

The Best Seat In The House Since 2005

Your order may arrive in multiple boxes, sometimes delivered separately on different days by our partners. If your bean bag is partially filled, an additional net of beans is provided for you to complete your seat.

Assembly Guide in 4 Easy Steps!

For a smoother setup, grab a friend!

Unknot & Divide:

Person 1 unties the knot in the netting while ensuring they hold the end tightly. Then, they lift the net of beans and divide the beans into two halves with their other hand.

Open & Fill:

Person 2 flips the bean bag upside down and unzips both the outer and inner zips, pulling the inner fabric out to create a wide funnel opening. Person 1 then places the end of the bean filling net into the funnel, allowing the beans to flow in.

Close & Shake:

When halfway through filling, close both zips securely. Give the bean bag a shake to evenly distribute the beans inside. This action will prevent the funnel from becoming too full and ensure that the beans are spread evenly around the bean bag. Then, repeat step 2.

Shake & Zip:

Once the net is empty, give the bean bag a final shake to move the beans around. Proceed to zip up both the inner and outer zips, flip the bean bag over, and lastly, sit in it to plump out its shape and ensure the correct distribution of beans.

Sink In & Enjoy!

Now, the best part - take a seat and melt into complete comfort.
