7

NOTE:

The center support leg glide sits approximately 1/4" off of the floor. The glide will usually touch the floor after a mattress is placed on the bedframe.

Do not place a mattress on bedframe until it is fully assembled and tightened. The bedframe should be located in your desired location. Sliding the bed with weight upon it can compromise the integrity of the center support legs.

You're all finished! Sweet dreams!

If you're having difficulty, our friendly Customer Care team is always here to help.
