

Luxury Royal Family Balance Siphon Coffee Maker, Siphon Brewer, Elegant Design Retro-Style

Description

Too expensive to buy coffee every morning? Want to experience the fun of making coffee in your free time? This siphon coffee maker allows you to achieve coffee freedom at home or office. For shorter extraction time, full-bodied flavor and standard taste, you deserve this gorgeous vintage piece. It's also an ideal gift for your friends and family.

Key Features

Shorter Extraction Time: The extraction time of coffee from a siphon coffee maker is usually 45-50 seconds, which is at least 1 minute shorter than hand brewing, allowing you to enjoy your coffee more quickly.

Full-bodied Flavor: The coffee liquid extracted by the siphon coffee maker is not only by brewing. Due to the atmospheric effect of heat expansion and cold contraction, the essence of the coffee beans is extracted, so the coffee tastes thicker and the caffeine contained is heavier, despite the short extraction time.

Large Capacity: This siphon coffee maker can 4-5 servings of coffee or tea at once. Even if you have guests at home, you don't need to make drinks multiple times.

Multi-function: Besides coffee, it can also be used to make tea. So if you happen to be a tea and coffee lover, then one machine is enough for you.

Simple and Fun: It is a perfect way for making coffee in your free time. The whole process with a siphon maker is simple but fun, and you can observe how it works through the transparent glass.

Standardized Taste: Hand-brewed coffee is easily affected by technique, temperature, and water flow rate, while coffee made by a siphon maker is more stable in taste under normal conditions.

Gorgeous Appearance: Unlike ordinary coffee makers, it has a unique structure, simple color and a glossy surface. Even when you're not using it, it could be an elegant vintage decorative piece for your home.

Portable: It is designed with a curved hook for carrying. You can even lift it with one finger easily.

Easy to Clean: Since it is made of stainless steel and glass, it has a smooth surface and does not rust. It is easy to clean and durable to use.

An Ideal Gift: It is beautiful and practical, so it can be an ideal choice for you to give as a gift to your friends or family.

Quality Service: If you have any related questions about our product, please feel free to contact us, and we will try our best to help you.

Details

Metal balancer: The balancer is used to connect the glass and the water receptacle. As long as the water does not exceed the maximum limit of the container, you do not have to worry about it tilting due to imbalance.

User-friendly Base: Its base has a non-slip design, while the groove can effectively stabilize the glass.

Alcohol Lamp: The siphon coffee maker is heated by the open flame of an alcohol lamp. The alcohol lamp can be easily lit and extinguished and is smoke-free.

Application

The siphon coffee maker can be used at home for pleasing yourself or entertaining your guests. Also, it can be used for commercial purposes such as cafes and tea houses.

Product Size: 23.5*12*38cm/9.3*4.7*14.96inch

Package Included

1* Siphon Coffee Maker

Notes

1. The siphon maker is heated by an alcohol lamp. After use, please cover the lamp with the lid, and do not blow it out with your mouth. Avoid children using it alone.
2. When making coffee in a siphon pot, the water temperature is normally about 10 degrees higher than hand brewing. So be sure to control the brewing time, which is supposed to be no more than 1 minute, or it will affect the taste.
3. The siphon coffee maker is suitable for medium and dark-roasted coffee beans, which have average acidity. Using a siphon machine can better extract the acidity and make the coffee taste more vibrant and bright.
4. Please allow the slight color difference caused by the shooting light and 1-3 cm error due to manual measurement, and make sure you do not mind before ordering.
