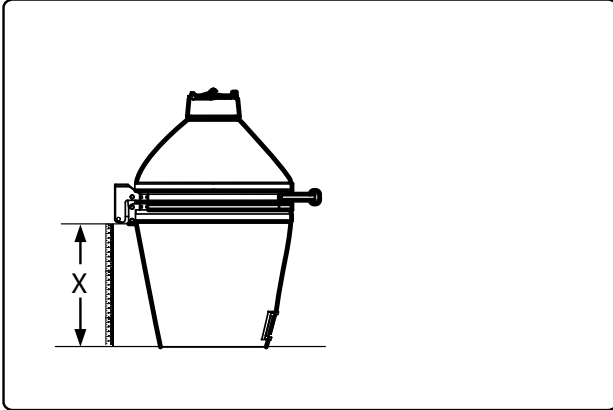

**i NOTE:** Ensure area is leveled and install the anti-tipping brackets Refer Installing the Anti-tipping Bracket section for more details

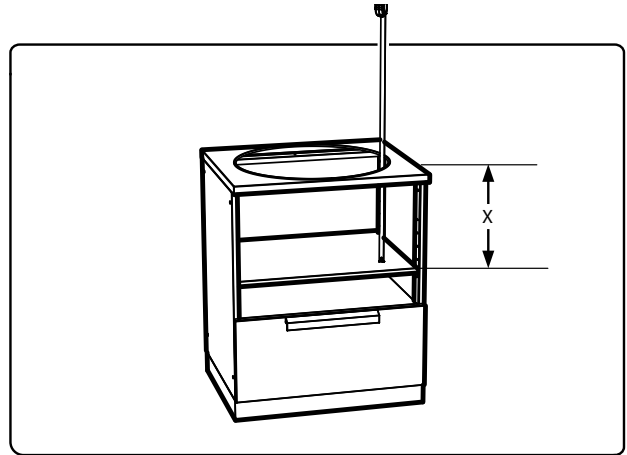

**NOTE:** Place the rubber mat at the Kamado sitting area.

# Installing the Kamado onto the Cabinet

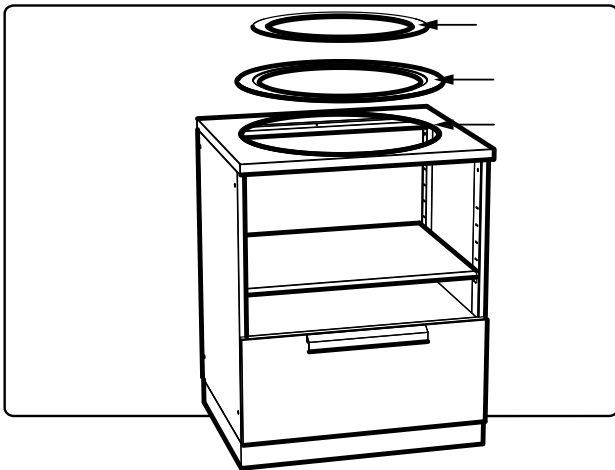

- 1** Measure "X" From Base of Kamado to bottom of lid bracket at rear of unit.

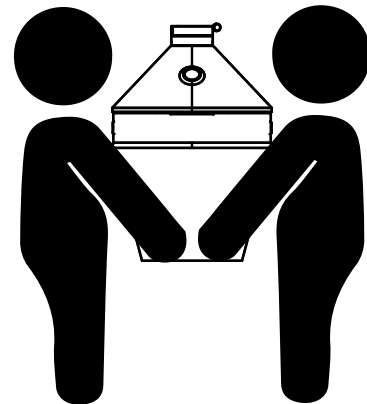

- 2** Adjust shelf height to dimension "X" from step 1.

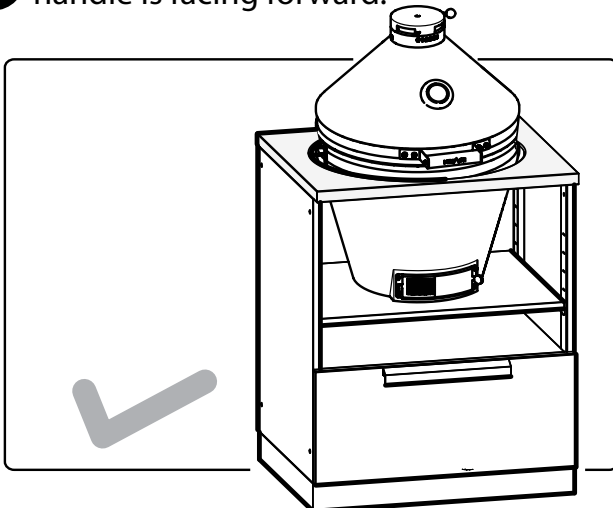

- 3** Select a ring which fits your Kamado and install it onto the cabinet.

- 4** Carefully lift and place the Kamado into the Cabinet. (2 or more people may be required)

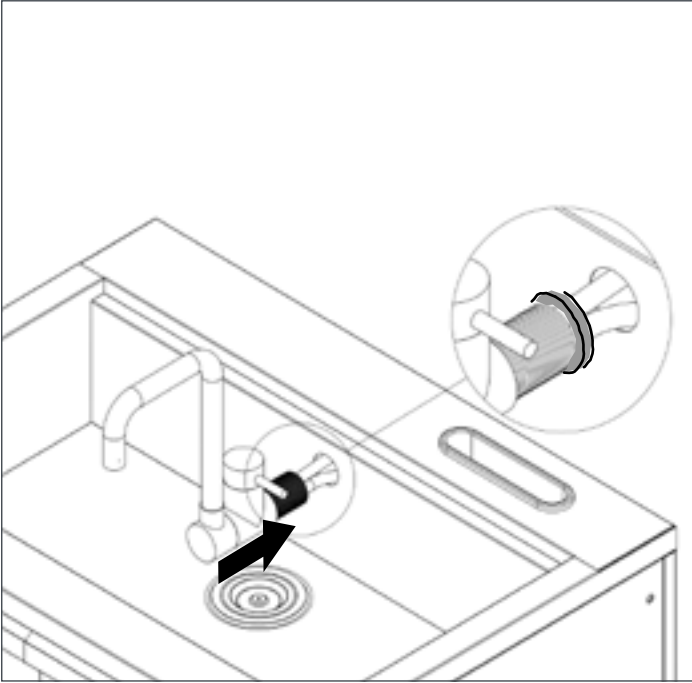

- 5** Ensure while placing the kamado, the handle is facing forward.

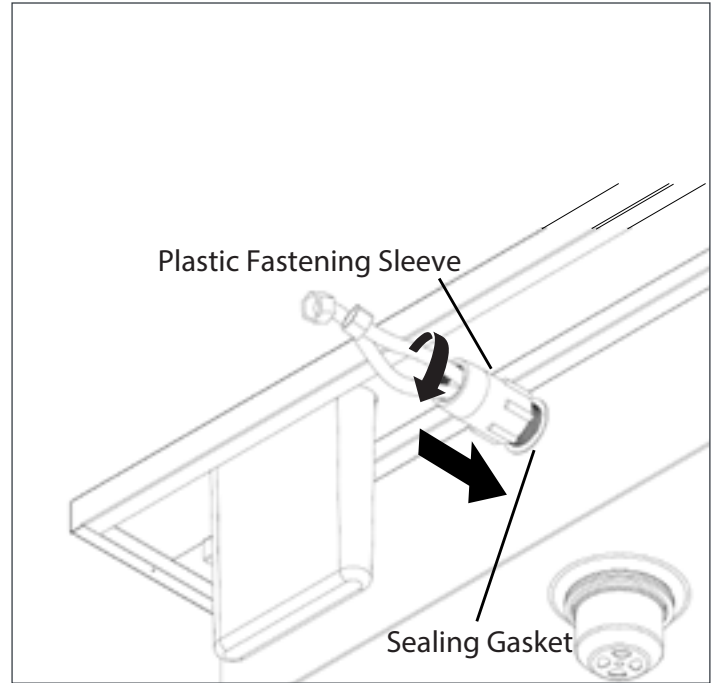

# Installing the Faucet

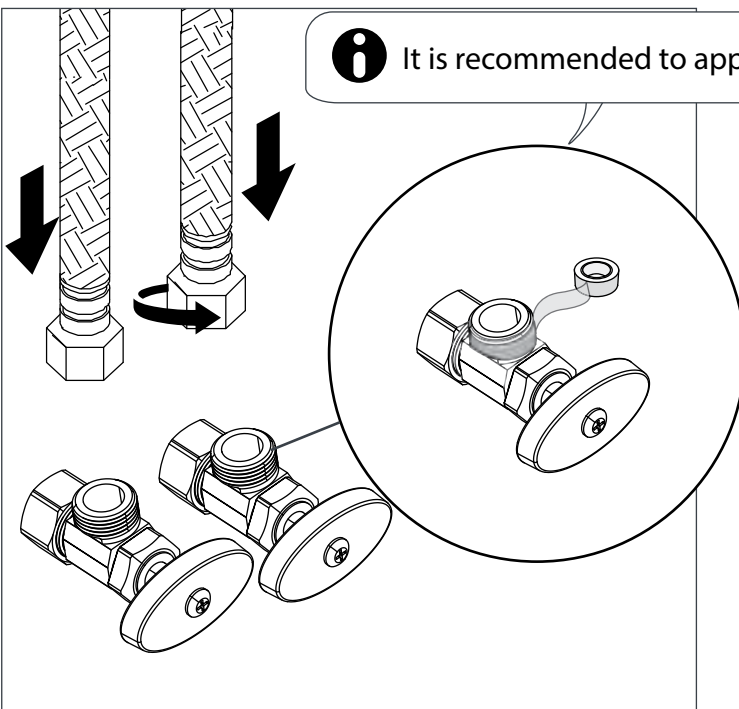

- 1** Add front washer with sealing gasket to faucet assembly and insert braided hoses through faucet hole on front side of sink.

- 2** From the rear of the sink add the sealing gasket, and tighten the plastic fastening sleeve.

- 3** Fasten the (red) hot water braided hose to the hot water intake angle valve, and the (blue) cold water braided hose to the cold water intake angle valve. Turn on the faucet and test for proper installation.

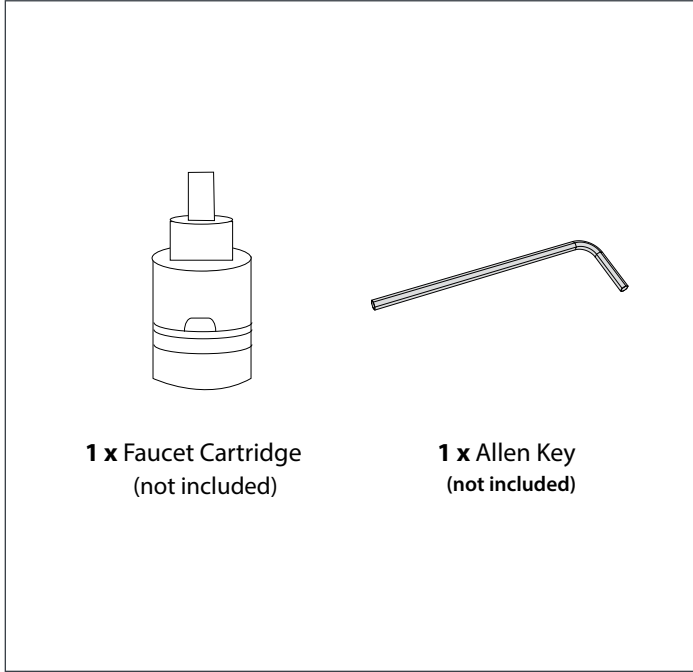

**i** It is recommended to apply teflon tape to the water supply valves.

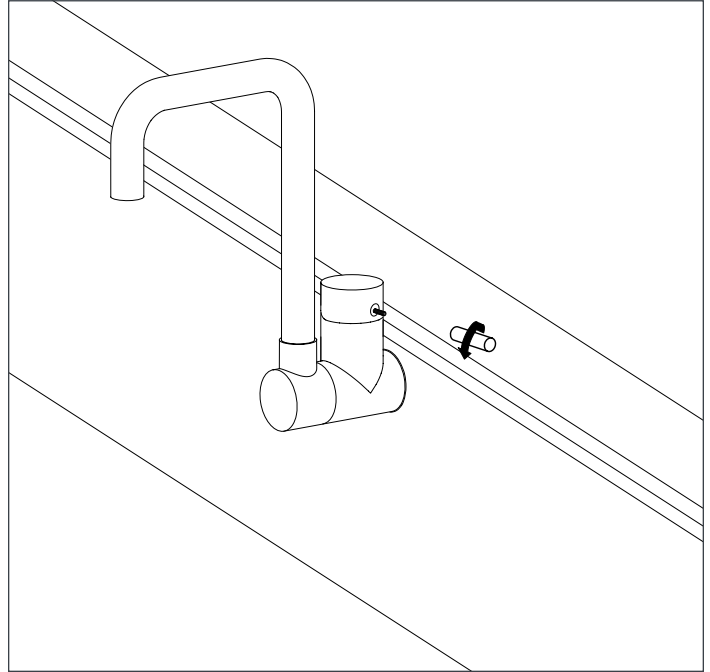

**i** For assistance connecting sink to plumbing system please contact your local contractor or plumber.

# Replacing the cartridge

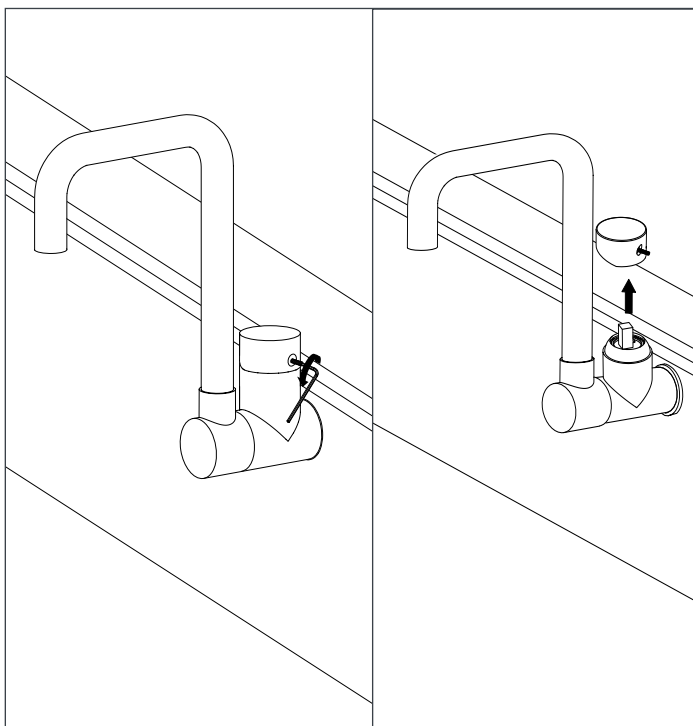

## Parts required

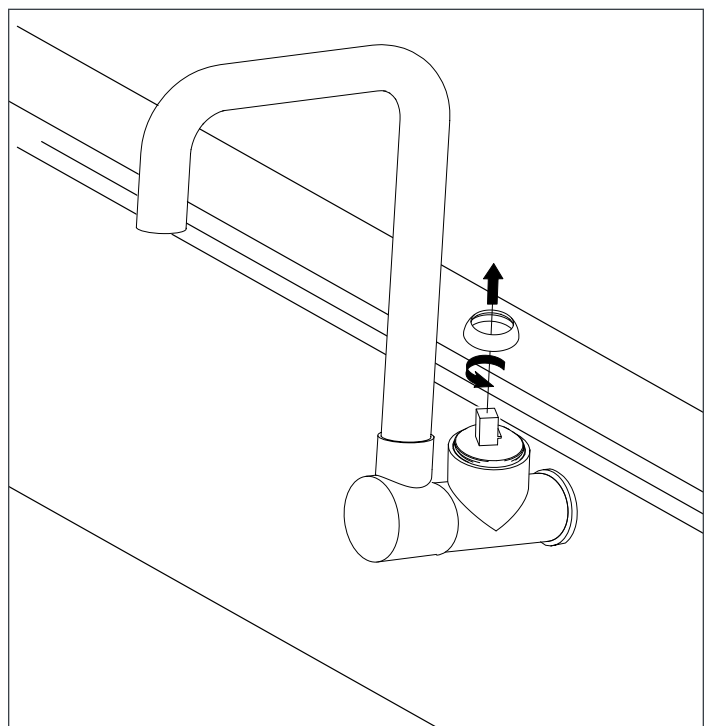

## **1** Unscrew and remove the handle knob.

## **2** Loosen the inset screw on handle by using the allen key and remove the handle.

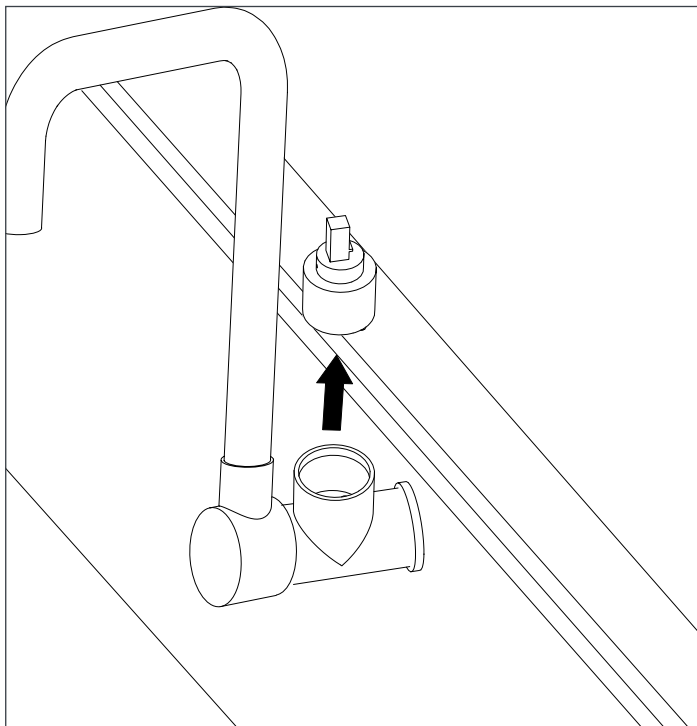

## **3** Unscrew and remove the cartridge cover.

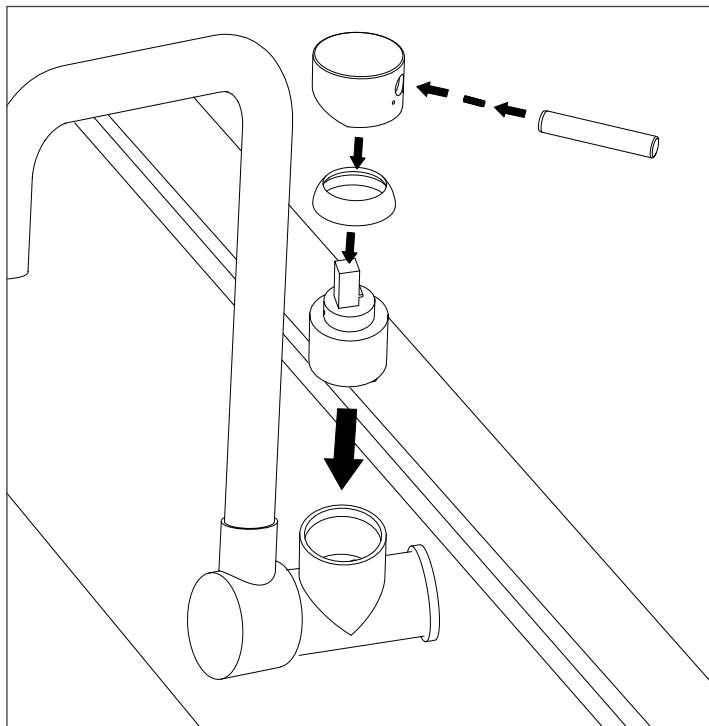

# Replacing the cartridge

**4** Remove the cartridge from the faucet.

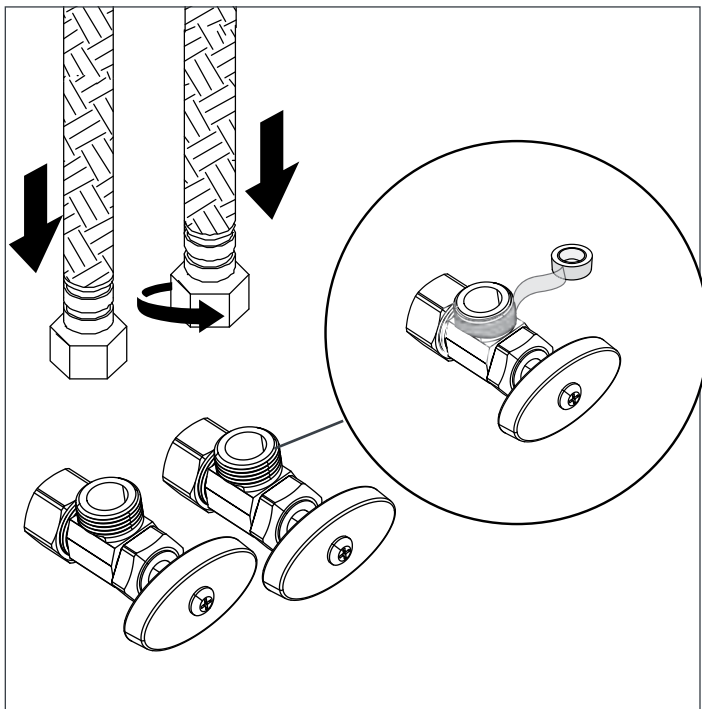

**5** Replace the cartridge and fix the handle assembly as shown below.

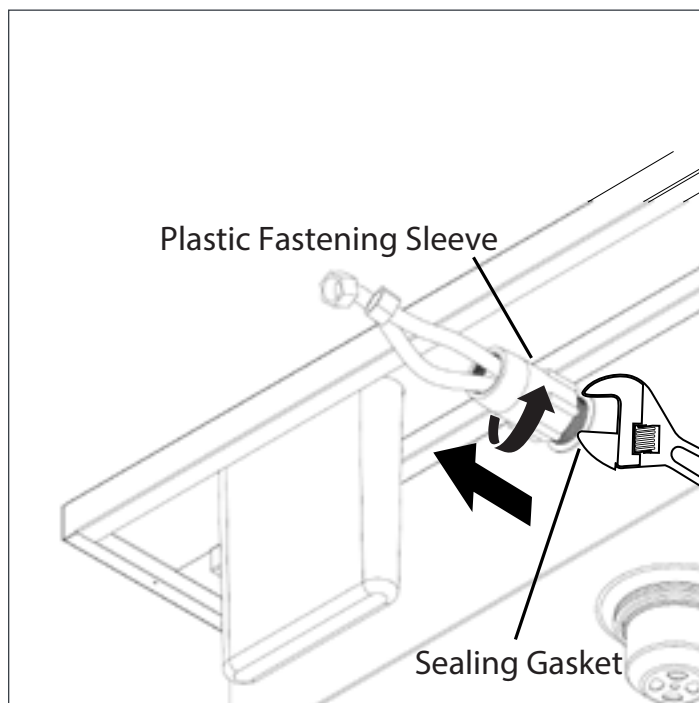

# Removing the Faucet

- 1 Remove the (red) hot water braided hose from the hot water intake angle valve, and the (blue) cold water braided hose from the cold water intake angle valve.

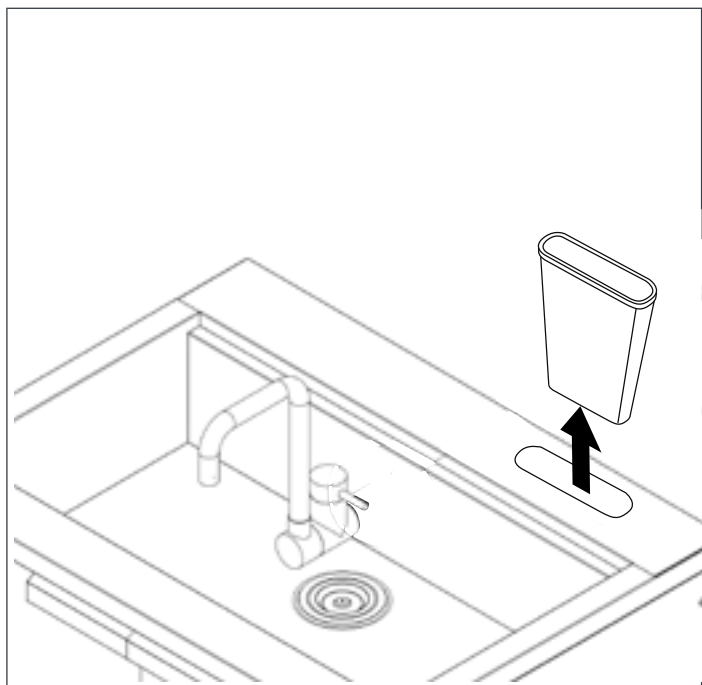

## Option - A

- 2 From the rear of the sink, tightly hold the reducer using a wrench and remove the plastic fastening sleeve and remove the faucet.

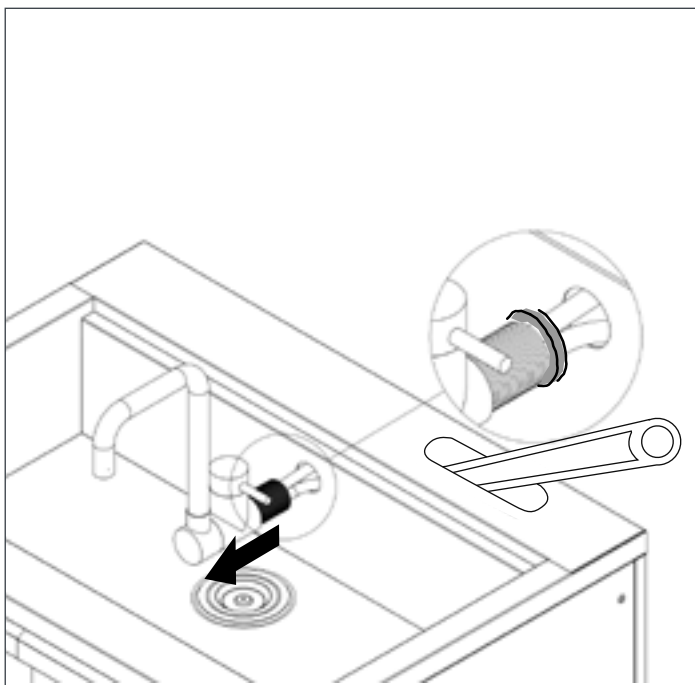

## Option - B

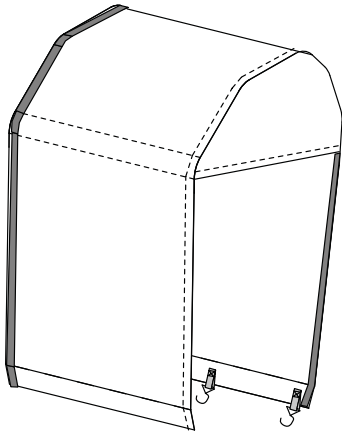

- 1 Remove the knife tray.

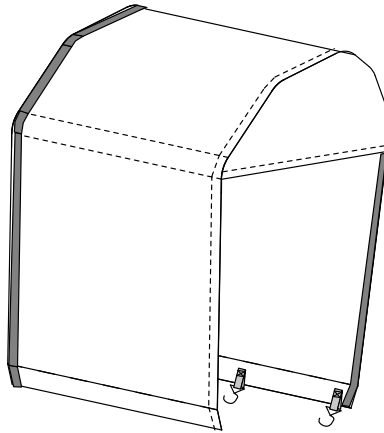

- 2 Access the reducer from the tray slot using wrench and remove the plastic fastening sleeve and the faucet.

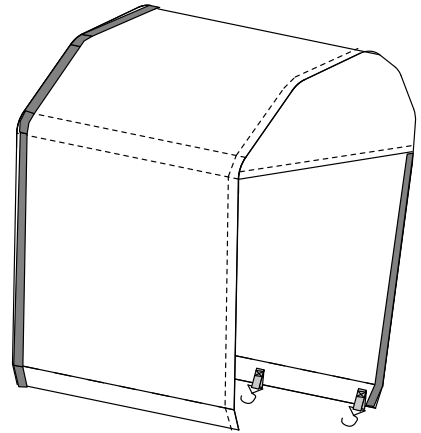

# Installing the Cabinet Covers

## Cabinet Main Covers Installation

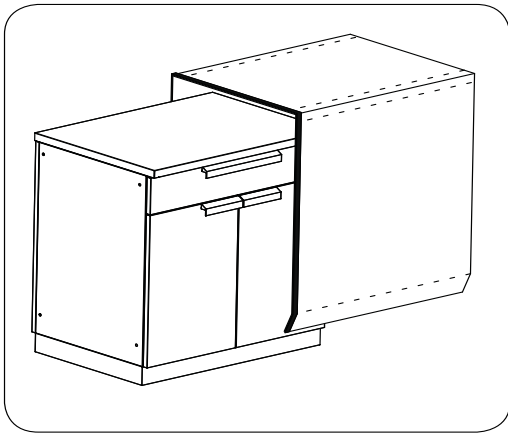

- 1 Remove cover from the poly bag. Lay cover on top of cabinet.

**Warning :** Dispose of Polybag Immediately

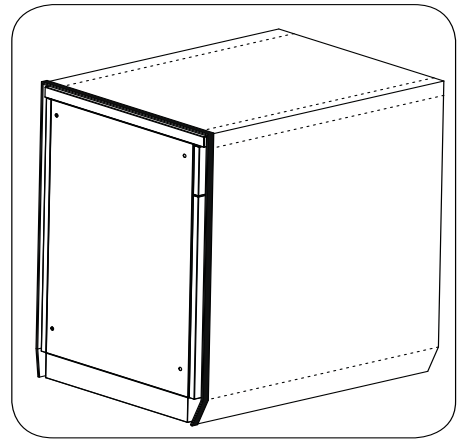

Do not leave children unattended near cabinets.  
For assistance, call 1.877.306.8930; e-mail at [support@newageproducts.com](mailto:support@newageproducts.com)

- 2 Make sure that the velcro is on the left side of the cabinet.

3

- Side cover to the left to align with side of cabinet.

**NOTE :** For Cabinets with BBQ Grills and Kamado installed.

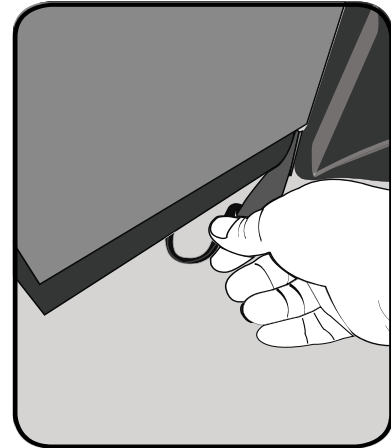

# Installing the Cabinet Covers

The cover shall not be used while the unit is in operation and shall not be installed until the unit has cooled.

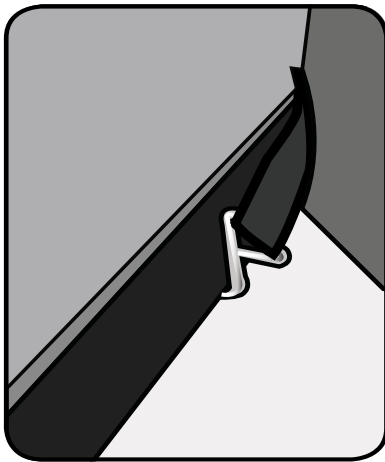

**4**

Locate the hooks on the front bottom flap. Pull down on hook by stretching elastic strap place hook under kick edge and rotate 90degrees to engage on kick frame.

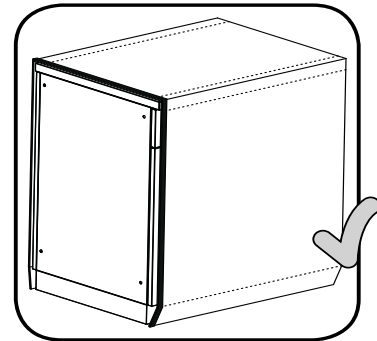

**5**

Repeat this process for both of the hooks on the front and rear lower flaps.

**6**

Completed

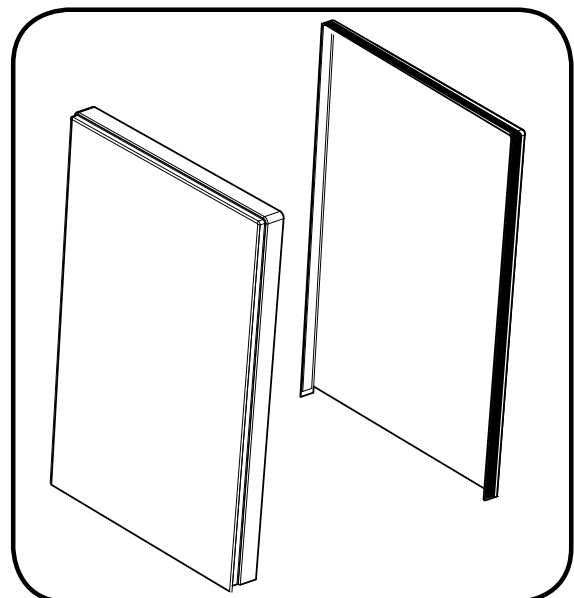

## Cabinet Side Cover Panels- Installation

**1**

Remove Right and left side panel covers from the poly bag.

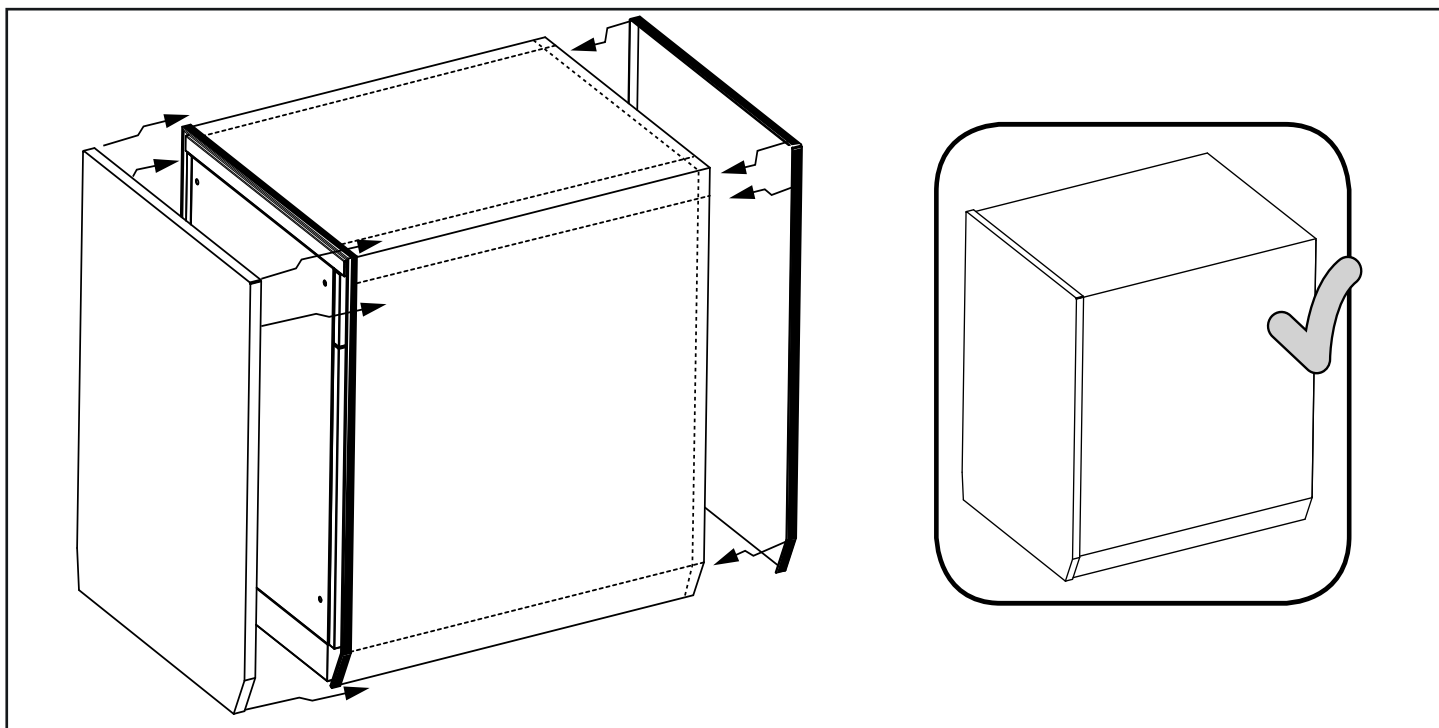

Locate Right Side panel - Loop tape above cover surface, on right side.

Locate Left Side panel - Hook tape on underside of panel, on left side.

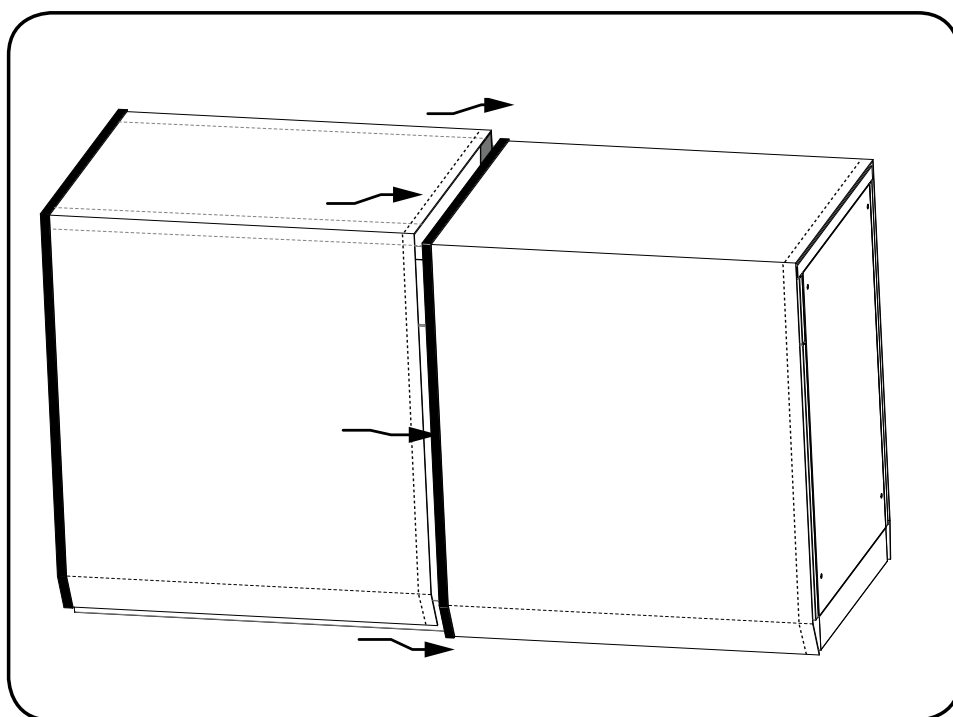

# Installing the Cabinet Covers

- 2 Align top band velcro hook of left side panel and right side panel to the main panel cover's velcro hook seam.

## Cabinet Connecting Panels- Installation

- 1 Overlay Velcro seam (hook) of left cabinet cover on top of right cabinet cover (loop) seam. Continue to attach Velcro seams together on front and back of covers.

# Care and Maintenance

---

## Outdoor Kitchen Cabinets & SS Countertops

### Perform Regular Maintenance

1. Wash regularly with clean fresh water, mild detergent and a micro fiber cloth.
2. After washing rinse in clean water and wipe the surface dry with your cloth remembering to go with the grain on brushed stainless steel.
3. Generally you should wash your stainless steel every three months. Coastal areas or next to a chlorine pool more frequently every 2 weeks.
4. Do not use abrasive cleaners or a scouring pad of any type as they will cause excessive wear and dull the finish.
5. Stainless steel finishes in coastal environments may show tea staining if not washed regularly. We recommend Hopes "Perfect Stainless" as a cleaner with a microfiber cloth.
6. For better protection use a thin coating of protectant on the surface. We do not recommend using this coating for food prep areas.

### List of common conditions that cause corrosion or discoloration of stainless steel and should be avoided:

1. Chloride containing cleansers – this includes bleach and any cleaners containing bleach
2. Muriatic acid (hydrochloric acid) – commonly used to clean up after tile/concrete installation
3. Concentrated soap residue – chemical additives will cause discoloration and some dried soaps actually look like rust
4. Water with high iron content – can leave a rusty residue, especially if allowed to drip continuously
5. Contact with iron materials – including steel wool, iron residue/dust from installation or cleaning of other steel products
6. Trapped moisture between the product and cover – rubber mats, metal cans or cleaner cans- Allow cabinets to completely dry before covering.
7. Salts – contain chlorides
8. Extreme Heat by Flame
9. Do not permit citrus or tomato juice to remain on stainless steel surfaces.
10. No abrasive cleaners, steel wool pads, or abrasive cloths as they will scratch the finish.

### OXIDIZATION Removal

If you have oxidation there are a few steps to take to bring your stainless steel cabinets back to "as new" condition.

Apply clean water with a cleaning sponge and rub gently in the direction of the grain. If the mark won't shift, it may be necessary to use a stainless steel cleaner, in which case apply the cleaner and rub gently. After cleaning it is important to rinse the stainless steel with clean fresh water and buff with a soft cloth. Remember to always rub with the grain, NEVER across as you will ruin the finish, and the stainless can lose its shine. If you must use a scourer, use a plastic scrub pad with no metal content.

# Care and Maintenance

---

## Granite Countertops

The consumer is responsible for proper use and maintenance of the granite countertop, please see following points that should be followed for a countertop that will be last a long time.

### Usage :

#### Do's :

- Use coasters for cups, glasses and bottles, especially alcohol or acidic beverages, as these have potential to stain granite stone.
- Use a hot pad for hot dishes, drinks and pots and pans. Hot pots and pans can stain/burn granite.

#### Do Not :

- Do not directly use the Granite top as a cutting surface, use a cutting board for chopping.
- Do not turn your countertop into a worktable or worktop, heavy objects dropped on the top can easily crack or damage the granite, and sharp objects may scratch the surface.
- Do not leave outside without covers if countertops are non-sealed.
- Do not leave mess on countertop as it can leave prints or stains over time.

### Maintenance :

#### Do's :

- Use a mild solution of warm water and soap to remove dirt and grime.
- Use a soft cloth when cleaning surface.

#### Do Not :

- Do not use a brush or scouring pad or any other similar implement with rough surfaces.
- Don't use vinegar, bleach, ammonia, other general purpose cleaners, bathroom cleaners or tub and tile cleaners.
- Don't use abrasive cleaners such as dry cleansers or soft cleansers.
- Don't use alkaline cleaners not specifically formulated for stone.
- Don't use lemon juice, oils or acidic substances to clean the granite.
- Don't spill acidic substances like tomato sauce, coffee, or wine, on your countertop. Clean up spills immediately to minimize permanent damage to the granite.

## Fabric Covers

### Light Soil Removal

- Wash regularly with clean fresh water, mild detergent and a soft plastic bristle brush.
- After washing rinse with clean water and hang the covers to dry.
- Generally, you should wash your covers every 2 months. Coastal areas or next to a chlorine pool more frequently every 2 weeks.
- Do not use abrasive cleaners or a scouring pad of any type as they will cause excessive wear and abrade the finish of the covers.
- Covers in coastal environments may show white salt powder blotches if not washed regularly.

## 10 YEARS LIMITED WARRANTY

NewAge is proud to offer a 10 Years Limited Warranty from the date of purchase. This is subject to the limitations and disclaimers set forth below and other product documentations.

| Length of warranty | Warranty covered Items                                  | Cost to NewAge | Cost to Customer |
|--------------------|---------------------------------------------------------|----------------|------------------|
| 10 Years           | Stainless Steel Cabinet Overall Structural Integrity    | Materials      | Shipping         |
| 2 Years            | Drawer Slides, Door Hinges, Drawer & Door Handles       | Materials      | Shipping         |
| 3 Years            | Product Finishes free from defects for initial customer | Materials      | Shipping         |

## WHAT IS COVERED

When this product is installed, operated and maintained according to the instructions attached to or furnished with the product, NewAge Products Inc. will replace the defective product or parts if the part fails as a result of defective materials or workmanship for the warranty duration from the purchase date of the product.

## WHAT IS NOT COVERED

1. Service calls to correct the installation of any NewAge products or to instruct you how to use or install them.
2. Damage resulting from improper handling, or products damaged by accident, misuse, abuse, fire, flood, improper installation, acts of God, neglect, corrosion, modification or mishandling.
3. Products damaged by improperly loading beyond the specified maximum weight capacity outlined in the instructions provided with the product.
4. Repairs or replacement when your product is used in other than normal, single-family household use, such as a commercial environment, or handled in anyway inconsistent with the installation instructions included with the product.
5. Cosmetic damage, including scratches, dings, dents or cracks in paint that do not affect the structural or functional capability of the product.
6. Surfaces damaged due to chemical interaction resulting in corrosion of paint or metal.
7. Color discoloration due to UV or sunlight. Product may change color overtime under exposure of sunlight.
8. Replacement parts for NewAge products outside Canada and the United States.
9. Loss of product contents due to theft, fire, flood, accident or acts of God.
10. Any labor costs during the limited warranty period.

## DISCLAIMER OF IMPLIED WARRANTIES

IMPLIED WARRANTIES, INCLUDING TO THE EXTENT APPLICABLE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED TO THE EXTENT LEGALLY PERMISSIBLE. ANY IMPLIED WARRANTIES THAT MAY BE IMPOSED BY LAW ARE LIMITED TO ONE YEAR, OR THE SHORTEST PERIOD ALLOWED BY LAW. THIS WARRANTY IS LIMITED TO THE ORIGINAL BUYER. Some states and provinces do not allow limitations on the duration of implied warranties of merchantability or fitness, so this limitation may not apply to you. This warranty gives you specific legal rights, and you also may have other rights that vary from state to state or province to province.

## LIMITATION OF REMEDIES; EXCLUSION OF INCIDENTAL AND CONSEQUENTIAL DAMAGES

YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR OR REPLACEMENT AT OUR DISCRETION AS PROVIDED HEREIN. NEWAGE SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, so these limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you also may have other rights that vary from state to state or province to province.
