

# CleanVent installation instructions

**7.** Position baffles to direct air flow, open each one all the way.

**8.** Install inner baffle under magnets installed.

**9.** Tighten self tapping screws with magnets flat to the ceiling. Tighten enough to bring vent box tight to the ceiling, DO NOT over tighten and strip the screw. Position baffles as needed. They work the best as open as possible.

**10.** Place Cover Screen under tabs into position.

**11.** Snap on CleanVent.

**12.** Position CleanVent into place.

**WAH! LAH!**
