

Installation Guide

Image 1: Analysis of installation steps

Step 1: Install the No. 1 rectangular metal bottom frame under the cabinet with self-tapping screws (Image 2), and install Anti-slip gasket on the bottom frame where it contacts the ground (Image 3).

Step 2: Install the metal frame (the No. 2 rectangular metal frame) centered on the top of the cabinet and fix it on the cabinet with self-tapping screws.

Step 3: Fix the metal legs on the metal frame.

Step 4: Align the holes of the metal frame and the rectangular metal components on the cabinet, and fix them with screws.

Step 5: Evenly stick the buffer gaskets in Image 4 on the metal steel frame, and then place the tabletop on the metal frame.
