

Assembly Instructions for **Model HL1747753**

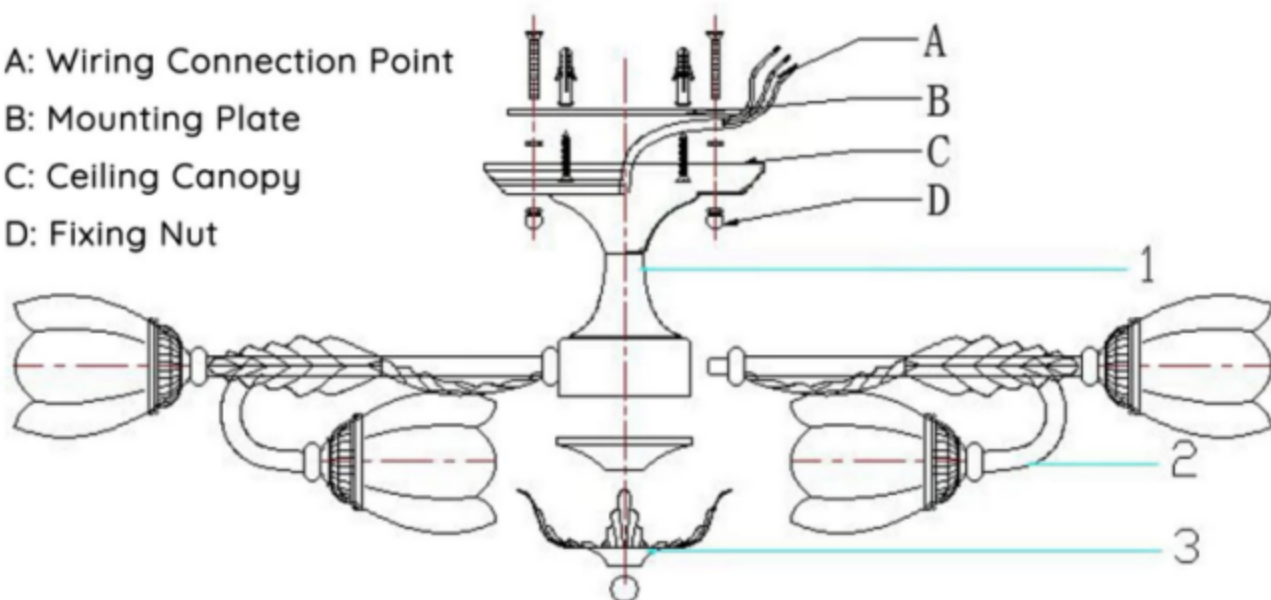

Assembly Method

A: Wiring Connection Point

B: Mounting Plate

C: Ceiling Canopy

D: Fixing Nut

Open the package and verify that the light fixture and all installation accessories are present and complete.

1. Assemble the main components of the fixture (1, 2, and 3) as shown in the diagram.

2. Secure the long screws and washers into the outer holes of the mounting plate (B).

3. Secure the mounting plate (B) to the ceiling using expansion bolts.

4. Connect the fixture's wiring to the power supply wiring, and use electrical tape to cover any exposed wires.

(Note: For this fixture, there is no need to distinguish between the neutral and live wires during connection.)

5. Use the fixing nuts (D) to tighten the ceiling canopy (C), ensuring the fixture is firmly secured to the mounting plate (B) with no risk of detachment.

6. Install the light bulbs and turn on the power supply.

The installation is complete.

Your fixture is now assembled and ready to use.
