**Note**

In the package you will find the poultry net. When attaching the net to the chicken run structure, do not pre-cut the net. Instead, roll the net along the tubes and cut it. The arrows on the illustrations indicate the flow of the net. Follow the arrows to roll and cut the net. Use zip-ties to fasten the net to the tubes. There will be overlaps between the nets.

Note

For the net placed at the back of the chicken run, we suggest rolling the net roll without measuring or precutting the net like last step. For the net placed in the front, it's easier to measure and cut the net, and then fasten the cutted net to the tubes.

Notice that the rectangular shape in the front has a greater length than the width of net roll, meaning if you roll the net vertically, the roll will not be wide enough to cover the rectangular area. In summary, please follow the arrows to roll and cut the net.

**Note**

In the package you will find the poultry net. When attaching the net to the chicken run structure, do not precut the net. Instead, roll the net along the tubes and cut it. The arrows on the illustrations indicate the flow of the net. Follow the arrows to roll and cut the net. Use zip-ties to fasten the net to the tubes. There will be overlaps between the nets.

Note

For the net placed at the back of the chicken run, we suggest rolling the net roll without measuring or precutting the net like last step. For the net placed in the front, it's easier to measure and cut the net, and then fasten the cutted net to the tubes.

Notice that the rectangular shape in the front has a greater length than the width of net roll, meaning if you roll the net vertically, the roll will not be wide enough to cover the rectangular area. In summary, please follow the arrows to roll and cut the net.
