

Aluminum Framed Round Mirror

Mounting instructions

Tools: Pencil, Screwdriver,
Measuring Tape, Stud finder

Hardware: TWO Anchors
TWO Screws

The hardware included with this item is meant for drywall or stud mounting only. If your walls are made from concrete, brick or plaster, please consult your local hardware store for assistance in selecting the appropriate hardware.

Use one screw and anchor to hang Mirror from a single mounting point. Stud is not required but recommend to support this frame. Please visit www.kingerhome.com for installation videos

Mounting Instructions:

- 1) Before you get started with the below mounting steps, use a measuring tape measure the distance from the side edge of the Mirror to the center of a butterfly hanging clip.
- 2) Determine a desired mounting location. With the help of another person, hold the mirror level against wall at a desired mounting location. Use a pencil to mark out both sides of the butterfly hook. Place the mirror aside.
- 3) Use a stud finder to look for wall stud in the desired installation points. If any of the installation point aligns with stud, use provided metal screws only. If there is no stud, both the dry wall anchors/metal screws are required.
- 4) If a installation point aligns with wall stud, use a Phillips screwdriver and secure a metal screw directly into the installation point and into the aligned stud. Rotate the screw clockwise until the screw head is about 3/8 inch from the wall surface.
- 5) For installation point that do not align with a wall stud, use a Phillips screwdriver to insert the wall anchor. Do not "push" or drive the anchor into the wall, it is designed to bore into the wall like a drill bit. Slowly turn the anchor clockwise while applying pressure until the flange just touches the wall. Again, using the screwdriver, insert a screw into the installed wall anchor and rotate the screw clockwise until the screw head resides about 3/8" from the wall.
- 6) After installation of the anchors/screws, raise the Mirror against the wall so that the key-holes are supported by the screw heads.

Care Instructions: To clean: wipe with a soft, dry cloth. Do not use abrasive or strong chemical household cleaners. A household glass cleaner may be used for the Mirror surfaces – spray the cleaner on a clean cloth first and then use the cloth to clean the Mirror. Do not spray the cleaner directly onto the Mirror or frame surfaces.
