**Finish Construction:** Hooker Furniture utilizes a multiple-step finish process of up to 16 finish steps. This results in an unsurpassed clarity, depth and color richness and durability to our finishes. Through hand-

craftsmanship such as rubbing and padding, our finishes feel as good as  
**Frame Construction:** Our Furniture is carefully chosen solid wood  
and select wood veneers over durable wood products in our furniture  
construction. Use of veneers enables more decorative looks unattainable  
with solid wood. Veneers are used over durable wood products such as  
medium density fiberboard (MDF) and particle board, made of renewable  
resources. MDF and particle board are used in quality furniture for areas  
that need to be stable, such as large surfaces. These durable wood  
products do not expand and contract with heat and cold and do not absorb  
moisture as much as solid wood, which results in stronger and longer-  
lasting furniture.
