

Tips for Easier Cover Installation

Step 1

Take out the compressed cushion insert and hold the cushion insert by its corners, and gently feed it into the open end of the cover.

Step 2

Turn the cover with the opening facing up, then push the insert all the way to the far end of the cover to align the corners.

Step 3

Slowly zip up the cover and press the full insert from the far end for smoother closing. For easier installation, having a second person assist is highly recommended.
