

Installation Guide

Note:

1.First lay out all the accessories for installation (the sleeve can be put on the hexagon for extra strength).

2. Seat plate inside the sealing pocket of the short screws is linked to the seat plate and backrest, in addition to the crossbar head of the black triangular cover open, there is 1 package of long screws.

1.Connecting the backrest and seat plate

First, the backrest and the seat plate with short screws twisted connection inserted, in turn, all good.

2.Installing the crossbeam

Reverse the backrest and the sitting board in a one-line arrangement, put the beam on the link to align the holes, and tighten the long screws in turn.

3.Install the legs

After installing the long screws, align the legs with the outermost screw holes, install the long screws, and tighten the two sides in turn.

4.Installing the feet

Use the hexagonal socket to tighten the foot pads and install them, then place the chair back as normal.

5.Installing the Triangle Cover

Push the triangular cover into the notch and align it with the screw opening.

6.Installing the armrests

Align the armrests with the screw openings, tighten the long screws and the installation is complete!

If the backrest is loose after installation, check whether the screws are tightened or not.
