

LED Vanity Lamp Installation diagram

INSTALLATION SHEET

START FROM HERE

- Make sure POWER is COMPLETELY OFF at the fuse box
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area
- Wear gloves at all time during this installation
- Read instructions carefully before you start assembly
- Keep this installation sheet for future reference

Please Note:

- This LED fixtures come with pre-wired LED module(s)
- Unless instructed, Do Not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage
- Use ELV (Electronic Low Voltage) type of dimmer for dimming application

1. Remove fixture from its original package
2. Separate mounting plate (c) from fixture body (f) by removing canopy screws (e)
3. Attach mounting plate (c) to electrical junction box (a) using screws provided (d) in hardware package
4. Secure mounting plate (c) to mounting surface with additional screws (d)
5. Make proper electrical connections (black to hot "L", white to neutral "N", ground to "GND") with wire nuts (G/L/N) provided in hardware package
6. Align mounting plate (c) to holes on fixture body (f), and then attach using canopy screws (e)
7. Put the lamp cover (g) into the lamp cap (j), and then use the screw (i) to align the hole on the lamp cap (j) to tighten the screw. Finally, twist the bulb (exclude the bulb from factory) and turn it on.
