(72H) — (1WK)

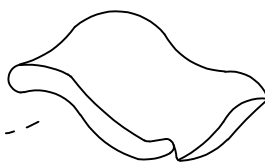

④、Take off the outer protective film.

⑤、Please be careful to use scissors or knives to open the outer protective film to avoid damaging the contents or hurting yourself.

⑥、Carefully open the compression bag and the sofa will quickly rebound.

TIPS:

Our frameless foam and spring compression sofa bodies are designed with industry-leading technology from the compression furniture sector and can restore more than 95% of their original state after 72 hours to 1 week of decompression, so customers need to be patient. Minor wrinkles and bends are common occurrences and do not indicate quality issues.
