

Natural Elements Cold Beverage Dispenser

NATURAL ELEMENT DISPENSERS NOW WITH STAINLESS SPIGOT

Our **Natural Elements Cold Beverage Dispensers** are constructed with 18/8 stainless steel and then hydro-dipped with one of our four patterns. They feature a BPA-free Tritan™ plastic body that offers the appearance of glass and the durability of plastic. The hydro-dipped lid and base enhances any presentation and is perfect for high-end buffets and beverage stations.

What is Hydro-dipping?

Hydro dipping is a method of permanently applying printed designs to three-dimensional surfaces. Our durable hydro dipping is done locally in small batches to ensure the printed surface will stand up to commercial wear and tear. Service Ideas offers the beverage dispenser to be hydro dipped in four finishes: Light Wood, Dark Wood, Travertine Marble, and White Marble.
