

Installation Instructions

One frame, one mechanism, and one table leg — three items in total.

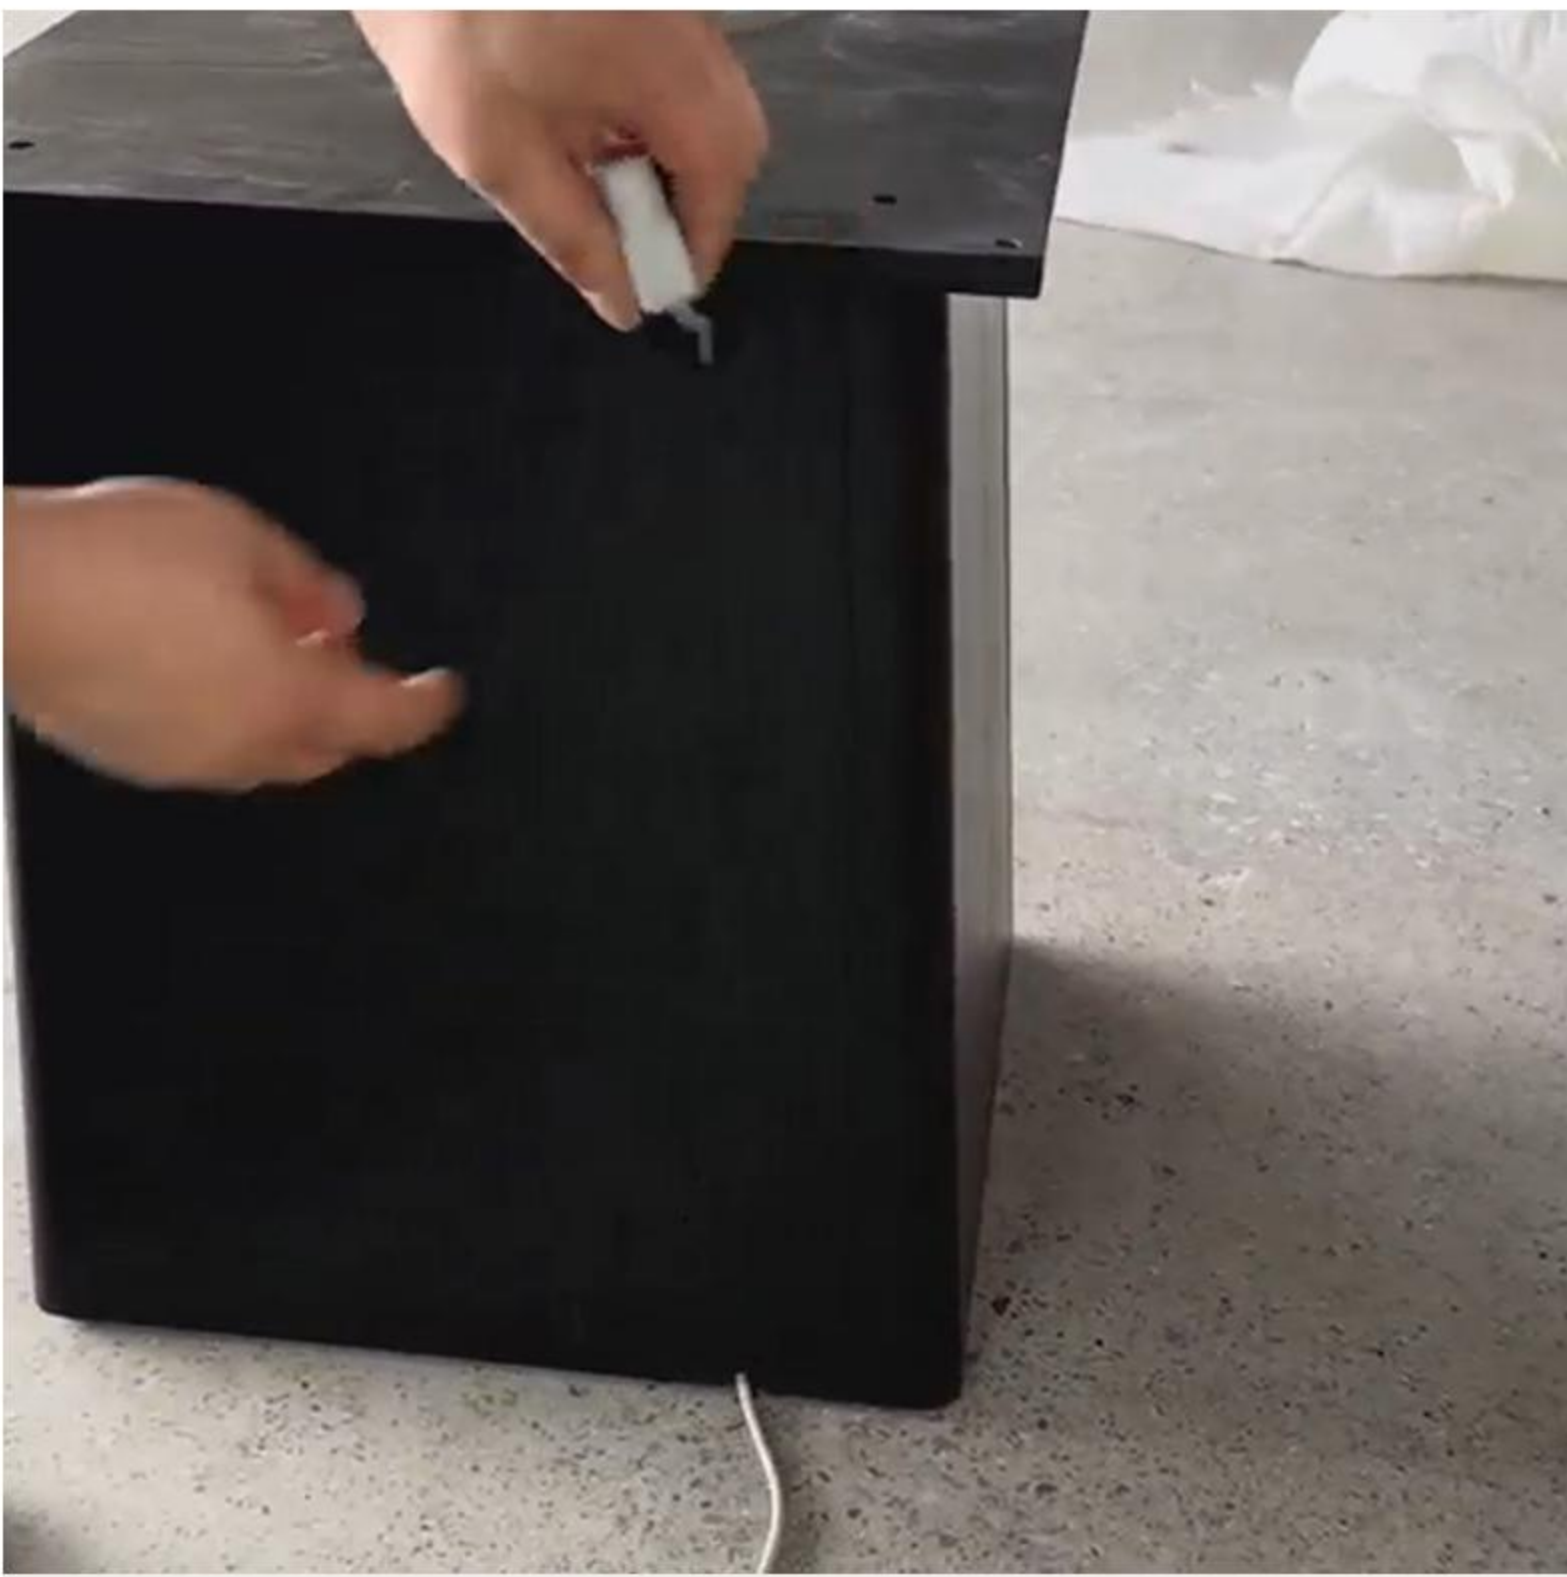

Remove the packaging from the table legs, and pay attention to the screws on the packaging.

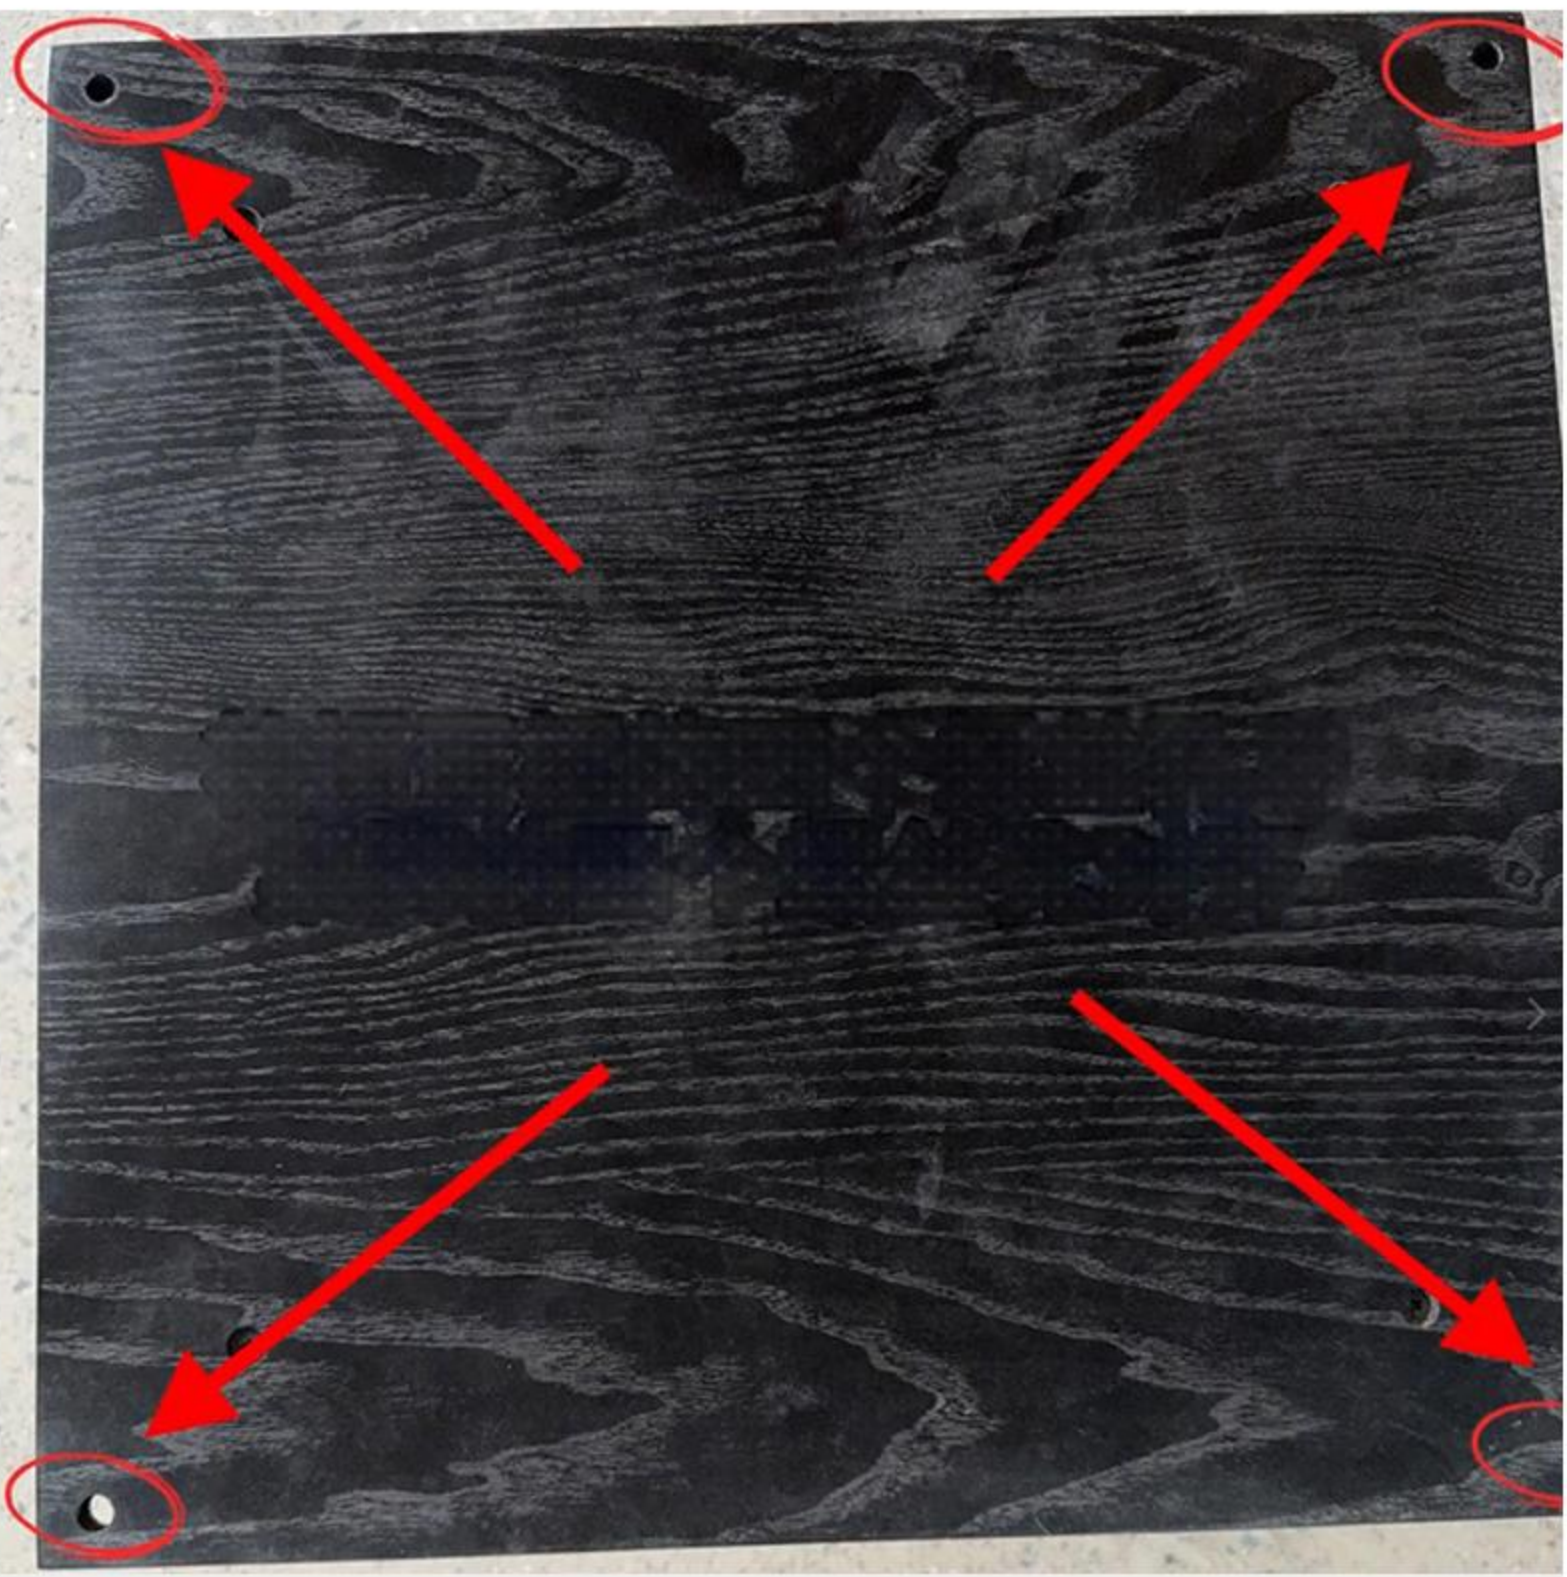

Place the table legs flat.

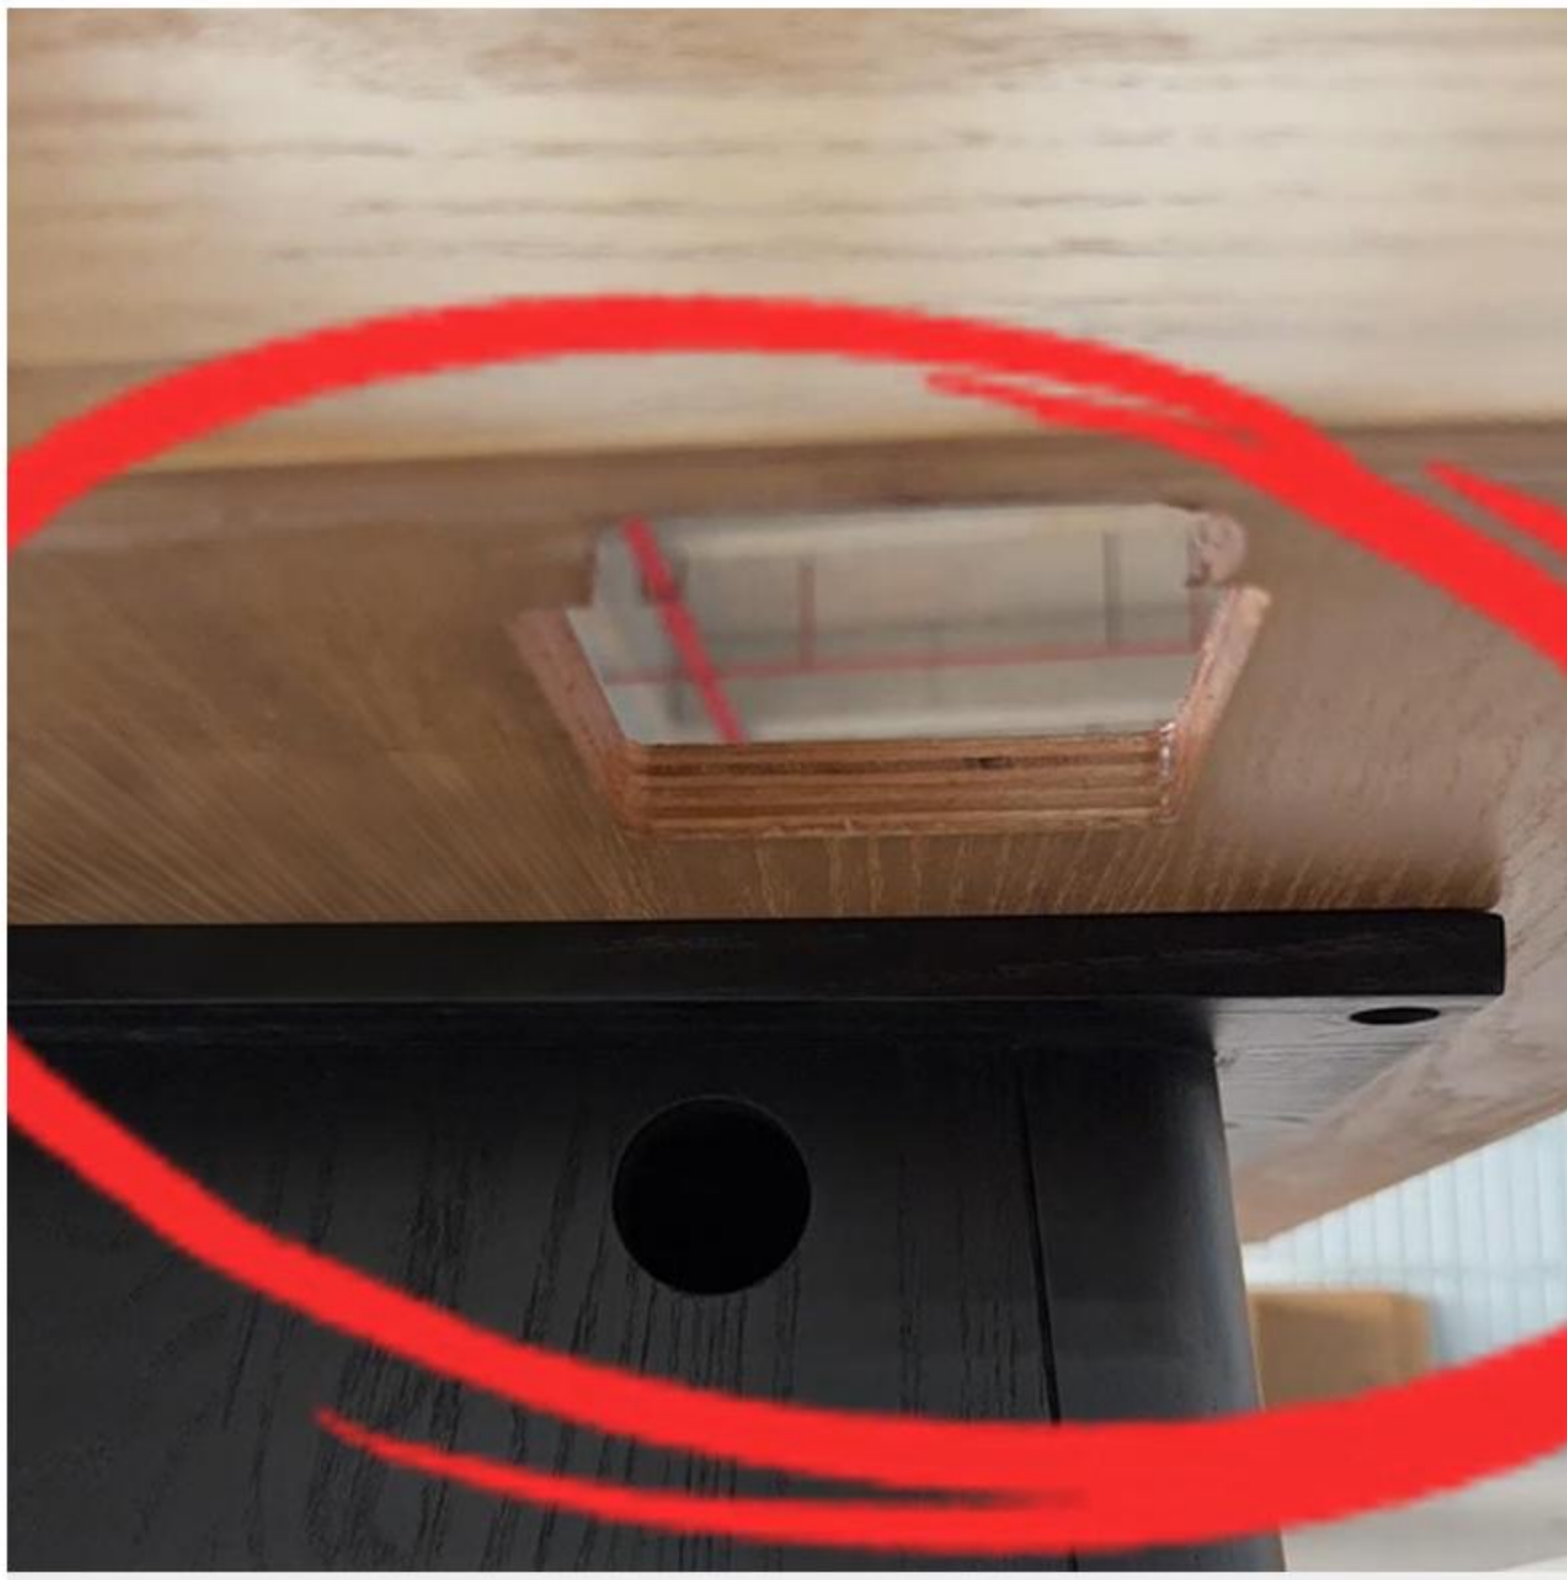

Remove the packaging from the mechanism, and take out the power cord from inside the mechanism.

Pass the power cord through the reserved power cord hole in the table leg.

Remove the packaging from the frame, and align the four screw holes on the frame with the four screw holes on the table legs.

Note: The power cord hole on the table legs must face the same direction as the power cord hole on the frame.

Install the frame

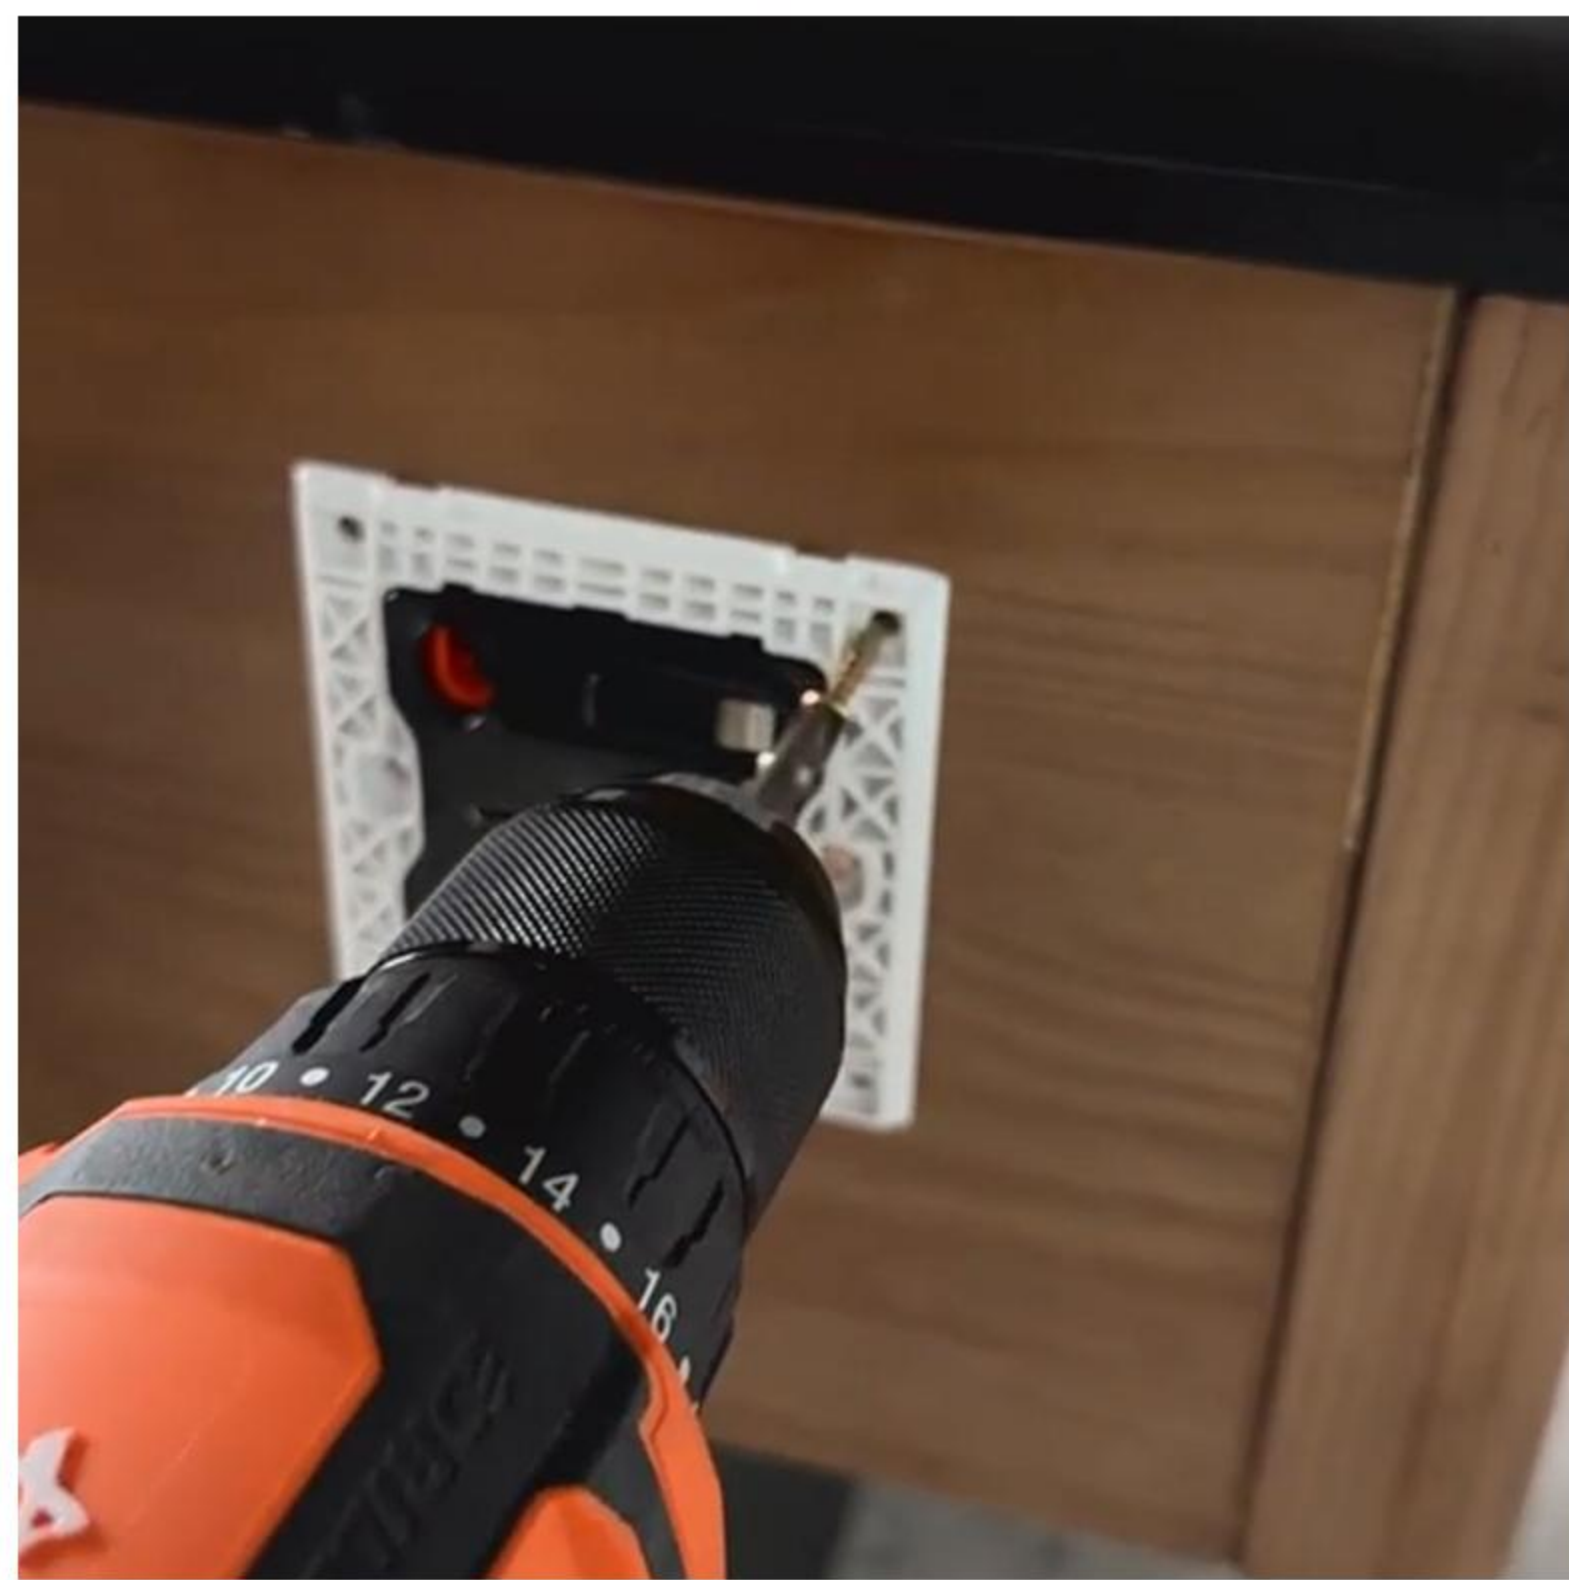

Take out the screws

Tighten and secure the screws at the four corners.

Secure the fast charging port. Separate the panel from the base.

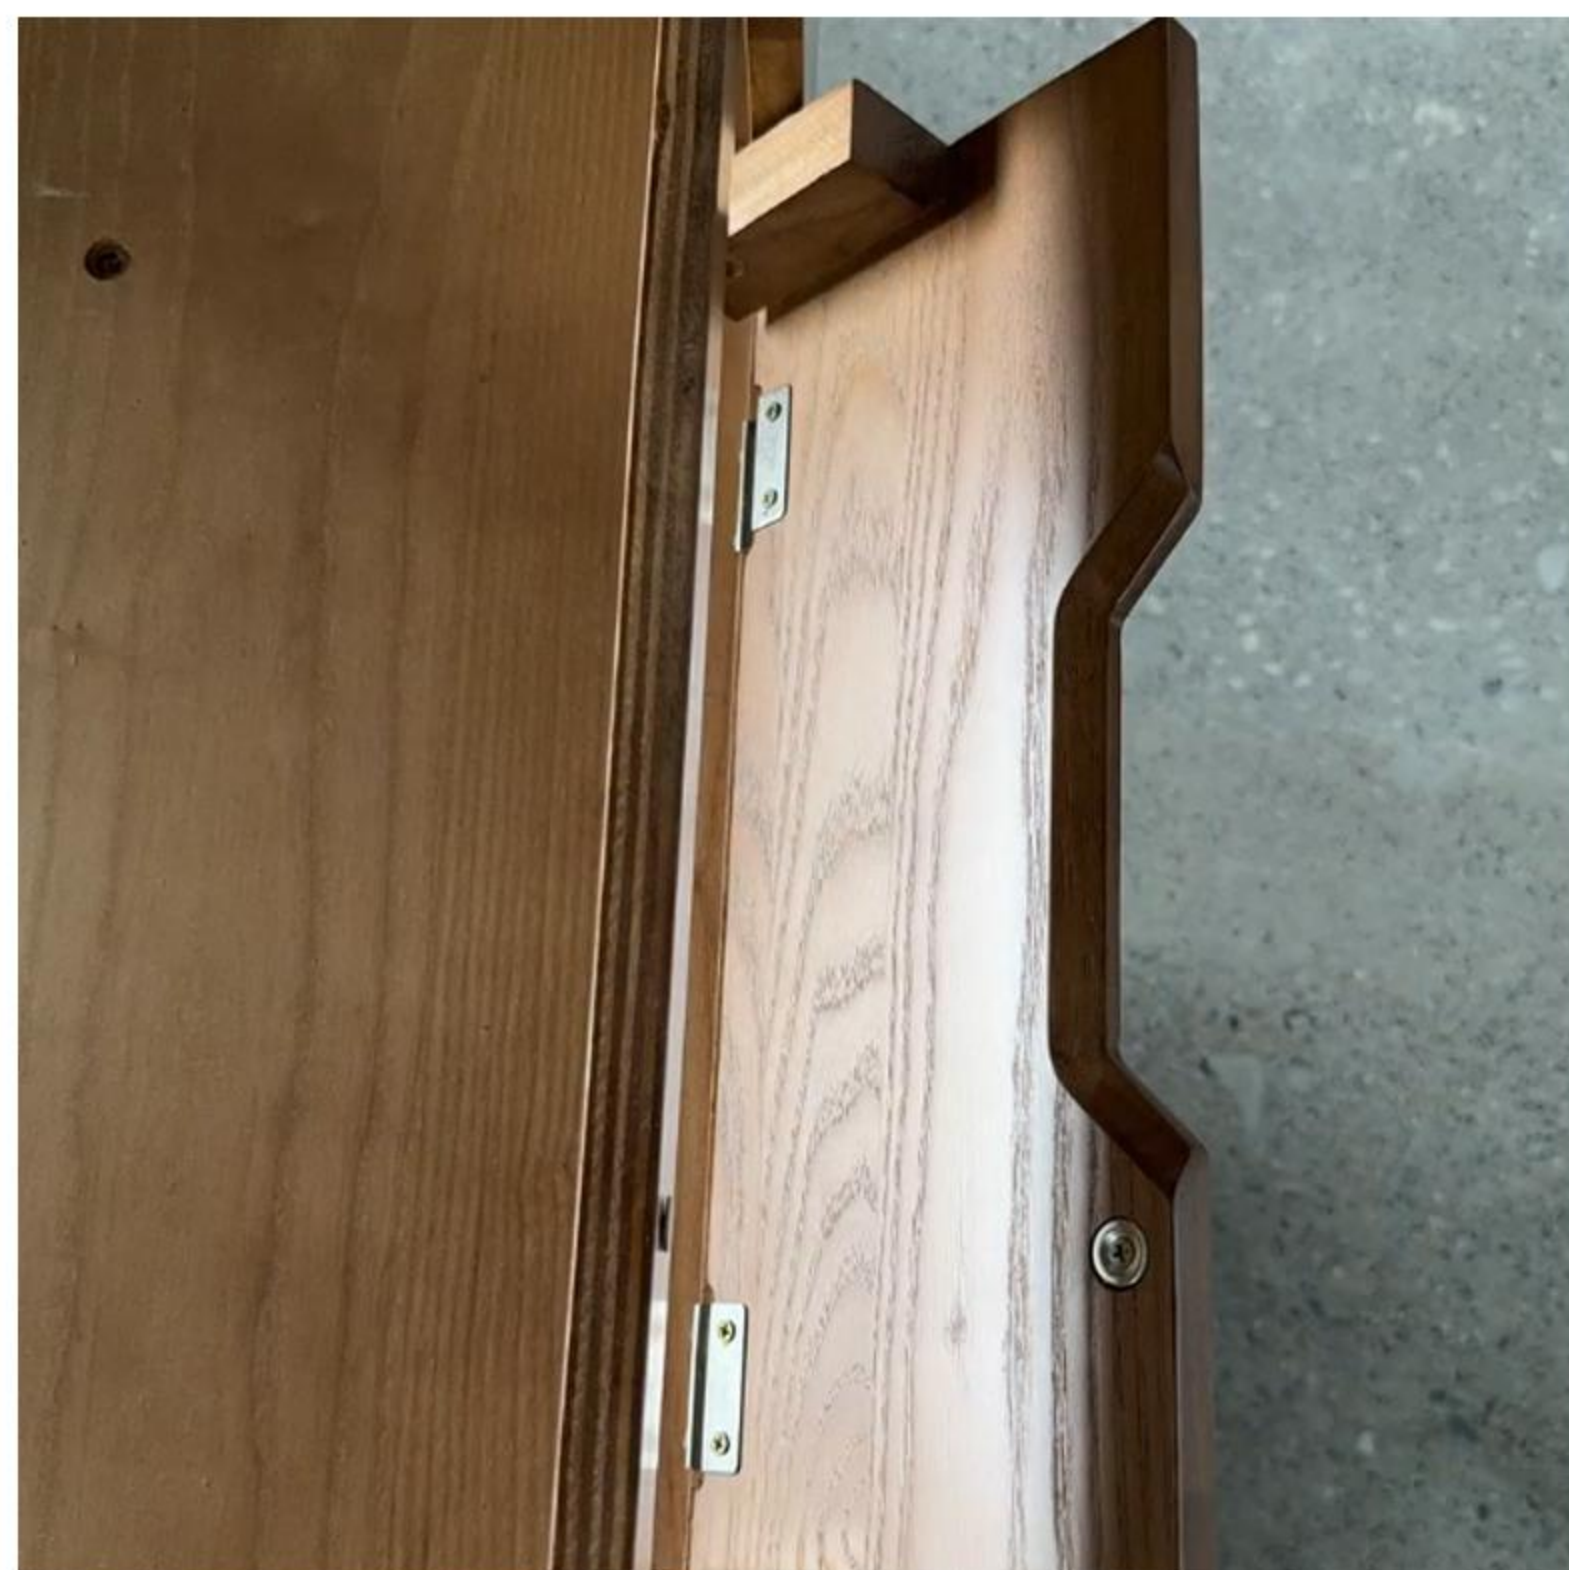

Install it in the reserved fast charging port on the frame.

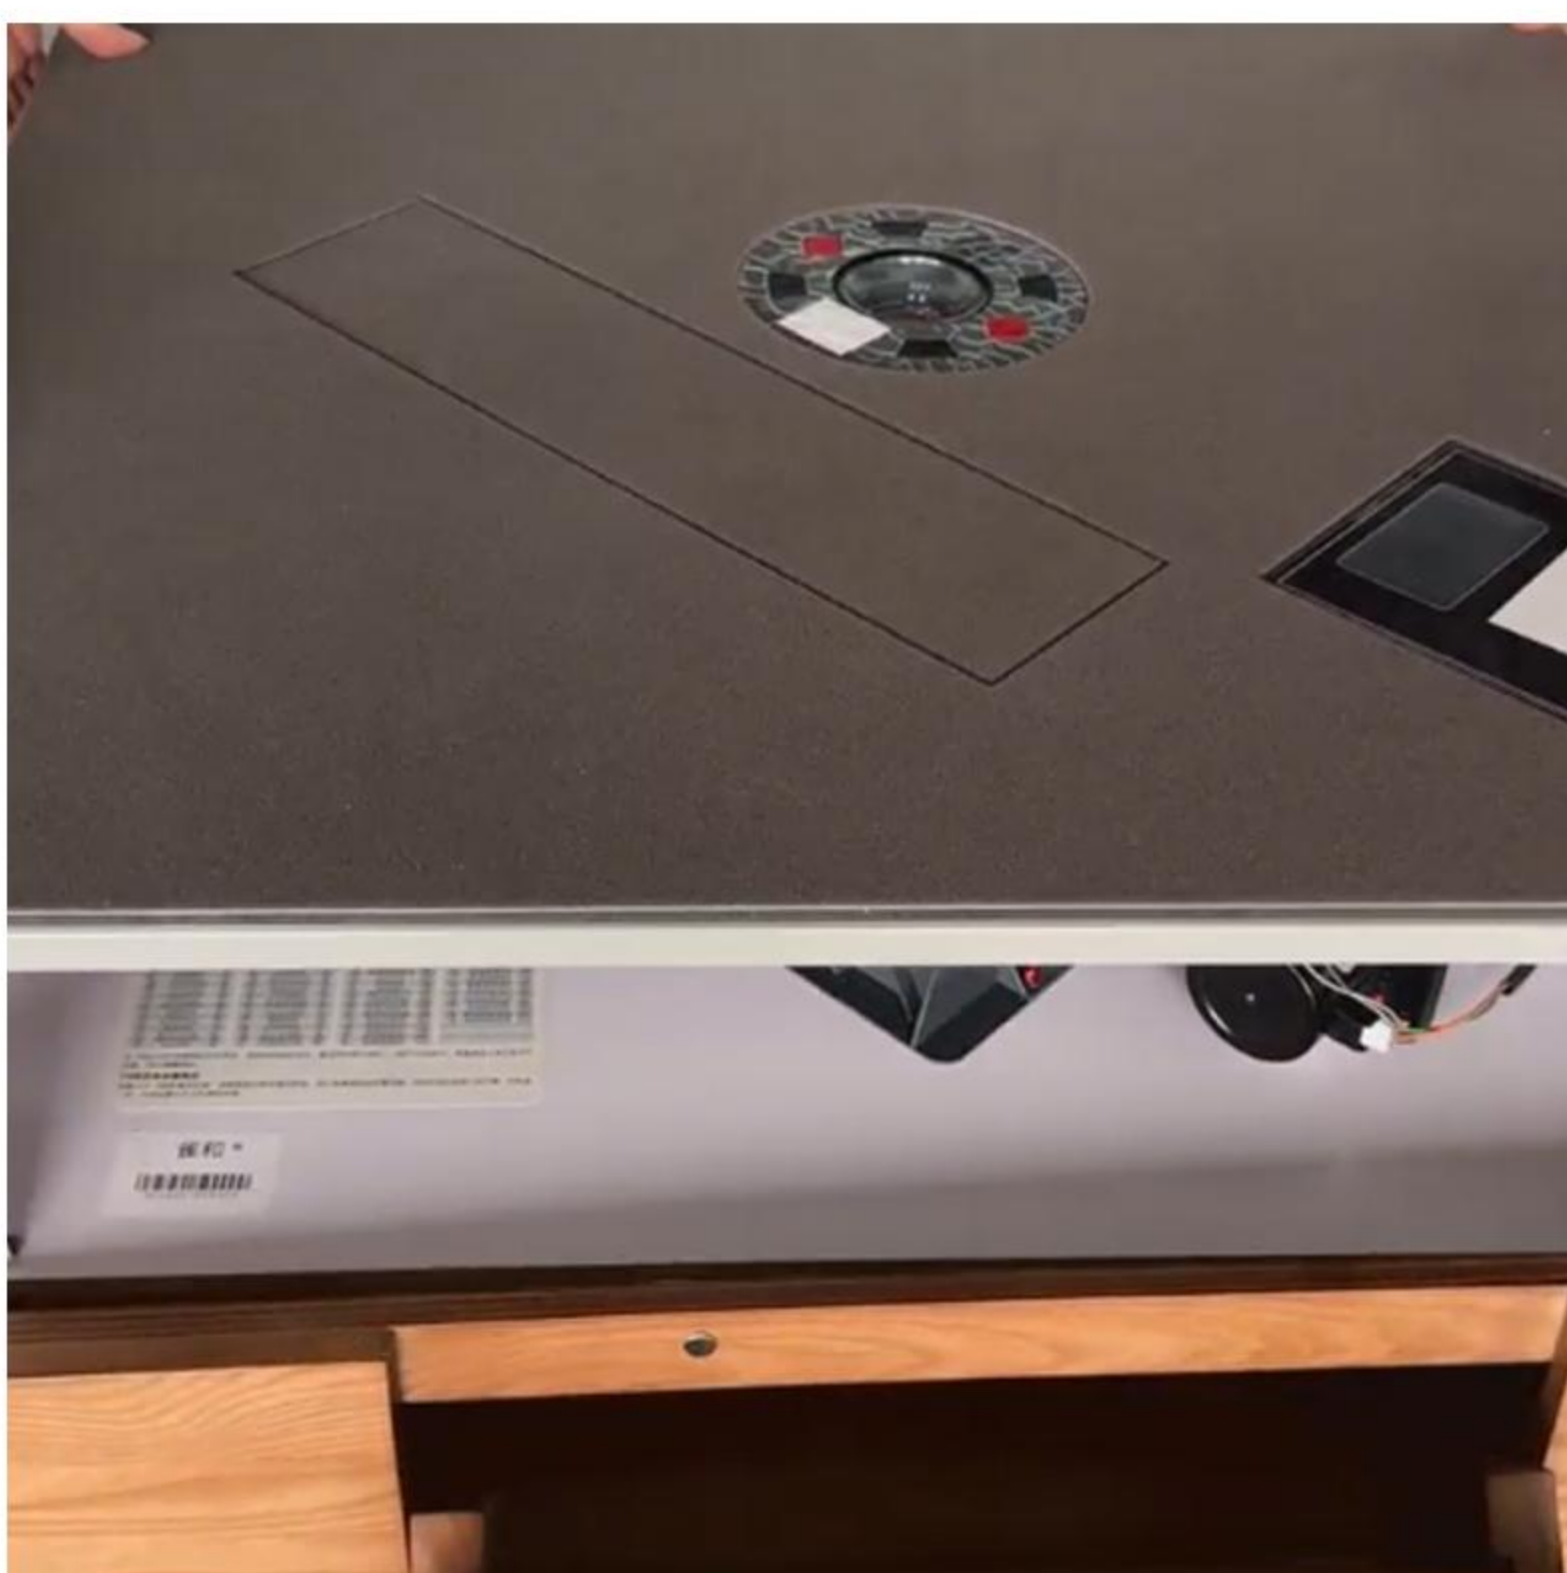

Secure the four corners with screws, then put the panel on.

Install the mechanism. Take out the four storage boxes.

The four drawers must be in the open position.

Place the mechanism into the frame.

Connect the fast charging cables on both sides.

Connect the power cord.

Install the four storage boxes.

Install the upper frame.

Installation complete.
