

Assembly Instructions for **Model 228074485**

Assembly and installation method

Tips: No holes are needed for open installation. Holes between 5-9 cm are acceptable for concealed installation

Q: What is concealed installation?

A: Concealed installation requires ceiling holes (within 5-9 cm). The installation steps are as follows:

1. Open holes for wiring

2. Connect the power cord

3. Buckle the spring into the hole

4. Installation completed

Q: What is open installation?

A: Open installation does not require holes. The installation steps are as follows:

1. Reserve wires

2. Fix the hanging board with expansion screws

3. Connect the power cord

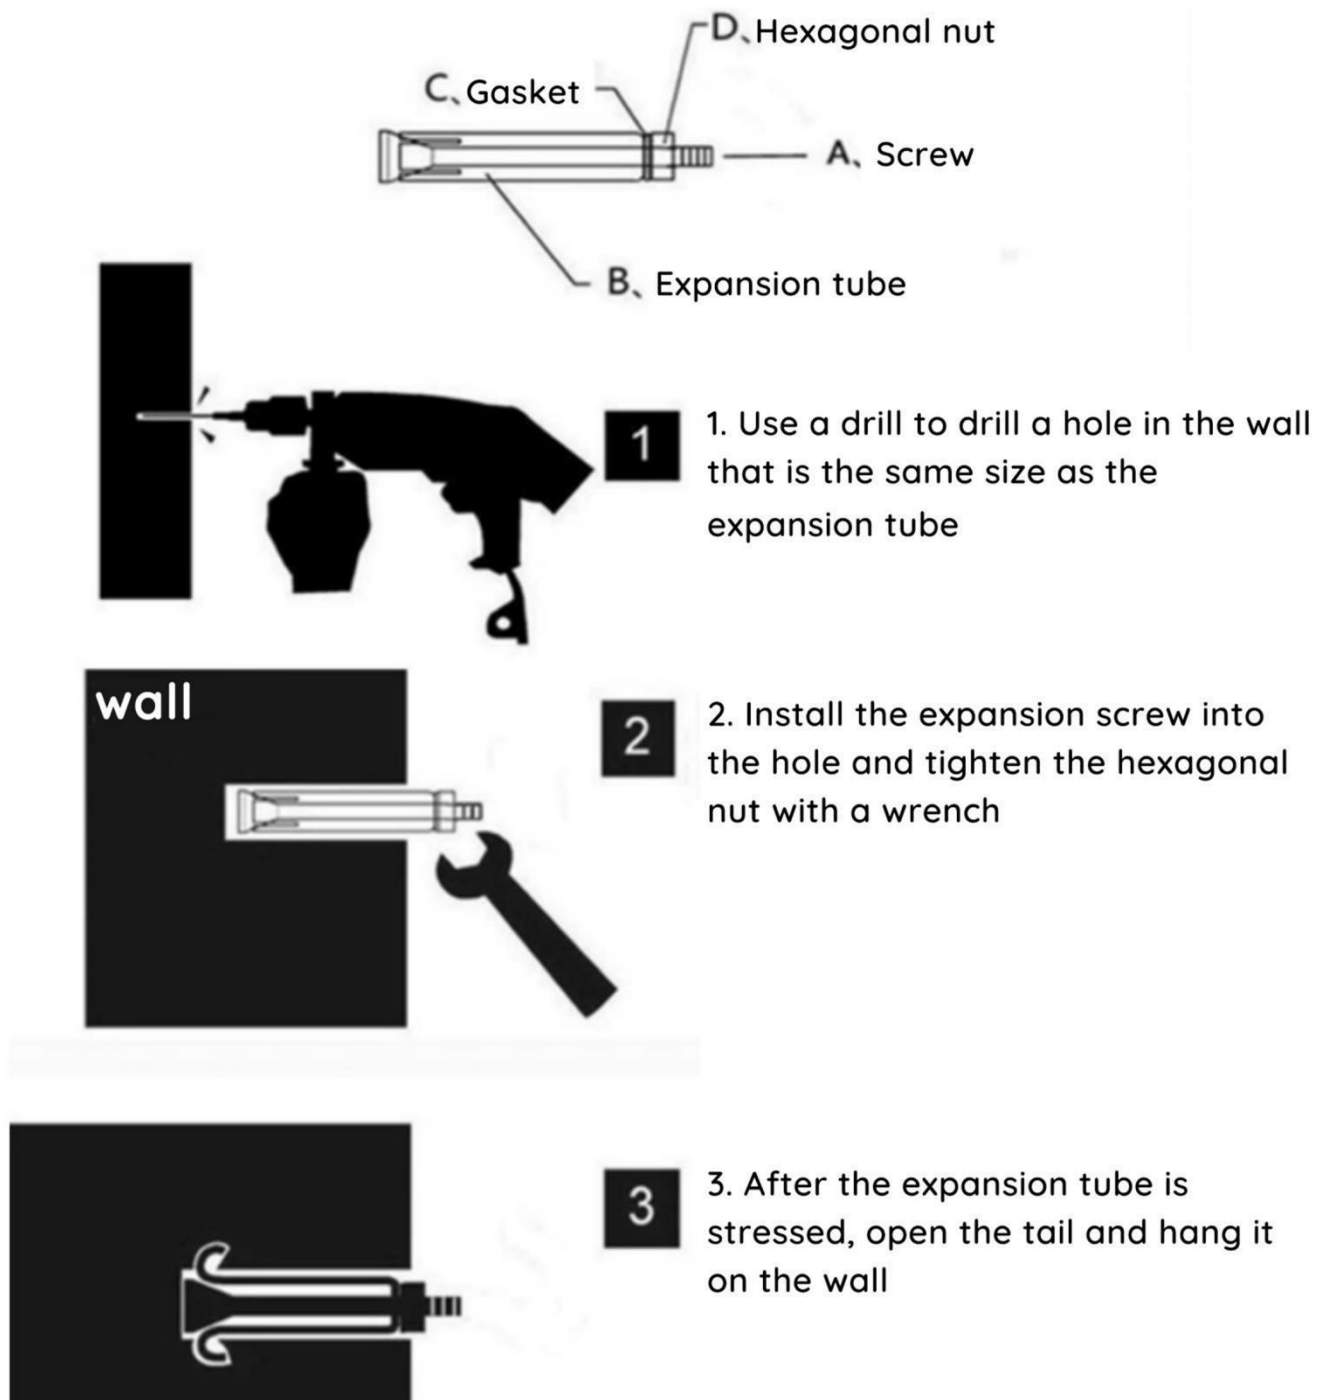

4. Fix the ceiling plate of the lamp to the hanging board with screws

Note: There is no need to distinguish between the neutral wire and the live wire when wiring.

When installing the hanging board, you need to use expansion screws:

Expansion Screw Instructions

Your fixture is now assembled and ready to use.
