

# ASSEMBLY INSTRUCTION

|                                                                                            |                                                                                            |
|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| A*1<br> | B*1<br> |
| C*4<br> | D*1<br> |

Rotate part B to fit any hole from part A, then combine them by tightening the screws to 80% firstly. Turn around part B to make every hole combined by tightening screws one by one to 80%. Then tighten all screws to 100% after all steps settled down.
