

Jubilee Furniture Sectional Assembly Guide

Before Assembly:

When receiving the furniture, please make sure that you take pictures of all of the pallets. If there are any problems with the packaging, please take additional pictures and make a note on the P.O.D. before signing it.

Assembly:

Once you are ready to assemble the furniture, begin by taking care of the outside packaging.

Sectional Pieces -

Once the sectional pieces are all laid out, simply connect each individual piece together to form your ideal sectional shape. Each individual piece comes with “hooks” in which you can lift up to connect to another piece (picture on right).

Headrest -

The headrests for the sectional may or may not already be pre-assembled into the corresponding piece. If need be, take the headrests and slide the metal rods into the corresponding openings.

LED Lights -

When it comes to the LED Lights, please make sure that you have the adaptor cords on hand. Please note that they are included in the pallets and are sometimes easy to miss. The adaptor on the Left is used for USB Ports and Bluetooth Speakers. The adapter on the Right is

Connect 1 end of the adaptor to the bottom of the sectional where the LED Lights are located. Connect the other end to any wall outlet. You are able to turn the LED Light on and off via the adaptor (manually) or through the remote control.

Repeat the steps until you are all finished! Now your beautiful sectional is ready for you to relax on.
