

Easy Installation Guide

Please review the General Instructions and this Method before applying the film.

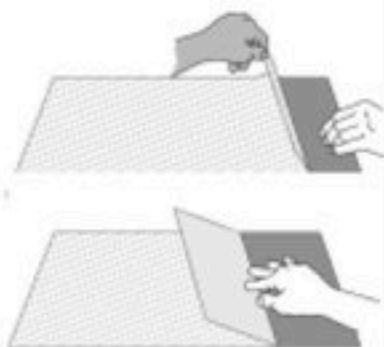

1

Wipe the wall, removing dust and any obvious contaminants.

2

Lay the graphic image side down on a flat surface. Pull back about 6 inches of the liner. Sharply crease the liner.

3

Align the graphic on the wall and use finger pressure to tack it in place.

4

Secure the top of the graphic by brushing from the center out. Methodically move down the graphic, continue to brush from center out. Gently pull liner down to remove as you go, until the whole graphic has been adhered.
