Height Adjustment Screw Hole.

Depth Adjustrment Screw Hole.

Adjustment & Leveling

The hanger includes built-in adjustment screws. Use a screwdriver to fine-tune the cabinet position:

1. Up/Down Adjustment (Height & Leveling)
Insert a Phillips screwdriver into the height adjustment hole and turn the screw:

Clockwise → Hook rises → Cabinet lifts

Counterclockwise → Hook lowers → Cabinet drops

This allows you to level both sides of the cabinet evenly.

2. Front/Back Adjustment (Wall Alignment)
Insert the screwdriver into the depth adjustment hole and turn to adjust the distance from the wall:

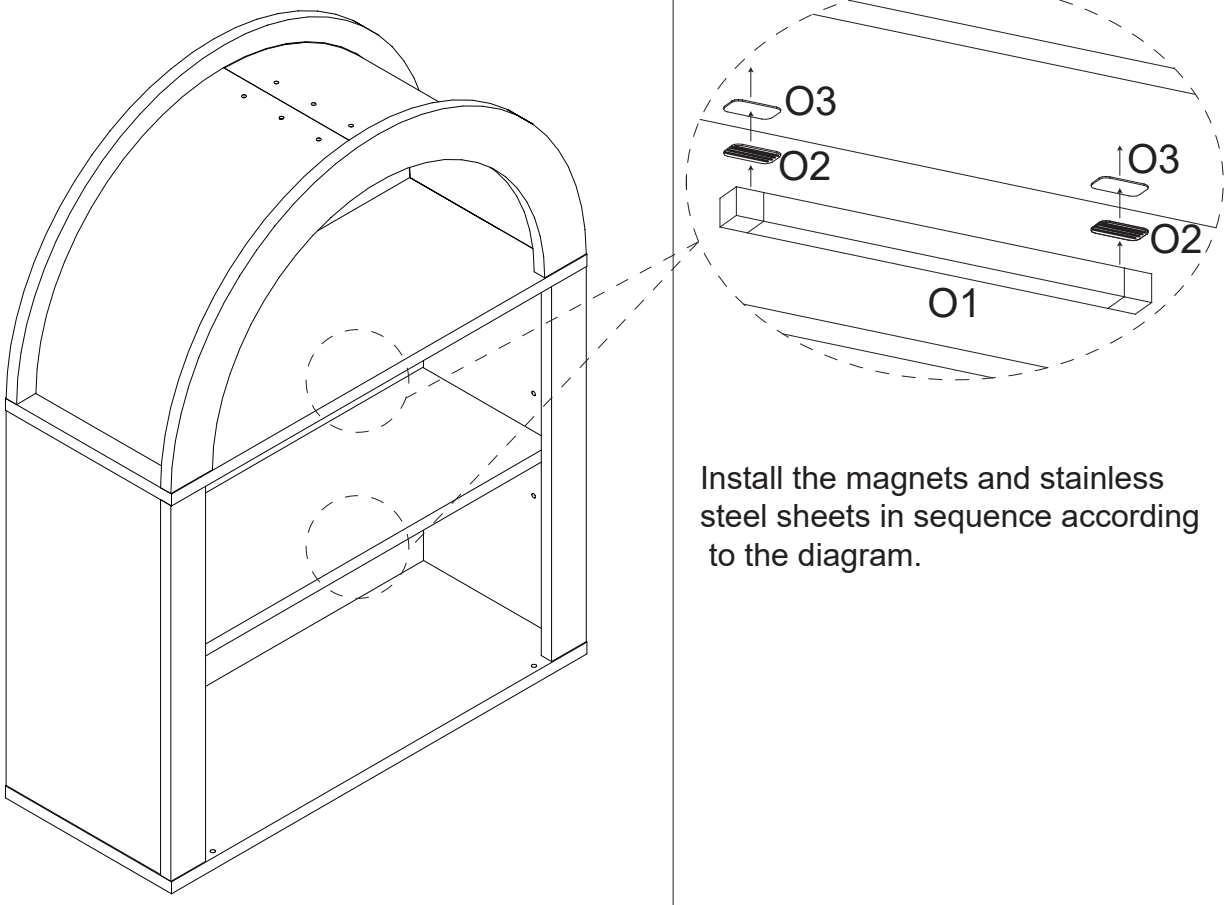

Clockwise → Hook retracts → Cabinet moves closer to wall

Counterclockwise → Hook extends → Cabinet moves away from wall

Adjust until the cabinet is level and fits tightly against the wall.

# Installation Instructions

STEP 19

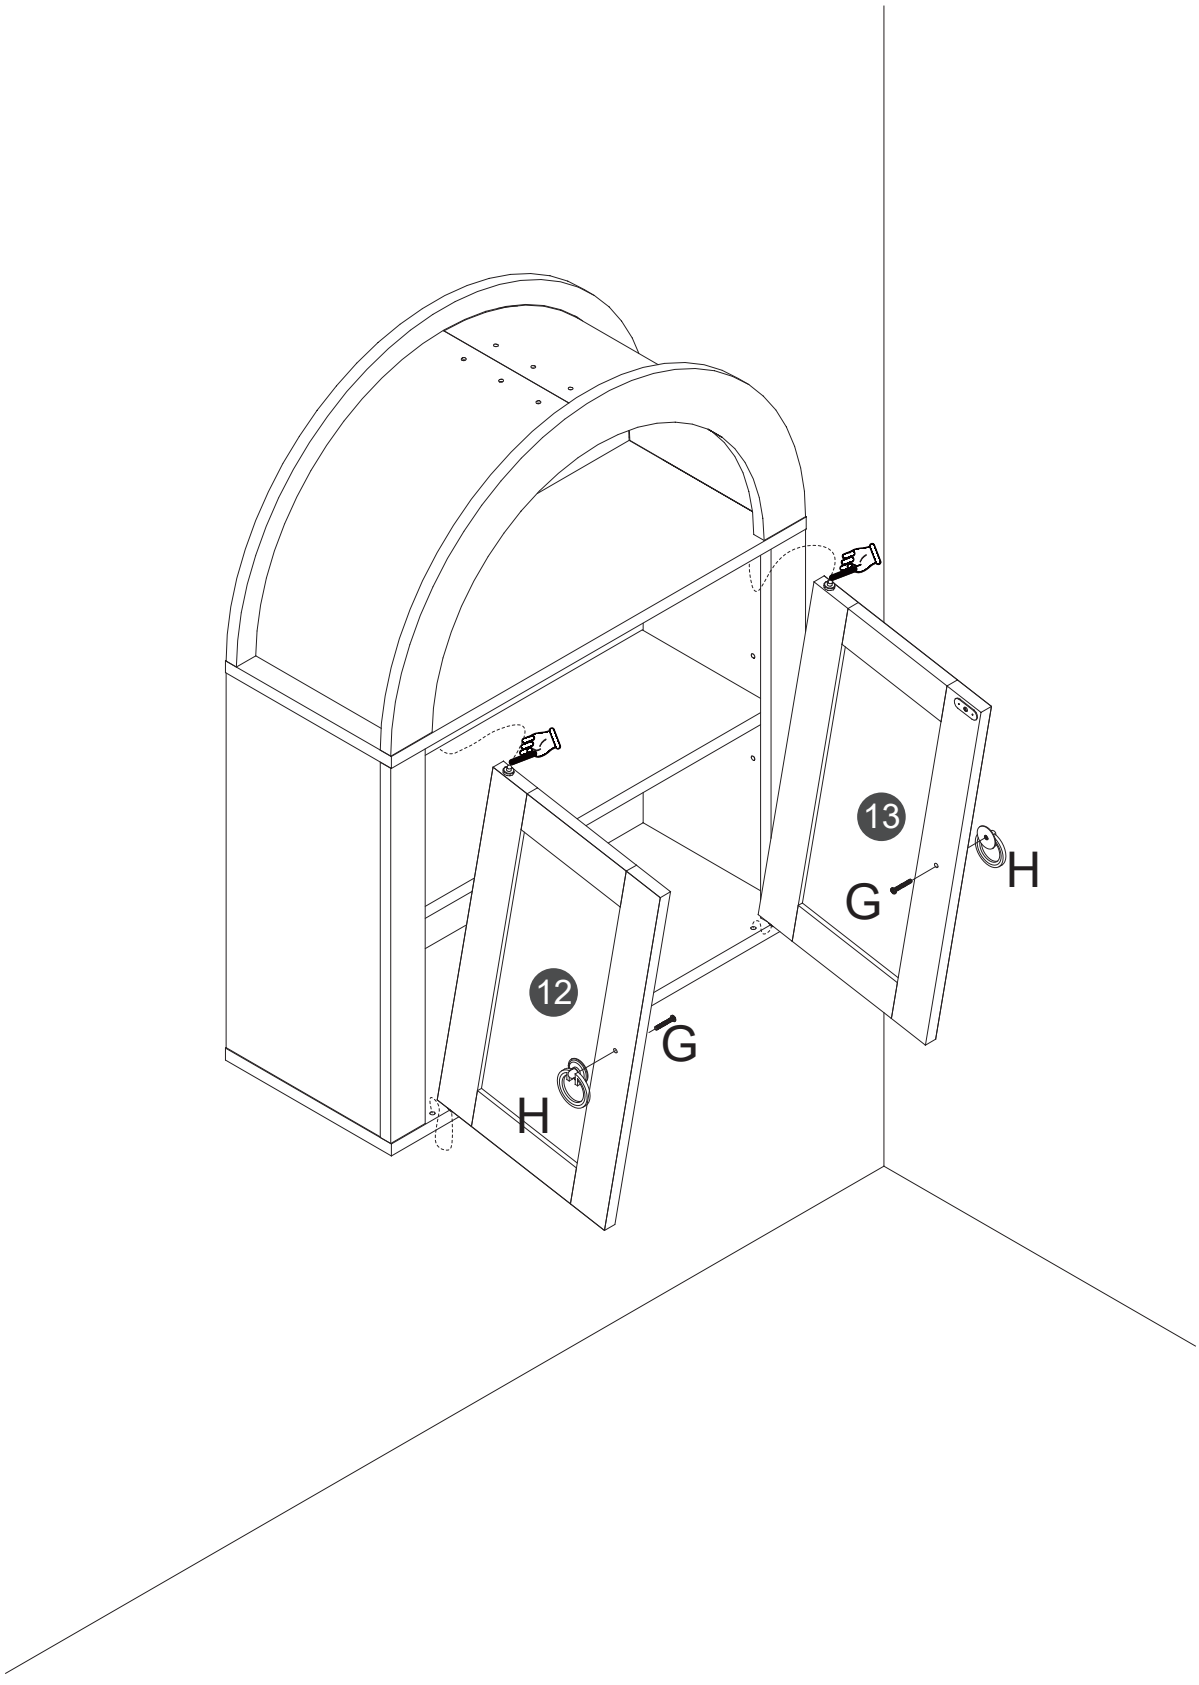

Install the magnets and stainless steel sheets in sequence according to the diagram.
