6 + 1 spare	12 + 1 spare	12 + 1 spare	12 + 1 spare	1	12+2 spares

STEP 1 - ASSEMBLE THE BODY

1. Arrange the 6 side panels (A) around the bottom panel (B) and align all holes.
2. Insert all 12 bolts (G) with 12 washers (H). Do not fully tighten yet.
3. Once all holes are aligned, tighten the bolts evenly with the H5 hex key (K).

STEP 2 - INSTALL THE FEET

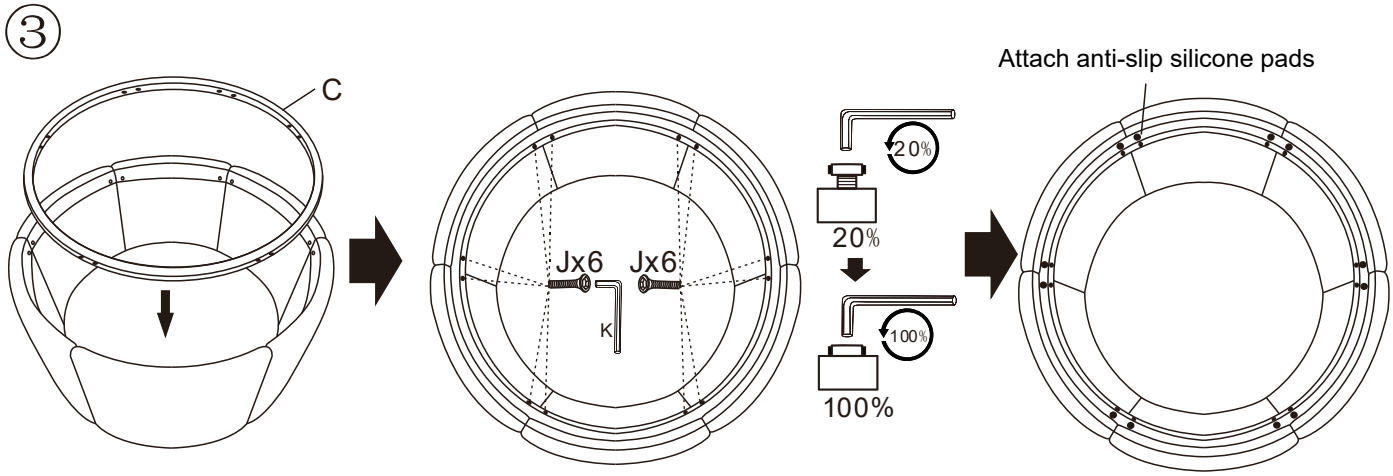

1. Keep the ottoman upside down.
2. First, position one foot plate (F) over each mounting hole.
3. Then screw one foot (E) through each foot plate (F) and into the mounting point, as shown.
4. Make sure all 6 feet are fully seated and even.

LEVELING TIP:
If the ottoman sits unevenly or one edge is raised, adjust the six feet individually until the ottoman is level and stable.

ASSEMBLY INSTRUCTIONS

STEP 3 - INSTALL THE TOP RING

1. Carefully turn the ottoman upright. Place the top ring (C) on the body and align all mounting holes.
2. Install all 12 bolts (J) using the hex key (K).

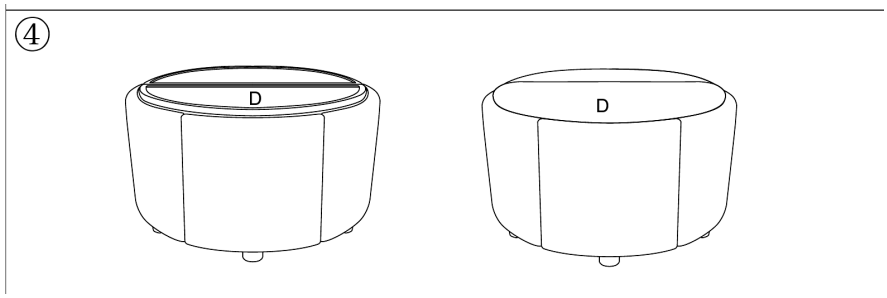

3. Stick one silicone pad (L) above each screw hole on the metal ring.

IMPORTANT

20% FIRST -> 100% LAST

Start every J bolt and tighten each only about 20%. After the ring and all holes are aligned, tighten all bolts evenly to 100%.

STEP 4 - PLACE THE LID PANELS

1. Place the 2 lid panels (D) on top of the ottoman.
2. Make sure both panels sit flat and form a complete circle.
3. Assembly is complete.
4. The lid panels are reversible - there is no designated top or bottom. Use the soft upholstered side for comfortable seating, or flip to the wood side to create a convenient tabletop for placing everyday items.

FINAL CHECK: 6 feet installed | top ring fully tightened | both lid panels seated flat

WARNING: When only one lid panel is in place, do not sit or stand on the ottoman or place heavy objects on the lid panel. The panel may shift or slide, causing injury or damage.
