

Installation Manual

List of accessories:

Installation completion diagram

Start assembly

1. Take out the small layer board and install the small side bracket left and right with screws (the large hole of the side bracket faces outward).

2. Take out the round stick and insert it into the small side bracket hole.

3. Take out the plastic sleeve and insert it into both ends of the round rod.

4. Take out the large side bracket and install it with screws on the left and right sides (the large hole of the side bracket faces outward).

5. Take out the front bezel and install it as shown in the picture.

6. Take out the large layer board and install it with screws.
