Brightech®

SAGE 2 in 1 LED Reading Lamp

Assembly Instructions for the Brightech SAGE 2 in 1 LED Reading Lamp:

For table lamp use:

Step 1-   Connect Head (A) to Base Extension Leg (B) on Base (F).
(NOTE - the head and extension leg do not screw into place, they slide on and sit tightly, a little pressure may be required to slide them into correct position)

Step 2 - Plug Adapter (G) into lamp first, then outlet, then power on!
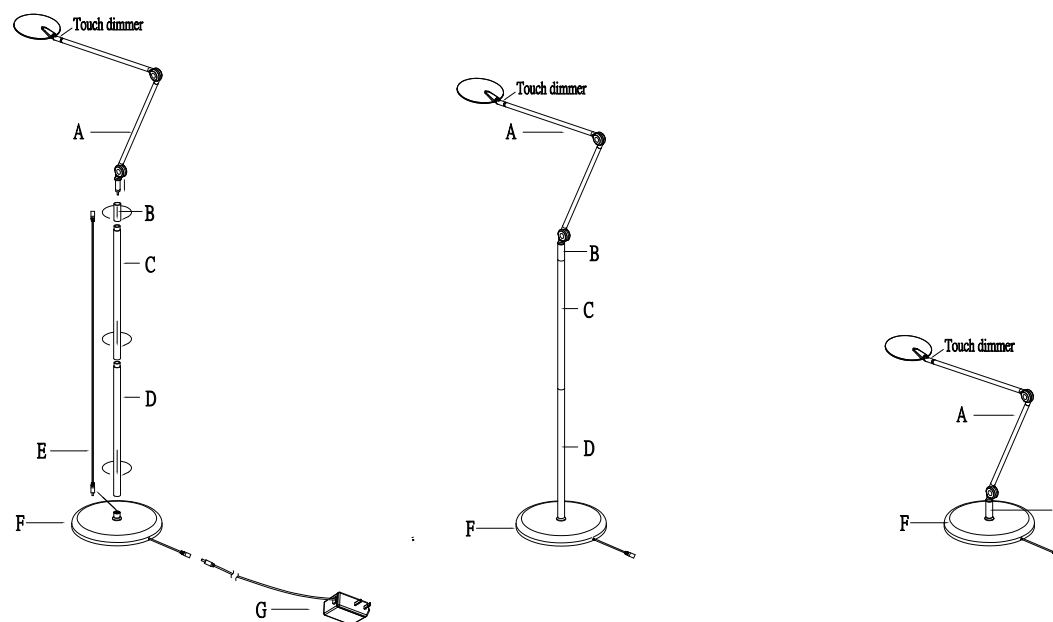

For floor lamp use:

Step 1-   Remove Base Extension Leg (B) from Base (F), connect to Head (A).

Step 2 - Plug AC Wire (E) into Head with female connection point.

Step 3 - Thread AC Wire through Upper Pole (C) then screw pole in place onto threading on Head, repeat for

Step 4 - Screw assembled lamp body onto Base (F).

Step 5 - Plug Adapter (G) into lamp first, then outlet, then power on!

Operation and Features:

The Sage 2-in-1 Table and Floor Lamp is controlled via a touch sensor located right under the head, and it has three color settings. Simply tap the button to turn on, and each subsequent tap will turn the lamp off and on rotating through the color options. To dim the lamp, simply hold the touch sensor for a longer amount of time in whatever color setting you prefer and the lamp will automatically move through the gradient dimming options. To rebrighten, release the sensor and hold again and it will cycle up through the settings. This lamp can be turned on and off via a wall switch for convenience, but it cannot be dimmed except by the touch sensor on the lamp. When using the lamp with a wall switch, it will remember its settings: if you turn the switch off with the lamp set to a lower brightness level, it will stay on the same lower level when you turn the switch back on.

Thank you!

Thank you for purchasing this product!
